## **Craft Architects:**

**The Craft Architects** Margaret Richardson, 1983      Craft Theory and Contemporary Architecture Grant

Alford, 2025-05-28 This book offers a comprehensive exploration of craft theory in relation to contemporary architecture. Craft is an old and familiar idea but the line between craft and art or craft and mere manufacturing for example is notoriously hard to describe. In architecture a similarly blurred line between the design process on the one hand and the physical making of buildings on the other lies at the center of various debates about what it means to do architecture. The growth and development of craft theory in recent years suggest new insights into these architectural debates but situating the meaning of craft within architecture within today's technological landscape is a complex problem. Alford responds to this challenge by collecting various narratives from craft theory and other fields and discerning among them new lenses through which to view contemporary architectural practice. Episodes from this expanded view of craft in architecture go beyond predictable accounts of Ruskin and Morris to envision new models of practice, new ways of engaging other building professionals and new ways for architects to understand their own labor and the nature of how and what kinds of things they themselves craft. Architecture is changing and within the ongoing story of craft explored in this book are new and surprising ways to understand design and construct the built environment. Written for students and scholars, this book challenges and extends the legacy of craft thinking in architecture.

Modern Architecture Graham Livesey, 2024-11-15 Modern Architecture The Basics examines technological, stylistic, socio-political and cultural changes that have transformed the history of architecture since the late 18th century. Broad definitions of modernity and postmodernity introduce the book, which comprises 24 short thematic chapters looking at the concepts behind the development of modern and postmodern architecture. These include major historical movements, key figures and evolving building typologies. There is also an emphasis on the changing city during the 19th and 20th centuries. Approaches to representation and its impacts on architecture are studied along with the changing global role of architecture as cultural expression. The book introduces new topics including gender, race, postcolonialism and indigeneity. An undaunting, contemporary and inclusive account of modern architectural history, this is a must-read for all students of architecture as well as those outside the discipline approaching the subject for the first time.

**Arts and Crafts Architecture** Maureen Meister, 2014-11-04 This book offers the first full-scale examination of the architecture associated with the Arts and Crafts movement that spread throughout New England at the turn of the twentieth century. Although interest in the Arts and Crafts movement has grown since the 1970s, the literature on New England has focused on craft production. Meister traces the history of the movement from its origins in mid-nineteenth-century England to its arrival in the United States and describes how Boston architects including H. H. Richardson embraced its tenets in the 1870s and 1880s. She then turns to the next generation of designers, examining buildings by twelve of the region's most prominent architects: eleven men and a woman who assumed leadership roles in the Society of Arts and Crafts founded in

Boston in 1897 Among them are Ralph Adams Cram Lois Lilley Howe Charles Maginnis and H Langford Warren They promoted designs based on historical precedent and the region s heritage while encouraging well executed ornament Meister also discusses revered cultural personalities who influenced the architects notably Ralph Waldo Emerson and art historian Charles Eliot Norton as well as contemporaries who shared their concerns such as Louis Brandeis Conservative though the architects were in the styles they favored they also were forward looking blending Arts and Crafts values with Progressive Era idealism Open to new materials and building types they made lasting contributions with many of their designs now landmarks honored in cities and towns across New England Architecture, Craft, and Culture John Tuomey,2004 **The Architect in Practice** David Chappell,Andrew Willis,2013-02-05 The Architect in Practice was first published in 1952 Originally written by a quantity surveyor and an architect it has remained through its nine editions a leading textbook used in the education of architects world wide While the format of the book has developed the message and philosophy remains the same as the original to provide the student of architecture and the young practitioner with a readable guide to the profession outlining an architect s duties to client and contractor the key aspects of running a building contract and the essentials of management finance and drawing office procedure The tenth edition follows in that tradition The authors still an architect and a quantity surveyor have brought the text fully up to date Major revisions in this edition include Revised sections on Planning and the Building Regulations Changes to the education of architects in the UK have been detailed Discussion of the new ARB Architects Code Standards of Professional Conduct and Practice which came into force in January 2010 The commentary on the RIBA Standard Form for the Appointment of an Architect 1999 SFA 99 has been updated The latest RIBA Standard Agreement 2010 S 10 A is now discussed All references to JCT contracts have been updated to refer to the latest revisions of the 2005 suite of contracts Now also includes reference to education registration and CPD requirements of the Royal Institute of the Architects of Ireland The tenth edition of The Architect in Practice will continue to provide the guidance and advice all students and practising architects need in the course of their studies and in their profession *MotorBoating* ,1927-01 **Japanese Architecture as a Collaborative Process** Dana Buntrock,2014-09-04 Architects throughout the world hold Japan s best architecture in high regard considering the country s buildings among the world s most carefully crafted and innovative While many books magazines and exhibitions have focused on the results of architectural practice in Japan this book is the first to explain the reasons for Japan s remarkable structures Architecture does not occur in isolation Japan s architects are able to collaborate with a wide variety of people from professional consultants to constructors Dana Buntrock discusses architecture as a part of the construction community moving from historical precedents that predate the emergence of the architectural profession in Japan through to contemporary practices *Knowledge Sharing in Professions* Alexander Styhre,2016-04-22 No professional is an island Despite their capacity to monopolize and erect entry barriers in terms of either formal credentials or membership of certain organizations professionalism is inextricably bound up with

collective accomplishments on a day to day basis and the capacity to share all the resources that constitute the professional domain of expertise Knowledge Sharing in Professions looks at professionalism as a form of systematic and institutionalized knowledge sharing It analyses professionalism through the everyday practices in professional communities and the organizations where they work Three empirical studies of pharmaceutical clinical trials researchers management consultants and architects are presented serving to illustrate the relational nature of these and other professions and how members of professional communities are constantly exchanging data information and know how in their everyday work Alexander Styhre seeks to understand the role of professions and other forms of experts in contemporary society on the basis of complementary perspectives that is to say the communal and collegial nature of professional work This book represents a valuable contribution both to the sociological literature on professions and the business orientated literature on knowledge management and should promote further new research on professionalism
