1st Torino Meeting on Superunification and Extra Dimensions, 22-28 September 1985, Torino, Italy R.

D'Auria, P. Fré, 1986 N = 2 Supergravity in D = 4, 5, 6 Dimensions Edoardo Lauria, Antoine Van Proeyen, 2020-03-11 This graduate level primer presents a tutorial introduction to and overview of N = 2 supergravity theories with 8 real supercharges and in 4, 5 and 6 dimensions. First the construction of such theories by superconformal methods is explained in detail and relevant special geometries are obtained and characterized. Following the relation between the supergravity theories in the various dimensions is discussed. This leads eventually to the concept of very special geometry and quaternionic Kähler manifolds. This concise text is a valuable resource for graduate students and young researchers wishing to enter the field quickly and efficiently.

1. Torino Meeting on Superunification and Extra Dimensions Riccardo D'Auria, 1985

Supergravity Daniel Z. Freedman, Antoine Van Proeyen, 2012-04-05 The first ever authoritative and systematic introduction to the fundamentals of supergravity written by two leaders in the field.

Supergravity And Superstrings: A Geometric Perspective (In 3 Volumes) Leonardo Castellani, Riccardo D'Auria, Pietro Fré, 1991-06-11 This book provides a self contained presentation of supergravity theories from its fundamentals to its most recent union with string and superstring theories which are also reviewed in a self contained manner. The subject is presented consistently in a unified geometric formalism relying on the calculus of exterior forms and the mathematics needed to develop the theory is explained in appropriate chapters.

Superstring Theory: Volume 2, Loop Amplitudes, Anomalies and Phenomenology Michael B. Green, John H. Schwarz, Edward Witten, 1988-07-29 A two volume systematic exposition of superstring theory and its applications which presents many of the new mathematical tools that theoretical physicists are likely to need in coming years. This volume contains an introduction to superstrings.

Geometry of String Theory Compactifications Alessandro Tomasiello, 2022-01-13 A unified perspective on new and advanced mathematical techniques used in string theory research for graduate students and researchers.

Super Field Theories H.C. Lee, V. Elias, G. Kunstatter, R.B. Mann, K.S. Viswanathan, 2012-12-06 The Super Field Theory Workshop held at Simon Fraser University Vancouver Canada July 25 August 5 1986 was originally intended to be a sequel to the 1983 Chalk River Workshop on Kaluza Klein Theories and the 1985 Workshop on Quantum Field Theories held at the University of Western Ontario. The scope of the workshop was therefore not to be very big with a program of about 20 papers an anticipated 30 to 45 participants and with much time scheduled for discussion and personal contact. These goals were soon changed in the face of wide interest in the workshop both for participation and for giving talks so that the workshop materialized with about 90 participants and 40 talks. This volume contains the texts some considerably expanded from the oral version of most of the talks presented at the workshop. Not included are a few talks whose manuscripts were not made available to the editors. In the last few years the subject of particle physics and unified field theory has developed in a way not witnessed in the last fifty years a confluence with

mathematics especially in geometry topology and algebra at an advanced level This has vastly expanded the horizon of the discipline and heightened the expectation that a true understanding of the fundamental laws of physics may soon be within reach Most aspects of this new development are covered many in pedagogical detail by articles in this volume Physics Briefs ,1987 **Superstring Theory** Michael B.
