Crazy Lyonnais:

Free to Fail Arjen van Witteloostuijn, Hugh C. van der Mandele, 2013-01-01 This challenging book tackles one of the most fundamental questions in economics Why are commercial organizations more efficient than organizations in the public domain It is generally accepted that the traditional answer the fact that commercial organizations maximize profits does not necessarily hold true Finding a solution to this anomaly as this book attempts to do should therefore be a prime concern in economics The authors believe the answer lies in the fact that even in a completely stable environment all organizations will eventually fail irreparably Organizations operating in the market are more efficient because once in decline they are free to fail and allowed to be disassembled or even replaced Public organizations that fail are more often than not protected and allowed to continue even though their efficiency is questionable This fascinating and thought provoking book will provide a stimulating read for academics and students with an interest in economics business and management and public policy
