**Free Movement, Social Security and Gender in the EU** Vicki Paskalia, 2007-07-31 This work examines the system of co ordination of national social security laws in the European Union from a gender perspective The central question that it raises concerns the level of social security protection enjoyed by women moving throughout the Union in cases of work interruption or marriage dissolution Women s social security protection has traditionally been based on two criteria namely economic activity and family marriage Work interruptions in particular for child rearing challenge the invocation of economic activity as an effective basis for social security rights Changing social and family conditions including the emergence of atypical relationships and increasing divorce rates challenge the criterion of family marriage Efforts have been made within the framework of the national systems of the Member States to address these challenges often unsuccessfully So how successful has the European system of co ordination the aim of which is to provide a sufficient level of protection to migrant workers and their families been in addressing these challenges The book contains comprehensive discussion of the phenomenon and legal institution of social security as well as a thorough analysis of the current state of European Community law concerning co ordination with a particular focus on gender It identifies several problematic areas where solutions must be worked out and action taken The book fills a gap in the legal literature on the social security field and will appeal to those with an interest in social security including academics policy makers and practitioners *Who's Who in the Arab World 2007-2008* Publitex Publications, 2011-12-22 Who s Who in the Arab World 2007 2008 compiles information on the most notable individuals in the Arab world Additionally the title provides insight into the historical background and the present of this influential and often volatile region Part I sets out precise biographical details on some 6 000 eminent individuals who influence every sphere of public life in politics culture and society Part II surveys the 19 Arab Countries providing detailed information on the geography history constitution economy and culture of the individual countries Part III provides information on the historical background of the Arab world Indexes by country and profession supplement the biographical section A select bibliography of secondary literature on the Middle East is also included *Monthly Labor Review*, 1976-07 Publishes in depth articles on labor subjects current labor statistics information about current labor contracts and book reviews

**Working Through the Past** Teri L. Caraway, Maria Lorena Cook, Stephen Crowley, 2015-05-26 Democratization in the developing and postcommunist world has yielded limited gains for labor Explanations for this phenomenon have focused on the effect of economic crisis and globalization on the capacities of unions to become influential political actors and to secure policies that benefit their members In contrast the contributors to *Working through the Past* highlight the critical role that authoritarian legacies play in shaping labor politics in new democracies providing the first cross regional analysis of the impact of authoritarianism on labor focusing on East and Southeast Asia Eastern Europe and Latin America Legacies from the

predemocratic era shape labor's present in ways that both limit and enhance organized labor's power in new democracies. Assessing the comparative impact on a variety of outcomes relevant to labor in widely divergent settings, this volume argues that political legacies provide new insights into why labor movements in some countries have confronted the challenges of neoliberal globalization better than others.
