Hymowitz, 2008-06-30 Children today grow up so fast How often we hear those words uttered both in frustrated good humor and in dumbfounded astonishment Every day the American people hear about kids doing things both good and bad that were once thought to be well beyond their scope flying airplanes running companies committing mass murder Creatures of the information age today s children sometimes seem to know more than their parents They surf the Internet rather than read books they watch South Park instead of The Cosby Show they wear form fitting capri pants and tank tops instead of sundresses in short they are sophisticated beyond their years These facts lead us to wonder Is childhood becoming extinct In *Ready or Not* Kay S Hymowitz offers a startling new interpretation of what makes our children tick and where the moral anomie of today s children comes from She reveals how our ideas about childrearing itself have been transformed perniciously in reponse to the theories of various experts educators psychologists lawyers media executives who have encouraged us to view children as small adults autonomous actors who know what is best for themselves and who have no need for adult instruction or supervision Today s children and teenagers have been encouraged by their parents and teachers to function as individuals to such an extent that they make practically every decision on their own what to wear what to study and even what values they will adhere to The idea of childhood as a time of limited competence in which adults prepare the young for maturity has fallen into disrepute independence has become not the reward of time but rather something that our

children have come to expect and demand at increasingly younger ages One of the great ironies of turning our children into small adults is that American society has become less successful at producing truly mature men and women When sophisticated children do grow up they often find themselves unable to accept real adult responsibilities Thus we see more people in their twenties and thirties living like children unwilling to embark on careers or to start families Until we recognize that children are different from grownups and need to be nurtured as such Hymowitz argues our society will be hollow at its core

**The American Paradox** David G. Myers, 2008-10-01 DIV For Americans entering the twenty first century it is the best of times and the worst of times Material wealth is at record levels yet disturbing social problems reflect a deep spiritual poverty In this compelling book well known social psychologist David G Myers asks how this paradox has come to be and more important how we can spark social renewal and dream a new American dream Myers explores the research on social ills from the 1960s through the 1990s and concludes that the materialism and radical individualism of this period have cost us dearly imperiling our children corroding general civility and diminishing our happiness However in the voices of public figures and ordinary citizens he now hears a spirit of optimism The national dialogue is shifting away from the expansion of personal rights and toward enhancement of communal civility away from efforts to raise self esteem and toward attempts to arouse social responsibility away from whose values and toward our values Myers analyzes in detail the research on educational and other programs that deal with social problems explaining which seem to work and why He then offers positive and well reasoned advice suggesting that a renewed social ecology for America will rest on policies that balance me thinking with we thinking div
