Creation Discovery:

Creative Strategy Chris Bilton, Stephen Cummings, 2010-04-26 People tend to think of creativity and strategy as opposites This book argues that they are far more similar than we might expect More than this actively aligning creative and strategic thinking in any enterprise can enable more effective innovation entrepreneurship leadership and organizing for the future By considering strategy as a creative process and vice versa the authors define creative strategy as a mindset which switches between opposing processes and characteristics and which drives every aspect of the business The authors draw experiences and cases from across this false divide from the music industry sports fashion Shakespearean theatre companies creative and media organizations and dance as well as what we might regard as more mundane providers of mainstream products and services to uncover the creative connections behind successful strategy Creative Strategy is a talisman for those looking to take a new path Matt Hardisty Strategy Director Mother Advertising It has been said that business is a hybrid of dancing and calculation the former incorporating the creative within a firm the latter the strategic Bilton and Cummings show how these apparently contradictory processes can be integrated Their insights about how firms can create to strategize and strategize to create are informative for managers and management scholars alike Jay Barney Professor and Chase Chair of Strategic Management Fisher College of Business The Ohio State University In today's world new thinking creativity is required to tackle long standing problems or address new opportunities The trouble is few organizations understand how to foster and apply creativity at least in any consistent manner This book provides new insights into just how that can be done It moves creativity from being just the occasional and fortuitous flash of inspiration to being an embedded feature of the way the organization is run Sir George Cox Author of the Cox Review of Creativity in Business for HM Govt Past Chair of the Design Council The Habitual Entrepreneur Paul Westhead, Mike Wright, 2016-10-04 Increasingly entrepreneurship research recognizes a wide variety in entrepreneurial behaviour One such difference is marked between experienced or habitual entrepreneurs and novices This book authored by established experts in the field introduces and explores the habitual entrepreneur phenomenon Building upon an international body of research the authors analyse business behaviour to demonstrate how experience relates to the performance of new ventures In employing a range of methodological techniques the authors provide insight into how prior business ownership experience produces different outcomes when it comes to the key success factors associated with entrepreneurial ventures With detailed coverage of finance networking opportunity discovery and learning the book is a uniquely comprehensive resource This concise book is a complete research guide which provides an introduction for advanced students and researchers of entrepreneurship worldwide **Scientific Government and Self-government** Rolf A. F. Witzsche, 2003 **Interpreting Bodies** Elena Castellani, 2020-12-08 Bewildering features of modern physics such as relativistic space time structure and the peculiarities of so called quantum statistics challenge traditional ways of conceiving of objects in space and time Interpreting Bodies

brings together essays by leading philosophers and scientists to provide a unique overview of the implications of such physical theories for questions about the nature of objects The collection combines classic articles by Max Born Werner Heisenberg Hans Reichenbach and Erwin Schrodinger with recent contributions including several papers that have never before been published The book focuses on the microphysical objects that are at the heart of quantum physics and addresses issues central to both the foundational and the philosophical debates about objects Contributors explore three subjects in particular how to identify a physical object as an individual the notion of invariance with respect to determining what objects are or could be and how to relate objective and measurable properties to a physical entity The papers cover traditional philosophical topics common sense questions and technical matters in a consistently clear and rigorous fashion illuminating some of the most perplexing problems in modern physics and the philosophy of science The contributors are Diederik Aerts Max Born Elena Castellani Maria Luisa Dalla Chiara Bas C van Fraassen Steven French Gian Carlo Ghirardi Roberto Giuntini Werner Heisenberg Decio Krause David Lewis Tim Maudlin Peter Mittelstaedt Giulio Peruzzi Hans Reichenbach Erwin Schrodinger Paul Teller and Giuliano Toraldo di Francia Entrepreneurial Decision-making Veronica

Gustafsson,2006-01-01 This fascinating book aims to provide a deeper understanding of the decision making processes of entrepreneurs This is achieved via a comparison of entrepreneurial individuals with different levels of expertise in contexts with varying degrees of potential for entrepreneurial success This multidisciplinary study is based on entrepreneurship theory and empirical research as well as cognitive psychology The cognitive perspective provides a link between the entrepreneur and new business creation by focusing on an individual s cognitive behaviour rather than on their personality traits The essential issues of gathering and application of knowledge and expertise are also addressed one of the most important implications of the study is that successful entrepreneurial decision making behaviour can actually be taught and learned The book concludes however that the provision of optimal teaching methods of this decision making behaviour is a stiff challenge faced by entrepreneurship education Presenting a novel combination of cognitive psychology and entrepreneurship theory with important practical implications this book will strongly appeal to those involved in the study of entrepreneurship and cognitive psychology and business and management Entrepreneurs themselves will also find much to interest them in this book Charles Taylor, Michael Polanyi and the Critique of Modernity Charles W. Lowney

II,2017-12-15 This book provides a timely compelling multidisciplinary critique of the largely tacit set of assumptions funding Modernity in the West A partnership between Michael Polanyi and Charles Taylor s thought promises to cast the errors of the past in a new light to graciously show how these errors can be amended and to provide a specific cartography of how we can responsibly and meaningfully explore new possibilities for ethics political society and religion in a post modern modernity

Einstein Meets Magritte An Interdisciplinary Reflection presents insights of the renowned key speakers of the interdisciplinary Einstein meets Magritte conference 1995 Brussels Free University The contributions elaborate on fundamental questions of science with regard to the contemporary world and push beyond the borders of traditional approaches All of the articles in this volume address this fundamental theme but somewhere along the road the volume expanded to become much more than a mere expression of the conference s dynamics The articles not only deal with several scientific disciplines they also confront these fields with the full spectrum of contemporary life and become new science As such this volume presents a state of the art reflection of science in the world today in all its diversity The contributions are accessible to a large audience of scientists students educators and everyone who wants to keep up with science today

Process Theories Johanna Seibt,2011-06-27 Processes constitute the world of human experience from nature to cognition to social reality Yet our philosophical and scientific theories of nature and experience have traditionally prioritized concepts for static objects and structures The essays collected here call for a review of the role of dynamic categories in the language of theories They present old and new descriptive tools for the modelling of dynamic domains and argue for the merits of process based explanations in ontology cognitive science semiotics linguistics philosophy of mind robotics theoretical biology music theory and philosophy of chemistry and physics The collection is of interest to professional researchers in any of these fields it establishes for the very first time crossdisciplinary contact among recent process based research movements and might witness a conceptual paradigm shift in the making

Drug Repurposing David Cavalla,2022-01-31 Drug repurposing is the development of existing drugs for new uses given that 9 in 10 drugs that enter drug development are never marketed and therefore represent wasted effort it is an attractive as well as inherently more efficient process Three repurposed drugs can be brought to market for the same cost as one new chemical entity and they can also be identified more quickly an important benefit for patients whose diseases are progressing faster than therapeutic innovation But repurposing also requires a fresh look at configuring pharmaceutical R a holistic gedanken experiment almost needs to be undertaken at the very start of any repurposing development In addition to new ways of thinking the discovery of repurposing opportunities can take advantage of artificial intelligence techniques to match the perfect new use for an existing drug And while repurposing of medicines has been in the mind of every doctor since Hypocrates modern clinical practice will simply have to adapt to new repurposing techniques in an age where the number of known diseases is increasing much faster than the healthcare dollars available
