Craft Techniques in Occupational Therapy United States. Department of the Army, 1980      *Crafting Writers, K-6* Elizabeth Hale, 2008 How do we teach elementary students to independently use the different elements of craft that are discussed and taught in lessons We begin by honoring the reality that terms like voice sentence fluency and writing with detail are descriptions of where we want our students to be not next steps on how to reach those goals In *Crafting Writers K 6* Elizabeth Hale shows us how to identify specific elements of craft when assessing student work and planning instruction and use them to teach students the specific craft techniques that will move them forward as writers Liz offers practical information that teachers can use immediately in their classrooms She also presents a concrete process for noticing craft in writing so teachers can develop and plan craft lessons based on their students writing Learning the techniques that make up good writing also allows teachers to see craft in many different levels of writing a skill that is particularly powerful when conferring with below grade level writers Additional chapters look closely at assessment and classroom management practices like group conferring Most of us know good writing when we read it but writing teachers need to know what makes it work Filled with easy to use charts and practical lessons *Crafting Writers K 6* provides clear insight into identifying and teaching the small elements that make good writing successful      Crafting Minoanisation Joanne Elizabeth Cutler, 2021-10-31 The mid second millennium BC material record of the southern Aegean shows evidence of strong Cretan influence This phenomenon has traditionally been seen in terms of Minoanisation but the nature and degree of Cretan influence and the process processes by which it was spread and adopted have been widely debated This new study addresses the question of Minoanisation through a study of the adoption of Cretan technologies in the wider southern Aegean principally weaving technology By the early Late Bronze Age Cretan style discoid loom weights had appeared at a number of settlements across the southern Aegean In most cases this represents not only the adoption of a particular type of loom weight but also the introduction of a new weaving technology the use of the warp weighted loom The evidence for and the implications of the adoption of this new technology is examined Drawing upon recent advances in textile experimental archaeology the types of textiles that are likely to have been produced at a range of sites both on Crete itself and in the wider southern Aegean are discussed and the likely nature and scale of textile production at the various settlements is assessed A consideration of the evidence for the timing and extent of the adoption of Cretan weaving technology in the light of additional evidence for the adoption of other Cretan technologies is used to gain insight into the potential social and economic strategies engaged in by various groups across the southern Aegean as well as the motivations that may have driven the adoption and adaptation of Cretan cultural traits and accompanying behaviors By examining how technological skills and techniques are learned and considering possible mechanisms for the transmission of such technical knowledge and know how new perspectives can be proposed concerning the processes through which Cretan techniques were taken up and imitated
