Handbook of Communication and Aging Research

Jon F. Nussbaum, Justine Coupland, 2004-04-12 This second edition of the Handbook of Communication and Aging Research captures the ever changing and expanding domain of aging research Since it was first recognized that there is more to social aging than demography gerontology has needed a communication perspective Like the first edition this handbook sets out to demonstrate that aging is not only an individual process but an interactive one The study of communication can lead to an understanding of what it means to grow old We may age physiologically and chronologically but our social aging how we behave as social actors toward others and even how we align ourselves with or come to understand the signs of difference or change as we age are phenomena achieved primarily through communication experiences Synthesizing the vast amount of research that has been published on communication and aging in numerous international outlets over the last three decades the book's contributors include scholars from North America and the United Kingdom who are active researchers in the perspectives covered in their particular chapter Many of the chapters work to deny earlier images of aging as involving normative decrement to provide a picture of aging as a process of development involving positive choices and providing new opportunities A recurring theme in many chapters is that of the heterogeneity of the group of people who are variously categorized as older aged elderly or over 65 The contributors review the literature analytically in a way that reveals not only current theoretical and methodological approaches to communication and aging research but also sets the future agenda This handbook will be of great interest to scholars and researchers in gerontology developmental psychology and communication and in this updated edition will continue to play a key role in the study of communication and aging

Selling Antislavery Teresa A. Goddu, 2020-03-13 Beginning with its establishment in the early 1830s the American Anti Slavery Society AASS recognized the need to reach and consolidate a diverse and increasingly segmented audience To do so it produced a wide array of print material and visual media almanacs and slave narratives pincushions and gift books broadsides and panoramas Building on the distinctive practices of British antislavery and evangelical reform movements the AASS utilized innovative business strategies to market its productions and developed a centralized distribution system to circulate them widely In *Selling Antislavery* Teresa A Goddu shows how the AASS operated at the forefront of a new culture industry and by framing its media as cultural commodities made antislavery sentiments an integral part of an emerging middle class identity She contends that although the AASS's dominance waned after 1840 as the organization splintered it nevertheless created one of the first national mass markets Goddu maps this extensive media culture focusing in particular on the material produced by AASS in the decade of the 1830s She considers how the dissemination of its texts objects and tactics was facilitated by the quasi corporate and centralized character of the organization during this period and demonstrates how its institutional presence remained important to the progress of the larger movement Exploring antislavery's vast archive and explicating its messages she emphasizes both the discursive and material aspects of antislavery's appeal providing a richly textured history of the movement through its artifacts and the modes of circulation it put into place Featuring more than seventy five illustrations *Selling Antislavery* offers a thorough case study of the role of reform movements in the rise of mass media and argues for abolition's central importance to the shaping of antebellum middle class culture
