Craft Of Musical Composition One Theoretical Part:

The Craft of Musical Composition: Theoretical part. English translation by Arthur Mendel Paul Hindemith, 1941 **The Craft of Musical Composition** Paul Hindemith, 2020-10-29 Originally published in the 1940s Paul Hindemith's remarkable textbooks are still the outstanding works of their kind In contrast to many musical textbooks written by academic musicians these were produced by a man who could play every instrument of the orchestra could compose a satisfying piece for almost every kind of ensemble and who was one of the most stimulating teachers of his day It is therefore not surprising that many years later these books should remain essential reading for the student and the professional musician **Analytical Essays on Music by Women Composers** Laurel Parsons, Brenda Ravenscroft, 2016 Analytical Essays on Music by Women Composers Concert Music 1960 2000 is the first to appear in an exciting a four volume series devoted to the work of women composers across Western art music history Featuring rich analyses and detailed study by the most reputed music theorists in the field along with brief biographical sketches for each composer this collection brings to the fore the essential repertoire of a range of important composers many of whom otherwise stand outside the standard canon **A Companion to Boethius in the Middle Ages** Noel Harold Kaylor, Philip Edward Phillips, 2012-05-03 The articles in this volume focus upon Boethius's extant works his *De arithmetica* and a fragmentary *De musica* his translations and commentaries on logic his five theological texts and of course his *Consolation of Philosophy* They examine the effects that Boethian thought has exercised upon the learning of later generations of scholars **A History of Twentieth-Century Music in a Theoretic-Analytical Context** Elliott Antokoletz, 2014-03-14 A History of Twentieth Century Music in a Theoretic Analytical Context is an integrated account of the genres and concepts of twentieth century art music organized topically according to aesthetic stylistic technical and geographic categories and set within the larger political social economic and cultural framework While the organization is topical it is historical within that framework Musical issues interwoven with political cultural and social conditions have had a significant impact on the course of twentieth century musical tendencies and styles The goal of this book is to provide a theoretic analytical basis that will appeal to those instructors who want to incorporate into student learning an analysis of the musical works that have reflected cultural influences on the major musical phenomena of the twentieth century Focusing on the wide variety of theoretical issues spawned by twentieth century music A History of Twentieth Century Music in a Theoretic Analytical Context reflects the theoretical analytical essence of musical structure and design Music in German Philosophy Stefan Lorenz Sorgner, Oliver Furbeth, 2011-01-15 Though many well known German philosophers have devoted considerable attention to music and its aesthetics surprisingly few of their writings on the subject have been translated into English Stefan Lorenz Sorgner a philosopher and Oliver Furbeth a musicologist here fill this important gap for musical scholars and students alike with this compelling guide to the musical discourse of ten of the most important German philosophers from Kant to Adorno Music in German Philosophy includes contributions from a renowned

group of ten scholars including some of today's most prominent German thinkers all of whom are specialists in the writers they treat Each chapter consists of a short biographical sketch of the philosopher concerned a summary of his writings on aesthetics and finally a detailed exploration of his thoughts on music The book is prefaced by the editors original introduction presenting music philosophy in Germany before and after Kant as well as a new introduction and foreword to this English language addition which places contemplations on music by these German philosophers within a broader intellectual climate
