Created From Animals The Moral Implications Of Darwinism:

Created from Animals James Rachels, 1991 Western philosophy and religion James Rachels argues have been shaken by the implications of Darwin's work most notably the controversial idea that humans are simply a more complex kind of animal Here Rachels assesses a number of studies that suggest how closely humans are linked to other primates in behavior and then goes on to show how this idea undercuts the work of many prominent philosophers Created from Animals offers a provocative look at how Darwinian evolution undermines many tenets of traditional philosophy and religion Rachels begins by examining Darwin's own life and work presenting an astonishingly vivid and compressed biography We see Darwin's studies of the psychological links in evolution such as emotions in dogs and the mental powers of worms and how he addressed the moral implications of his work especially in his concern for the welfare of animals Rachels goes on to present a lively and accessible survey of the controversies that followed in Darwin's wake ranging from Herbert Spencer's Social Darwinism to Edward O Wilson's sociobiology and discusses how the work of such influential intellectuals as Descartes Hume Kant T H Huxley Henri Bergson B F Skinner and Stephen Jay Gould has contributed to or been overthrown by evolutionary science With this sweeping survey of the arguments the philosophers and the deep implications surrounding Darwinism Rachels lays the foundations for a new view of morality Virbrantly written and provocatively argued Created from Animals offers a new perspective on issues ranging from suicide to euthanasia to animal rights [The Oxford Handbook of Animal Ethics](#) Tom L. Beauchamp, R.G. Frey, 2011-11-17 This text is designed to capture the nature of the questions as they stand today and to propose solutions to many of the major problems in the ethics of how we use animals **The Feminist Care Tradition in Animal Ethics** Josephine Donovan, Carol J. Adams, 2007 In Beyond Animal Rights Josephine Donovan and Carol J Adams introduced feminist ethic of care theory into philosophical discussions of the treatment of animals In this new volume seven essays from Beyond Animal Rights are joined by nine new articles most of which were written in response to that book and a new introduction that situates feminist animal care theory within feminist theory and the larger debate over animal rights Contributors critique theorists reliance on natural rights doctrine and utilitarianism which they suggest have a masculine bias They argue for ethical attentiveness and sympathy in our relationships with animals and propose a link between the continuing subjugation of women and the human domination of nature Beginning with the earliest articulation of the idea in the mid 1980s and continuing to the theory's most recent revisions this volume presents the most complete portrait of the evolution of the feminist care tradition [After Darwin: Animals, Emotions, and the Mind](#) Angelique Richardson, 2013-11-10 What is emotion pondered the young Charles Darwin in his notebooks How were the emotions to be placed in an evolutionary framework And what light might they shed on human animal continuities These were among the questions Darwin explored in his research assisted both by an acute sense of observation and an extraordinary capacity for fellow feeling not only with humans but with all animal life After Darwin Animals Emotions and the Mind explores questions

of mind emotion and the moral sense which Darwin opened up through his research on the physical expression of emotions and the human animal relation It also examines the extent to which Darwin s ideas were taken up by Victorian writers and popular culture from George Eliot to the Daily News Bringing together scholars from biology literature history psychology psychiatry and paediatrics the volume provides an invaluable reassessment of Darwin s contribution to a new understanding of the moral sense and emotional life and considers the urgent scientific and ethical implications of his ideas today

Catholic Moral Philosophy in Practice & Theory Bernard G. Prusak,2016 **Fugitive Poses** Gerald Robert Vizenor,2000-01-01 Native sovereignty Gerald Vizenor contends is not possessed but expressed It emerges not from practicing vengeful and exclusionary policies and politics or by simple recourse to territoriality but by turning to Native transmotion the forces and processes of creativity and imagination lying at the heart of Native world views and actions Overturning long held scholarly and popular assumptions Vizenor offers a vigorous examination of tragic cultures and victimry

Logic and Philosophy of Science in Uppsala D. Prawitz,Dag Westerståhl,2013-06-29 The International Congresses of Logic Methodology and Philosophy of Science which are held every fourth year give a cross section of ongoing research in logic and philosophy of science Both the invited lectures and the many contributed papers are conducive to this end At the 9th Congress held in Uppsala in 1991 there were 54 invited lectures and around 650 contributed papers divided into 15 different sections Some of the speakers who presented contributed papers that attracted special interest were invited to submit their papers for publication and the result is the present volume A few papers appear here more or less as they were presented at the Congress whereas others are expansions or elaborations of the talks given at the Congress A selection of this kind containing 38 papers drawn from the 650 contributed papers presented at the Uppsala Congress cannot do justice to all facets of the field as it appeared at the Congress But it should allow the reader to get a representative survey of contemporary research in large areas of philosophical logic and philosophy of science About half of the papers of the volume appear in sections listed at the Congress under the heading Philosophical and Foundational Problems about the Sciences The section Foundations of Logic Mathematics and Computer Science is represented by three papers Foundations of Physical Sciences by six papers Foundations of Biological Sciences by three papers Foundations of Cognitive Science and AI by one paper and Foundations of Linguistics by three papers

Creation, Evolution, and the Handicapped: Pastor Richard Luther Corwin, 2016-02-03 The author shows that evolution is not a logical theory It is self contradicting self fulfilling dogmatic and simply scientism cloaked in the guise of a first century religion The evolutionary hypothesis is detrimental to operational science and only the biblical worldview sustains the preconditions for intelligibility sufficient to sustain empirical science If evolutionary dogma is followed to its logical conclusion it promotes a climate of death a devaluing of life and is directly detrimental to the disabled and the handicapped Link to Samaritan Ministries samaritanministries.org blog book review creation evolution and the handicapped

I Don't Have Enough Faith to be an Atheist Norman L. Geisler, 2007 I don't have enough faith to be an atheist argues that Christianity requires the least faith of all worldviews because it is the most reasonable The authors lay out the evidence for truth God and the Bible in logical order and in a readable non technical engaging style A valuable aid to those interested in examining the reasonableness of the Christian faith Geisler and Turek provide a firm challenge to the prior beliefs of doubters and skeptics

Humanism and the Death of God Ronald E. Osborn, 2017 Humanism and the Death of God is a critical exploration of secular humanism and its discontents Through close readings of three exemplary nineteenth century philosophical naturalists or materialists who perhaps more than anyone set the stage for our contemporary quandaries when it comes to questions of human nature and moral obligation Ronald E Osborn argues that the death of God ultimately tends toward the death of liberal understandings of the human as well Any fully persuasive defense of humanistic values including the core humanistic concepts of inviolable dignity rights and equality attaching to each individual requires an essentially religious vision of personhood Osborn shows such a vision is found in an especially dramatic and historically consequential way in the scandalous particularity of the Christian narrative of God

becoming a human He does not attempt to provide logical proofs for the central claims of Christian humanism along the lines some philosophers might demand Instead this study demonstrates how philosophical naturalism or materialism and secular humanisms and anti humanisms might be persuasively read from the perspective of a classically orthodox Christian faith

A Darwinian Left Peter Singer,2000-03-11 In this ground breaking book a renowned bioethicist argues that the political left must radically revise its outdated view of human nature He shows how the insights of modern evolutionary theory particularly on the evolution of cooperation can help the left attain its social and political goals Singer explains why the left originally rejected Darwinian thought and why these reasons are no longer viable He discusses how twentieth century thinking has transformed our understanding of Darwinian evolution showing that it is compatible with cooperation as well as competition and that the left can draw on this modern understanding to foster cooperation for socially desirable ends A Darwinian left says Singer would still be on the side of the weak poor and oppressed but it would have a better understanding of what social and economic changes would really work to benefit them It would also work toward a higher moral status for nonhuman animals and a less anthropocentric view of our dominance over nature **Animals, Welfare**

and the Law Ian A. Robertson,2015-07-16 In this objective practical and authoritative introductory text the author reveals how the fundamental principles of the human animal relationship drive the development of animal law The book explains the criteria by which the lawful use of animals is determined and how these criteria impact evolving standards of animal protection and define the responsibilities of people in their interactions with animals The author identifies 29 key principles which constitute the core knowledge necessary for people involved in debating assessing and guiding the evolution of society s national and international rulebook of animal welfare law The book also considers animal welfare and law in the context of a global market through discussion of common issues such as climate change biosecurity food safety and food supply Based on successful law courses run by the author and his own expertise as an animal law lecturer prosecutor and specialist legal adviser the book combines insights from science ethics and law to provide an essential understanding of what informs society and the law with regards to animals and their welfare **The Darwin Effect** Jerry Bergman,2014-09-26 Dr Miklos Nyiszli

an imprisoned doctor in the Auschwitz camp wrote that Nazi doctors hoped studying twins would solve the problem of faster reproduction of superior races Nazis hoped to have each German mother bear as many twins as possible What Darwin influenced went far beyond the Nazi death camps Shocking political social and scientific legacies of Darwin and his familyDisturbing disclosure of how over 45 million Christians were killed in the 20th century because of their faithRevealing and layman friendly presentation This book is the result of 30 years of research and study carefully documenting the common destructive threads that tie some of history s most murderous dictators uncaring capitalists and aggressive social activists to the flawed concepts of Charles Darwin in an effort to change the world and how they succeeded The extermination of races considered lower than others the profound lack of empathy for less advanced cultures the corrupted atheistic justifications

for taking the lives of millions all done to advance the agendas of social Darwinism at work in the world today More than mere theoretical discussions we have seen the horrifying evidence of the practical results when applying these destructive and misleading concepts to society in the last 100 years

Back To Darwin John B. Cobb, 2008-02-04 This book provides a distinctive radical way beyond the quarrels between evolutionary science and Christian belief Leading scientists philosophers and theologians critically discuss the metaphysical assumptions of neo Darwinism and offer concrete ways of broadening mainstream evolutionary theory Their open exchange moderated by veteran process theologian John B Cobb presents a holistic case for evolution that both theists and nontheists can accept Contributors Francisco J Ayala Ian G Barbour Charles Birch Philip Clayton John B Cobb Jr John Greene David Ray Griffin A Y Gunter John F Haught Lynn Margulis Reg Morrison Dorion Sagan Jeffrey Schloss Robert J Valenza Howard J Van Till

Monsters in the Classroom: Noam Chomsky, Human Nature, and Education Philip G. Hill, 2023 In this lucid original and comprehensive work the articulated approaches to pedagogy are based on specific conceptions of human nature Drawing on a vast range of Chomsky's prodigious output in linguistics politics biology cognitive science and education Hill highlights two fundamental elements of Chomsky's understanding of human nature and uses these elements as the foundation of a highly creative approach to pedagogy The originality of the work is apparent in the way the author identifies how key ideas in Chomsky's linguistics and political discourse are rooted in a liberatory approach to education The value of the work lies in its practical nature Even though it makes reference to ideas in various academic disciplines the work's overall value is reflected in the way ideas relate to Hill's personal teaching experiences and how they apply in a concrete classroom setting The reader is offered a practical and highly creative way to apply Chomsky's understanding of human nature in a classroom setting

Ethics and the Beast Tzachi Zamir, 2009-02-09 Many people think that animal liberation would require a fundamental transformation of basic beliefs We would have to give up speciesism and start viewing animals as our equals with rights and moral status And we would have to apply these beliefs in an all or nothing way But in **Ethics and the Beast** Tzachi Zamir makes the radical argument that animal liberation doesn't require such radical arguments and that liberation could be accomplished in a flexible and pragmatic way By making a case for liberation that is based primarily on common moral intuitions and beliefs and that therefore could attract wide understanding and support Zamir attempts to change the terms of the liberation debate Without defending it **Ethics and the Beast** claims that speciesism is fully compatible with liberation Even if we believe that we should favor humans when there is a pressing human need at stake Zamir argues that does not mean that we should allow marginal human interests to trump the life or death interests of animals As minimalist as it sounds this position generates a robust liberation program including commitments not to eat animals subject them to factory farming or use them in medical research Zamir also applies his arguments to some questions that tend to be overlooked in the liberation debate such as whether using animals can be distinguished from exploiting them whether liberationists should be moral vegetarians or

vegans and whether using animals for therapeutic purposes is morally blameless **Without a Shot Indeed** David Risselada,2021-06-24 Nikita Khrushchev proudly proclaimed the United States would one day awaken as a full blown communist country Americans are gullible he said the United States will be defeated without firing a shot What did he mean by this This book will attempt to answer this question by examining the social sciences used to study our behavior for the purpose of manipulating and changing it The theories of B F Skinner Cass Sunstein and others will be looked at along with scientific models from which our behavior is examined Persuasive communication strategies designed to gain compliance will also be explored along with what is understood about the human reaction to fear Without a Shot Indeed Inducing Compliance to Tyranny will expose the reader to the reality that our behaviors beliefs and attitudes are constantly under the microscope and the target of those seeking to change our nation **Beyond Boundaries** Susan Shillinglaw,Kevin Hearle,2002-08-21 Documents life among the Kayapo Indians of central Brazil a fiercely independent tribe who were forced to become businessmen or see their traditional way of life destroyed **The Ethics of Animal Experimentation** Donna Yarri,2005-08-18 Donna Yarri presents an overview of the current discussion on the ethics of animal experimentation from a Christian standpoint
