

Translation and Transposition

I suppose that the broadest distinction ever drawn between ways of transferring literary matter from one language to another in the distinction between translations and verse. And the broadest account of these distinctions is that where a critic proposes to take care of the letter of the original, a translation must attend to the spirit. But that is broad indeed, as John Leishman of a distinction, and for the purposes of this paper I intend to insert a subtle wedge between translation and verse. The term I propose is "transposition". Transposition, in the sense I choose to give it, means when the language of the matter to be translated meets some strength in the language of the translator—in age, ideas, cultural habits and so on—so that he able to follow the letter with a fair hope of keeping faith with the spirit. Translating a modern French novel from English is thus mainly a matter of transposition. Poetry is more difficult, because its verbal organization is usually more concentrated and more personal; nevertheless a good deal of modern verse can usually be transposed. Take the English version of the poems of Claudel by Professor Macgregor. It is, in a perfectly honestable sense, essentially a first reading; yet as an account of the matter (and more) of Claudel it is very serviceable and will stand well with time as evidence is needed—and of course permitted by the laws of copyright—for advantage in poetic recreation; yet, in other words, a translation. A somewhat more ambitious example of transposition is the version of Rilke's *Deine Klänge* by Leishman and Spensley. It reads like poetry, and as such, it seems to reproduce something of the spirit of Rilke's poems, and yet it is clear enough on the letter of the original to help the reader who needs to see Claudel in English as Rilke's German words.

The further one moves back in time, the more transposition must approximate to translation. There is nevertheless a definite element of what I am calling transposition even in the loose modern rendering of a poem relatively as distant as the *Divine Comedy*. In the sense that Lawrence Binson would call a modern English equivalent for Dante's medieval Italian, this is true translation. But since Dante's language and the particular of his poems are still just within halting distances, Binson was able to transpose. He could for example take over Dante's term *rima* more or less unchanged, though as a loose reader, the reader who helps to give Dante's line its peculiar concentration; he was able to follow the context of the poem and even the particular of the moment. Let me quote a single stanza:

The Craft and Context of Translation William Arrowsmith, Roger Shattuck, 1964 Chaucer and Langland George Kane, 1989-01-01 **Translation** Jan Steyn, 2022-09-22 The various dimensions of translation studies too often studied independently are here brought into conversation Translation practice including the various crafts employed by its practitioners the specialized contexts in which translation occurs or against which translation can be considered and the ethico political consequences of translations or the manner of their making Including exciting new work from leading translation theorists practicing literary translators and prominent thinkers from adjoining disciplines such as psychoanalysis and neuroscience the essays gathered here demonstrate many rich areas of overlap with translation pedagogy the fundamental nature of translation the translator s creativity retranslation canon formation and the geopolitical stakes of literary translation among them Eco-Translation Michael Cronin, 2017-01-06 Ecology has become a central question governing the survival and sustainability of human societies cultures and languages In this timely study Michael Cronin investigates how the perspective of the Anthropocene or the effect of humans on the global environment has profound implications for the way translation is considered in the past present and future Starting with a deep history of translation and ranging from food ecology to inter species translation and green translation technology this thought provoking book offers a challenging and ultimately hopeful perspective on how translation can play a vital role in the future survival of the planet **The Psychology of Translation** Séverine Hubscher-Davidson, Caroline Lehr, 2022-11-30 Drawing on work from scholars in both psychology and translation studies this collection offers new perspectives on what Holmes 1972 called translation psychology This interdisciplinary volume brings together contributions addressing translation from the vantage point of different applied branches of psychology including critical developmental psychology occupational psychology and forensic psychology Current theoretical and methodological practices in these areas have the potential to strengthen and diversify how translators decision making and problem solving behaviours are understood but many sub branches of psychology have lacked visibility so far in the translation studies literature The Psychology of Translation An Interdisciplinary Approach therefore seeks to expand our understanding of translator behaviour by bringing to the fore new schools of thought and conceptualisations Some chapters report on empirical studies while others provide a review of research in a particular area of psychology of relevance to translation and translators Written by a range of leading figures and authorities in psychology and translation it offers unique contributions that can enrich translation process research and provide a means of encouraging further development in the area of translation psychology This book will be of interest to scholars working at the intersection of translation and psychology in such fields as translation studies affective science narrative psychology and work psychology amongst other areas It will be of particular interest to researchers and postgraduate students in translation studies *The Translator's Visibility* Larisa Cercel, Alice Leal, 2025-05-05 This collection illuminates the epistemological and

philosophical underpinnings of Lawrence Venuti's seminal *The Translator's Invisibility* extending these conversations through a contemporary lens of epistemic justice while also exploring its manifestations and transposing it to different disciplines and contexts. The volume is divided into five parts. The opening chapters provide contemporary foundations and a clear epistemological apparatus to conceptualise the debate on the translator's visibility and explore some of the philosophical underpinnings of the debate. The following chapters offer analysis of some contemporary manifestations and illustrations of the translator's visibility among translators and translation thinkers and restage the debate in diverse contexts such as in European Union identity politics and Chinese Buddhist translation and disciplines such as film studies. A final chapter takes stock of the impact of machine translation to critically reflect on the future of translation and translator studies. This book will be of interest to students and scholars in translation and interpreting studies, philosophy, cultural studies and literary studies as well as the humanities more broadly.
