benefit of all children and families The book helps readers gain a better understanding of the most pressing issues in the world of special education so they can improve their own educational clinical and research practices

The Price They Paid Vivian Gunn Morris, Curtis L. Morris, 2002-07-25 In this compelling book Curtis and Vivian Morris put a human face on desegregation practices in the South Focusing on an African American community in Alabama they document not only the gains but also the significant losses experienced by students when their community school was closed and they were forced to attend a White desegregated school across town This in depth volume includes A letter by Dr William Hooper Council and speeches by George Washington Trenholm two African American leaders who worked with communities to provide quality schooling for African American children during segregation An insider's view of what life was like inside a segregated African American school including interviews with graduates who discuss how it felt to be in a caring and nurturing school that provided an atmosphere much like that of a family Actual events that demonstrate the profound negative impact of using skin color and race as a basis for preferential treatment including testimonials from parents and students who experienced racial discrimination in their new school A valuable look at the unmet promises of school desegregation that can help us provide a quality education for all children in the 21st century

Handbook of Classroom Management Carolyn M. Evertson, Carol S. Weinstein, 2013-10-31 Classroom management is a topic of enduring concern for teachers administrators and the public It consistently ranks as the first or second most serious educational problem in the eyes of the general public and beginning teachers consistently rank it as their most pressing concern during their early teaching years Management problems continue to be a major cause of teacher burnout and job dissatisfaction Strangely despite this enduring concern on the part of educators and the public few researchers have chosen to focus on classroom management or to identify themselves with this critical field The Handbook of Classroom Management has four primary goals 1 to clarify the term classroom management 2 to demonstrate to scholars and practitioners that there is a distinct body of knowledge that directly addresses teachers managerial tasks 3 to bring together disparate lines of research and encourage conversations across different areas of inquiry and 4 to promote a vigorous agenda for future research in this area To this end 47 chapters have been organized into 10 sections each chapter written by a recognized expert in that area Cutting across the sections and chapters are the following themes First positive teacher student relationships are seen as the very core of effective classroom management Second classroom management is viewed as a social and moral curriculum Third external reward and punishment strategies are not seen as optimal for promoting academic and social emotional growth and self regulated behavior Fourth to create orderly productive environments teachers must take into account student characteristics such as age developmental level race ethnicity cultural background socioeconomic status and ableness Like other research handbooks the Handbook of Classroom Management provides an indispensable reference volume for scholars teacher educators in service practitioners and the academic libraries serving these audiences It is also appropriate for graduate courses wholly or partly devoted to the

study of classroom management *Resources in Education* ,2001-04 Narrowing the Achievement Gap Susan J. Paik, Herbert J. Walberg, 2007-06-04 The subject of minority children's learning has long been the concern of civic leaders, parents, scholars, and educators. The federal legislation No Child Left Behind emphasizes the concern even more. It specifically requires assessing the academic achievement of minority students, particularly in economically disadvantaged areas, and holding schools accountable for their progress. Schools that fail to attain Adequate Yearly Progress face the real possibility of being forced to close if they continually fail to perform. Unlike the past, these are increasingly high stakes consequences for educators, parents, students, and the schools that serve them. This book is timely and relevant because it addresses these issues and recommends solutions for Latino, Black, and Asian students. This book also has implications for the problems the nation faces in helping all students to learn well, particularly those that lag in academic achievement. In considering the broad problems and in recommending solutions, the book provides breadth, concision, and unique organization. As the introductory chapter makes clear, the book simultaneously considers not only the three most visible minority groups in the U.S. but draws upon the perspectives of anthropology, education, ethnic studies, psychology, and sociology. From these several perspectives, this book is organized within three broad sections: 1. culturally diverse families and schooling; 2. issues of immigration and schooling experiences; and 3. socio-cultural perspectives on teaching, learning, and development. Within each section, the authors marshal research literature regarding each ethnic minority group.

Hello Professor Vanessa Siddle Walker, 2009-08-16 Like many Black school principals, Ulysses Byas, who served the Gainesville, Georgia school system in the 1950s and 1960s, was reverently addressed by community members as Professor. He kept copious notes and records throughout his career, documenting efforts to improve the education of Blacks. Through conversations with Byas and access to his extensive archives on his principalship, Vanessa Siddle Walker finds that Black principals were well positioned in the community to serve as conduits of ideas, knowledge, and tools to support Black resistance to officially sanctioned regressive educational systems in the Jim Crow South. Walker explains that principals participated in local, regional, and national associations comprising a Black educational network through which power structures were formed and ideas were spread to schools across the South. The professor enabled local school empowerment and applied the collective wisdom of the network to pursue common school projects such as pressuring school superintendents for funding, structuring professional development for teachers, and generating local action that was informed by research in academic practice. The professor was uniquely positioned to learn about and deploy resources made available through these networks. Walker's record of the transfer of ideology from Black organizations into a local setting illuminates the remembered activities of Black schools throughout the South and recalls for a new generation the role of the professor in uplifting Black communities.

The Color of Teaching June Gordon, 2002-11-01 One of the major concerns in education at present is how to recruit and attract more teachers from ethnic minorities. In an attempt to move beyond the superficial and simplistic responses as to why these

students are not entering teaching this book presents in depth interviews with over two hundred people from four ethnic groups African Americans Native Americans Asian Americans and Latinos These interviewees many of them teachers or education professionals express their attitude towards teaching and their understanding of why others may not choose teaching as a career One of the most significant and surprising findings is that regardless of academic or socio economic standing students from these ethnic groups tend not to be encouraged to enter the teaching profession by their own families communities and peers The book concludes with a discussion of programmatic changes and calls for the reconceptualization of the role of teachers Such changes can only arise out of a fundamental change in attitude of communities of color towards teaching which must be led by teachers themselves Crossing Segregated Boundaries Dionne Danns,2020-10-16 Scholars have long explored school desegregation through various lenses examining policy the role of the courts and federal government resistance and backlash and the fight to preserve Black schools However few studies have examined the group experiences of students within desegregated schools Crossing Segregated Boundaries centers the experiences of over sixty graduates of the class of 1988 in three desegregated Chicago high schools Chicago s housing segregation and declining white enrollments severely curtailed the city s school desegregation plan and as a result desegregation options were academically stratified providing limited opportunities for a chosen few while leaving the majority of students in segregated underperforming schools Nevertheless desegregation did provide a transformative opportunity for those students involved While desegregation was the external impetus that brought students together the students themselves made integration possible and many students found that the few years that they spent in these schools had a profound impact on broadening their understanding of different racial and ethnic groups In very real ways desegregated schools reduced racial isolation for those who took part **Using Past as Prologue** Dionne Danns,Michelle A. Purdy,Christopher M. Span,2015-08-01 In 1978 V P Franklin and James D Anderson co edited New Perspectives on Black Educational History For Franklin Anderson and their contributors there were glaring gaps in the historiography of Black education that each of the essays began to fill with new information or fresh perspectives There have been a number of important studies on the history of African American education in the more than three decades since Franklin and Anderson published their volume that has pushed the field forward Scholars have redefined the views of Black southern schools as simply inferior demonstrated the active role Blacks had in creating and sustaining their schools sharpened our understanding of Black teachers and educational leaders role in educating Black students and themselves with professional development provided a better understanding and recognition of the struggles in the North particularly in urban and metropolitan areas expanded our thinking about school desegregation and community control and broadened our understanding of Black experiences and activism in higher education and private schools Our volume will highlight and expand upon the changes to the field over the last three and a half decades In the shadow of 60th anniversary of Brown v Board of Education and the 50th anniversary of the 1964 Civil Rights Act contributors

expand on the way African Americans viewed and experienced a variety of educational policies including segregation and desegregation and the varied options they chose beyond desegregation The volume covers both the North and South in the 19th and 20th centuries Contributors explore how educators administrators students and communities responded to educational policies in various settings including K 12 public and private schooling and higher education A significant contribution of the book is showcasing the growing and concentrated work in the era immediately following the Brown decision Finally scholars consider the historian s engagement with recent history contemporary issues future directions methodology and teaching

Reframing Financial Literacy Thomas A. Lucey, James D. Laney, 2012-06-01 Scholarship related to financial and consumer education largely concerns itself with the acquisition management and growth of financial resources In a global setting that witnesses increasing competition for natural resources along with diminishing appreciation for human rights a challenge for financial and consumer educators involves developing foundation for bettering individual wealth in manners that respect all members of a global society Reframing Financial Literacy fills this need by providing literature that examines a broad view of financial literacy by connecting financial practice with issues of citizenship along with personal and professional identity It relates these issues to educational theory and practice to provide the reader with information about the relevance of improving social worth while bettering financial wealth Boasting 14 previously unpublished chapters from an international slate of authors and classroom adaptable lesson plans for each chapter Reframing Financial Literacy will interest both teachers and researchers with its exciting classroom activities and its provocative content This is a must work that no education professional should be without

Schoolhouse Activists Tondra L. Loder-Jackson, 2015-10-26 Schoolhouse Activists examines the role that African American educators played in the Birmingham Alabama civil rights movement from the late nineteenth century to the present day Drawing on multiple perspectives from education history and sociology Tondra L Loder Jackson revisits longstanding debates about whether these educators were friends or foes of the civil rights movement She also uses Black feminist thought and the life course perspective to illuminate the unique and often clandestine brand of activism that these teachers cultivated The book will serve as a resource for current educators and their students grappling with contemporary struggles for educational justice
