Resources in Education ,2001-10 Inside Stories Kathleen B. deMarrais, 2012-12-06 Although articles reporting research studies are helpful in acquainting students with methodological approaches they often make the process look so straightforward clean and effortless It is rare to find an article that tells the real story behind the finished product By having real researchers tell their own stories of mucking around with methodological and ethical issues in qualitative research we get a more realistic human story of the process This is a collection of such stories Authors were asked to describe their own experiences with methodological and ethical struggles as they engaged in their work Each of the essays offers insight into the research approach used as well as particular issues which became apparent during the research process Key issues raised by the authors include early learnings gaining entry overlapping conflicting roles and the boundaries of these roles differential power relationships who tells the story and whose story is told ethical concerns related to confidentiality and the influence of a researcher s particular philosophy or theoretical framework on his or her research Throughout the book we see scholars whose personal stories or autobiographies intersect closely with their research projects deMarrais introduces a unique framework to help students gain an overview of qualitative research methods and the underpinnings and processes in these approaches This framework is centered on the ways we understand phenomena using qualitative research approaches that engage archival knowledge narrative knowledge or observational knowledge *From the Capital to the Classroom:*

Kannapel,Lola Aagaard,Pamelia Coe,Cynthia A. Reeves,2000 From 1990 to 2000 a qualitative study of the implementation of the Kentucky Education Reform Act KERA was conducted in four small rural school districts in Kentucky KERA reflects key components of what would later be termed systemic reform a unifying set of goals that all students must attain a coherent system of instructional guidance and a restructured governance system In addition KERA has other components such as the ungraded primary program This book presents findings from the second phase of the 10 year study focusing on the effects of KERA on curriculum instruction and student learning in six elementary schools in the four districts In all six schools student achievement improved but in five schools teachers focused more on improving whole school performance on achievement measures than on improving the learning of each student and had difficulty raising their expectations for low income and minority children KERA reforms increased classroom writing the variety of instructional strategies integration of subject matter classroom computer use and open ended response and portfolio items for classroom assessment However teachers had difficulty moving beyond a teacher directed approach and only a few integrated technology effectively into the curriculum Testing for accountability became the focus of the assessment system and the KERA goal of continuous performance based student evaluation was neglected School based decision making councils did not make most key decisions as intended by KERA The findings also note the importance of school leadership accountability goals and the need for more time for teachers in meeting school professional development Ten appendices present KERA goals dissemination efforts data collection and research questions for both phases of the study interview protocols and characteristics of parents students and community members interviewed Contains 151 references TD **American Book Publishing Record** ,1996-05 **EL-HI**
