Aging and the Art of Living Jan Baars, 2012-10-01 Baars explores philosophers from Plato to Foucault as they consider the meaning of aging and wisdom in our society In this deeply considered meditation on aging in Western culture Jan Baars argues that in today s world living longer does not necessarily mean living better He contends that there has been an overall loss of respect for aging to the point that understanding and dealing with aging people has become a process focused on the decline of potential and the advance of disease rather than on the accumulation of wisdom and the creation of new skills To make his case Baars compares and contrasts the works of such modern era thinkers as Foucault Heidegger and Husserl with the thought of Plato Aristotle Sophocles Cicero and other Ancient and Stoic philosophers He shows how people in the classical period less able to control health hazards had a far better sense of the provisional nature of living which led to a philosophical and religious emphasis

on cultivating the art of living and the idea of wisdom This is not to say that modern society's assessments of aging are insignificant but they do need to balance an emphasis on the measuring of age with the concept of living in time Gerontologists philosophers and students will find Baars discussion to be a powerful perceptive conversation starter
