Using the Bowen Technique to Address Complex and Common Conditions

John Wilks, Isobel Knight, 2014-08-21 This book shows how the Bowen technique can be used to treat different conditions including lower back pain frozen shoulder tennis elbow and carpal tunnel hayfever asthma diabetes type 2 migraines stress and tension disorders fibromyalgia and chronic fatigue as well as in palliative care and performance enhancement in sport and dance

Foundations in Craniosacral Biodynamics, Volume Two Franklyn Sills, 2012-12-18 Foundations in Craniosacral Biodynamics presents a comprehensive grounding in the clinical skills needed in a biodynamic approach to craniosacral therapy Author Franklyn Sills places particular emphasis on developing what he terms perceptual skills diagnostic skills that enable the practitioner to perceive the subtle sensations and intuitive insights that are the groundwork of most forms of holistic somatic therapy The biodynamic approach has its origins in the clinical exploration of W G Sutherland DO 1873 1954 the founder of osteopathy in the cranial field and forefather of craniosacral therapy In the last ten years of his life his work changed from a biomechanical approach to a fully holistic orientation toward the ordering and enlivening forces present in the human system Sutherland described his experiences of a mysterious presence the Breath of Life from which ordering forces and healing intentions arose His work then shifted from biomechanics to biodynamics from analysis and motion testing to an appreciation of the unfolding of the inherent treatment plan Sutherland encouraged practitioners to use no outside force whatsoever but to allow the inherent ordering forces which he called potency to make the decisions and do the work Franklyn Sills pioneered the biodynamic approach to craniosacral therapy outside the osteopathic profession This approach has now spread around the world in various forms Sills wrote the early books in this field and this new book now brings the text up to date Foundations in Craniosacral Therapy Volume Two expands on the work described in the previous volume starting with an overview of a biodynamic approach to craniosacral therapy which emphasizes the suspensory nature of the human system Here we review and deepen our understanding of the three bodies the physical fluid and tidal bodies We also review and expand upon the suspensory nature of the holistic shift the physical body suspended in the fluid body in turn suspended in the tidal body within the context of the inherent treatment plan The following chapters of the book orient to our earliest life experiences the embryonic period and the pre and perinatal experience with chapters devoted to birth birth dynamics and craniosacral approaches oriented both to birth trauma and to the tissue patterns it generates Here we orient to the pre-nate and birthing infant as a sentient being having and responding to life experience Further chapters orient to the primal notochord midline and the tissue structures that form around it We explore the dynamics of the pelvis vertebral axis cranial base face and hard palate Volume Two finishes with four important chapters on the neurophysiology of stress and trauma and related craniosacral and verbal skills All chapters include appropriate biodynamic approaches to traumatization and CNS activation

Trauma Therapy And Clinical Practice: Neuroscience, Gestalt And The Body Taylor, Miriam, 2014-03-01 This book weaves together the experience of trauma

neuroscience and Gestalt theory and applies these to clients *The Breath of Life* Cherionna Menzam-Sills, PhD,2018-04-17
A unique approach to Biodynamic Craniosacral Therapy a whole body healing therapy focused on working with the forces underlying health and healing Cherionna Menzam Sills draws on her extensive background in pre and perinatal psychology embryology bodywork Continuum Movement and other somatic therapies as well as years of working with her husband Biodynamics pioneer Franklyn Sills to present this accessible introduction to the meditative healing practice of Biodynamic Craniosacral Therapy BCST This book offers a personal journey of embodied inquiry into each element of biodynamic session work using meditative explorations personal descriptions and illustrations to convey the essence of Biodynamics It emphasizes breathing and body awareness exercises that help the practitioner become more attuned to her own body so that she can create an effective relational field with her client An essential guide for new practitioners students and clients as well as a valuable reference for experienced practitioners this book illuminates the path toward the intelligent formative forces of the mysterious presence called the breath of life and its transformative power for health and wholeness

Breathing, Mudras and Meridians Bill Harvey,2021-07-22 The word embodied is one of those terms such as grounded or centered that can be discussed forever without being experienced Defining embodiment though can be quite tricky because much of what is taught in western societies about the body devalues the felt experience The categories of formal learning particularly anatomy and physiology are taught with the fundamental source being cadavers dead bodies and conceptualizations that do not include our own vitality or life force Without the felt experience embodiment is just another concept that can be discussed ad nauseum The felt experience or phenomenology in academic speak is the path away from these endless discussions and conceptual befuddlement This book provides a basic training on how to become aware of our physiological functioning and our sense of vitality A part of this training comes from becoming hyper aware of how we breathe This awareness makes it possible to feel our own organs and how they function and interrelate To help us refine our awarenesses of our own organs we are entirely fortunate to learn and practice methods developed over thousands of years by Indian and Chinese cultures With these fundamentals this book leads us through a series of connected experiences using mudras to feel our organs the flows of our life force Qi and the flow of that life force through our meridians From that we learn to feel our own chakras and sushumna central channel and our ability to perceive our connections with our environment and ecosystem This then provides the basis for a body sense of our spiritual existence and development Thus the definition of embodiment evolves into deeper awareness within our bodies and deeper connection to the world

Cranial Intelligence Ged Sumner,Steve Haines,2011-01-15 This new and important textbook demystifies the biodynamic approach to craniosacral therapy and shows how and why it can be so effective at bringing about a natural realignment towards optimal health The authors describe how to respond appropriately to each client s system and how to support deep felt and lasting change in patients **Being and Becoming** Franklyn Sills,2008-09-23 Being and Becoming is

a wide ranging analysis of the nature of being and selfhood The book presents an original integrated paradigm with the aim of creating a comprehensive overview of the human condition and finding ways to alleviate suffering In essence the book explores the question What does it mean to be Being and Becoming begins with fresh interpretations of the work of Martin Heidegger and Buddhist Taoist and Christian writings as they relate to this question Most of Being and Becoming however is about the nature of self and selfhood as a process of I am this my becoming rather than my being Author Franklyn Sills interweaves concepts from object relations theories psychodynamics pre and perinatal psychology and Buddhist self psychology along with his own rich experience as a Buddhist monk somatic therapist and psychotherapist into his inquiry The works of Fairbairn and Winnicott are discussed in depth as are Winnicott and Stern s insights into the nature of the early holding environment the infant mother relational field and early perceptual dynamics A thoughtful guide for psychologists therapists counselors and other health professionals the book is also ideal for Buddhists and anyone looking for alternative therapy models

Consciousness, Bioenergy and Healing Daniel J. Craniosacral Therapy and the Energetic Body Roger Gilchrist, 2006-08-11. This useful book discusses craniosacral therapy's history and present situation as well as its spiritual implications and practical contributions in the world of healthcare. Gilchrist demonstrates how the subtle patterns of this practice become a dynamic force in the body and how this influences overall functioning. What most sets the book apart is Gilchrist's discussion of the relationship of the craniosacral system and biodynamic functions to the human energy system. Though dealing with a complicated topic, the book provides a grounded progressive approach that is both specific and insightful.

El aliento de vida Cherionna Menzam-Sills, El Aliento de Vida habla del descenso de la Vida a la forma y al cuerpo de cómo la vida omnipresente nos conforma y nos sostiene y de cómo esa misma Vida puede sanar las huellas e improntas que las experiencias van dejando en nuestro cuerpo. Habla de cómo la Vida nos envuelve y nos respira de cómo nos mece en sus campos. Cherionna Menzam Sills describe esta gran Inteligencia que genera y organiza nuestra salud, el Aliento de Vida que pulsa en nuestros tejidos y fluidos corporales uniéndonos a la totalidad de la existencia. Con esta obra, la autora nos da la bienvenida a este dinámico e interesante campo que ahonda en nuestro ser más esencial. Este libro es una importante contribución al campo de la Biodinámica Craneosacral en la que se articulan con gran belleza los principios clave de la disciplina desde una perspectiva femenina. La autora nos lleva al corazón del trabajo con un planteamiento personal y sentido que profundiza y complementa su clara exposición de las bases teóricas. Nos ofrece sus comprensiones extraídas de numerosos años de experiencia clínica y los entreteje con ejercicios prácticos para proporcionar al lector una vivencia directa de este trabajo.
