Identities and Social Change in Britain Since 1940 Michael Savage, 2010-05-13 Identities and Social Change in Britain since 1940 examines how between 1940 and 1970 British society was marked by the imprint of the academic social sciences in profound ways which have an enduring legacy on how we see ourselves It focuses on how interview methods and sample surveys eclipsed literature and the community study as a means of understanding ordinary life The book is the first to draw extensively on archived qualitative social science data from the 1930s to the 1960s which it uses to offer a unique personal and challenging account of post war social change in Britain It also uses this data to conduct a new kind of historical sociology of the social sciences one that emphasises the discontinuities in knowledge forms and which stresses how disciplines and institutions competed with each other for reputation Its emphasis on how social scientific forms of knowing eclipsed those from the arts and humanities during this period offers a radical re thinking of the role of expertise today which will provoke social scientists scholars in the humanities and the general reader alike

Industrial Ruination, Community and Place Alice Mah, 2012-10-03 Abandoned factories shipyards warehouses and refineries are features of many industrialized cities around the world But despite their state of decline these derelict sites remain vitally connected with the urban landscapes that surround them In this enlightening new book Alice Mah explores the experiences of urban decline and post industrial change in three different community contexts Niagara Falls Canada USA Newcastle upon Tyne UK and Ivanovo Russia Employing a unique methodological approach that combines ethnographic spatial and documentary methods Mah draws on international comparisons of the landscapes and legacies of industrial ruination over the past forty years Through this she foregrounds the complex challenges of living with prolonged uncertainty and deprivation amidst socioeconomic change This rich comparative study makes an essential contribution to far reaching debates about the decline of manufacturing regeneration and identity and will have important implications for urban theory and policy

Identities and Social Change in Britain since 1940 Mike Savage, 2010-05-13 Identities and Social Change in Britain since 1940 examines how between 1940 and 1970 British society was marked by the imprint of the academic social sciences in profound ways which have an enduring legacy on how we see ourselves It focuses on how interview methods and sample surveys eclipsed literature and the community study as a means of understanding ordinary life The book shows that these methods were part of a wider remaking of British national identity in the aftermath of decolonisation in which

measures of the rational managed nation eclipsed literary and romantic ones It also links the emergence of social science methods to the strengthening of technocratic and scientific identities amongst the educated middle classes and to the rise in masculine authority which challenged feminine expertise This book is the first to draw extensively on archived qualitative social science data from the 1930s to the 1960s which it uses to offer a unique personal and challenging account of post war social change in Britain It also uses this data to conduct a new kind of historical sociology of the social sciences one that emphasises the discontinuities in knowledge forms and which stresses how disciplines and institutions competed with each other for reputation Its emphasis on how social scientific forms of knowing eclipsed those from the arts and humanities during this period offers a radical re thinking of the role of expertise today which will provoke social scientists scholars in the humanities and the general reader alike

Understanding Social Inequality Tim Butler, Paul Watt, 2006-12-18 This is a book that should be read by anyone interested in class inequality poverty and politics Actually probably more importantly it should be read by people who think that those things do not matter It provides a wonderful summation of the huge amount of work on these topics that now exists and it also offers its own distinctive perspectives on a set of issues that are despite the claims of some influential commentators still central to the sociological enterprise and indeed to political life Roger Burrows University of York A clear and compelling analysis of the dynamics of social and spatial inequality in an era of globalisation This is an invaluable resource for students and scholars in sociology human geography and the social sciences more generally Gary Bridge University of Bristol With the declining attention paid to social class in sociology how can we analyze continuing and pervasive socio economic inequality What is the impact of recent developments in sociology on how we should understand disadvantage Moving beyond the traditional dichotomies of social theory this book brings the study of social stratification and inequality into the 21st century Starting with the widely agreed fact that the world is becoming more unequal this book brings together the identity of displacement in sociology and the spaces of flow of geography to show how place has become an increasingly important focus for understanding new trends in social inequality
