Forgotten Heroes of American Education J. Wesley Null, Diane Ravitch, 2006-01-01 This book is titled *Forgotten Heroes of American Education* because it contains representative writings by significant educators who challenged mainstream thinking The editors of this volume believe that the work of these thoughtful and important educators deserves to be remembered They have been forgotten because in the great pedagogical battles of the twentieth century they lost Time and again they battled with their Progressivist colleagues over the purpose and goals of elementary and secondary education Because they lost the arguments their role as leaders and thinkers was almost completely ignored by historians of education who identified with the winners We think this was a grand mistake To honor the legacy of these eight educators we have written this book and entitled it *Forgotten Heroes of American Education*

Curriculum or Craftsmanship Harry L. Gracey, 1972-07-01 Sociologist Harry L. Gracey spent two years studying an East Coast school system which he calls Brookview and determined that the bureaucratic social structure of schools can have a profound and irreversibly negative effect on the creativity of teachers This volume tells the story of the Wilbur Wright

elementary school in Brookview It examines the relationship between the educational institution as a bureaucracy and the goals of the two main types of teaching orientation found in elementary schools such as Wright The majority of teachers are production oriented They believe that their job is to see that the children in their charge complete as much of the standardized grade level curriculum as possible during the school year They do achieve some success in preparing children for life in a society where bureaucracy is the dominant form of social organization The other significant type of teaching orientation is that of the craftsmen These instructors see their goal as the development of each individual s learning potential with the curriculum built upon the specific needs and interests of each child Bureaucratic school structures do nothing to promote this kind of teaching Any ideas that are at variance with the school s organizational structure will fail The craftsman teachers do not have the time to communicate the standardized programs desired by the school board and also to make use of their own individualistic techniques Further the continued use of the former cancels the effects of the craftsman approach In delineating his conclusions Professor Gracey includes his observations on the community and educational setting of the study the two types of teachers the administration the parents and the children s response to educational organization This study is unique in approaching its educational subject matter from a sociological point of view Professor Gracey intended it as a study of behavior in organizations It should also serve educational goals however and will therefore interest educators and concerned citizens as well as sociologists
