Front Andrew E. Kersten,2009-03 One of the oldest strongest and largest labor organizations in the U S the American
Federation of Labor AFL had 4 million members in over 20 000 union locals during World War II The AFL played a key role in
wartime production and was a major actor in the contentious relationship between the state organized labor and the working
class in the 1940s The war years are pivotal in the history of American labor but books on the AFL s experiences are scant
with far more on the radical Congress of Industrial Unions CIO Andrew E Kersten closes this gap with *Labor s Home Front*
challenging us to reconsider the AFL and its influence on twentieth century history Kersten details the union s contributions
to wartime labor relations its opposition to the open shop movement divided support for fair employment and equity for
women and African American workers its constant battles with the CIO and its significant efforts to reshape American society
economics and politics after the war Throughout Kersten frames his narrative with an original central theme that despite its
conservative nature the AFL was dramatically transformed during World War II becoming a more powerful progressive force

Wasting Time and Other Management Heresies Howard Pines,2013-03-29 Understanding the basic tenets of

management is certainly important but following the conventional wisdom such as not wasting time is not necessarily the key to solving problems or achieving personal success. Providing advice that goes against that conventional wisdom is exactly what this book is about whether it concerns how to get things done as you move up in a company or how to develop relationships and support both inside and outside an organization. In fact not only is the advice unconventional and in many cases heretical, also too are the subjects covered. For example the importance of validating assumptions is not something you are likely to read about in most business books. But as Howard Pines explains if you don't you are likely to make both embarrassing and sometimes costly errors. Similarly while there are many books that will tell you how to get a job there are virtually no others that explain how to determine the best time and way to leave a job and or a business. In addition even when discussing aspects of business that are covered in other books such as negotiating or dealing with change the author enables you to see those subjects in a way that is both different and helpful. *Wasting Time* does not however provide simple answers. Rather based on the author's fifty years of hands on experience as a human resources executive, successful HR consultant and business owner the book shows how even issues that appear to be straightforward may in reality provide interesting dilemmas that require creative thinking and non traditional approaches if you want to achieve the best solution.

Science and Civilisation in China, Part 1, Paper and Printing Joseph Needham, Tsien Tsuen-Hsuei, 1956-07-11. Part one of the fifth volume of Joseph Needham's great enterprise is written by one of the project's collaborators Professor Tsien Tsuen Hsuei working in regular consultation with Dr Needham has written the most comprehensive account of every aspect of paper and printing in China to be published in the West. From a close study of the vast mass of source material Professor Tsien brings order and illumination to an area of technology which has been of profound importance in the spread of civilisation. The main body of the book is a detailed study of the invention, technology and aesthetic development of printing in China. From the growth and ultimate refinements of early woodcut printing to the spread of printing from movable type and the development of book binding Professor Tsien carries the story forward to the beginning of the nineteenth century when more printed pages existed in Chinese than in all other languages put together. *Bulletin* United States.
