Casting the First Stone A. L. White, 2010-04-06 **Associated Press Coverage of a Major Disaster** Thomas Fensch, 2015-07-16 Originally published in 1989 This diary of a news event looks at how the reporting happened as spread by the news wire system of the Associated Press service in America Analysing the flow of information in this detailed way this book presents how a major disaster a fast moving story with considerable spin was fed out to the press via the Dallas bureau in 1988 Introductory chapters outline the workings of a press bureau office during a major story and present interview sections with key reporters on the story about how their role unfolded Sidebar commentary alongside the reproductions of the news wires organised by date and time adds interesting discussion throughout the book while a conclusion evaluates the coverage of the story The Appendices include reproductions of Texas newspapers resulting pages about the crash This is a fascinating case study of the dissemination of news date before the internet compiled at a time when computers were just large enough to retain in memory all stories relating to event X in order for this kind of analysis to be attempted

Freakshow Jon Dovey, 2000-07-20 True confessions fake films and docu soaps in the last ten years factual television has been transformed by an explosion of new genres Freakshow offers a serious look at reality TV in an attempt to understand the mass media s fascination with intimacy deviancy and horror Jon Dovey analyses reality TV in terms of the political economy of the mass media He investigates the relationship between confessional television and our modern understanding of culture and identity Is our fascination with the personal the only meaningful response to the complexity of our own lives

Are the politics of the self the only alternative to the defunct grand narratives of yesterday In concentrating not on the reception of these new television forms but on the choices models and agendas which inform their production Dovey reveals the relationships between social anxieties economic pressures and their specific inflections in media texts In a critical analysis of media industry practice Dovey asks why directors can't stay out of range of their own cameras and what is the role of the television of intimacy within broadcasting

Chinook Crash Stuart Campbell, 2004-08-04 The 1994 crash of Chinook with top Northern Ireland intelligence experts on board into the Mull of Kintyre has remained the source of intense speculation ever since The book is not only a full account of the incident and the subsequent on going controversy over blame but also attempts to solve the mystery about this accident After the accounts of those who witnessed the crash or communicated with the aircraft on its fateful journey the book analyses the activities of the crew on the day in question including the maintenance record and the behaviour of the aircraft This book will largely justify the claim of the RAF hierarchy that the cause was gross negligence by the crew but not for the reason they give

Wreck Recovery In Britain Peter J Moran, 2018-10-30 Whereas on the Continent the Missing Research and Enquiry Unit left no stone unturned to try to trace the thousands of airmen who still remained missing strangely enough no similar operation was carried out by the RAF on crash sites in the United Kingdom Many of these still contained the mortal remains of pilots whose names had been added to the Memorial to the Missing unveiled at Runnymede in 1953 It is difficult to understand today how it took so long for the realization to sink in that aircraft wreckage still remained buried When it did there followed what can only be described as an unholy scramble to find crash sites and dig them up heavy plant being employed to make it easier and quicker At the height of this unfettered exploration period during the 1970s there were over 30 aviation archaeology groups at work particularly in the counties of Essex Kent and Sussex

Unrecovered human remains were now being found which understandably raised criticism from some quarters. Inevitably order had to be restored and the Ministry of Defence stepped in with a code of conduct for digging up crashed aircraft a measure that was reinforced by an Act of Parliament in 1986. Thereafter a process was introduced whereby the Ministry issued licenses before a wreck site could be excavated and every license application whether granted or refused is listed for the first time in this book.

The Extraordinary Banana Tree Jim Farrell, 2015-07-16 The Extraordinary Banana Tree is not a war story. It is a love story in the time of war. It is the story of the developing love between Cheryl Flynn, Assistant Chief of Intelligence for the Defense Attaches Office in Saigon, and Billy Dobson, Manager of Flight Operations for Air America in Vietnam and Cambodia. The story opens on April 4, 1975, with Cheryl boarding the giant C5A sent by Gerry Ford to rescue orphans from South Vietnam. The plane crashed 13 miles south of Saigon. Does Cheryl survive? Does anyone survive? The story goes back in time and follows Cheryl and Billy on their paths to April 4 and to the eventual fall of Saigon on April 30, 1975. Does Billy have to face the last month alone or will Cheryl be at his side? The story follows Billy from the seminary to the Army where he serves as Counterintelligence Officer for the 11th Armored Cav sent into Cambodia by President Nixon and eventually to Air America and his meeting with Cheryl Flynn at Nha Trang paradise on the South China Sea. The story exemplifies the horrors of the war, the resilience of the human spirit, the bravery and unbelievable accomplishments of Air America personnel, and the power of love to make it all worthwhile. You will laugh, you will cry, you will love Cheryl and Billy. A very appropriate book for the 40th anniversary of the Fall of Saigon.

[Human Factors and Design](#) Yuri Spirochkin, 2023-02-27 This book describes various manifestations of human factors when interacting with potentially dangerous technical systems: airplanes, launch vehicles, and spaceships; nuclear power plants; energy-saturated ground vehicles and infrastructure facilities. The idea of the book arose from the desire to find a common ground between industries that are important for safety. Their similarity lies in addition to the technological advancement of products and solutions in equally high safety requirements, in particular taking into account the influence of human factor. Thus, it is of relevance to analyze an impact of human factor in the context of safety. The matter is rather complex on the one hand: humans manage technical systems; on the other hand, human errors, negligence, or evil intentions can turn the system into a threat with disastrous consequences. However, human interaction with any technical system begins earlier in the design stage. In this stage, designer, being creator of the system, must ensure a safe operation and take into consideration possible risks, including those caused by human factors itself. The book is interdisciplinary in nature and intended mainly for designers of technical systems aiming to assist the specialists in understanding the issues of human participation in life cycle of these systems.
