of Business Restructuring Law Sanford U. Mba, 2019-06-29 This book focuses on the restructuring of distressed businesses emphasizing the need for new financing during the restructuring process as well as during relaunch and examines the role of law in encouraging creditor confidence and incentivizing lending It describes two broad approaches to encouraging new finance during restructuring a prescriptive one that seeks to attract credit using expressly defined statutory incentives and a market based one that relies on the business judgment of lenders against the backdrop of transaction avoidance rules Securing new financing for a distressed business is a critical part of successful restructuring Without such financing the business may be unable to meet interim liquidity constraints or to implement its restructuring plans This book addresses related questions concerning the place of new financing as an essential component of restructuring In general terms the book explores how statutory interventions and the courts can provide support with contentious issues that arise from the provision of new financing whether through new financing agreements or through distressed debt investors who are increasingly gaining prominence as sources of new financing for distressed businesses It argues that courts play a key part in preventing or correcting the imbalances that can arise from the participation of distressed debt investors In this context it critically examines the distressed debt market in emerging markets like Nigeria and the opportunity presented by non performing loans arguing that the regulatory pattern of market entry may disincentivize distress debt investing in a market that is in dire need of financing The book offers a fresh and comparative perspective on restructuring new financing for distressed businesses by comparing various approaches primarily from the US UK and Germany and drawing lessons for frontier markets with particular reference to Nigeria It fills an important gap in international comparative scholarship and discusses a living problem with both empirical and policy aspects

Acquisitions and Corporate Strategy David R. King,2022-04-19 Corporate restructuring acquisitions alliances and divestment is a visible form of corporate strategy For example firm investments in buying and selling assets exceed the gross domestic product of the majority of nations Most research in this area examines acquisitions but informing practice is limited by examining acquisitions in isolation or using a narrow focus For example a lingering problem is that average acquisition performance is consistently around zero suggesting a need to identify practically relevant relationships In addressing this need research on three fundamental questions is covered 1 How do acquisitions relate to other corporate strategy options 2 What helps to predict acquisition performance and 3 What are persistent acquisition research issues The first question is intended to overcome a research limitation that acquisitions are often examined independent of other corporate strategies including internal development alliances and divestment The second question addresses novel relationships associated with the primary focus of acquisition research in examining what drives acquisition performance The third question reflects on the underlying complexity of the phenomenon that makes it a challenge to identify what drives acquisition performance Overall the intent of presenting ideas on these fundamental questions is to illustrate promising areas for future research This book presents the latest state of knowledge on the topic and will be of interest to researchers academics and advanced students in the fields of strategic management international business and organizational studies

Mergers and Productivity Steven N. Kaplan,2007-12-01 Mergers and Productivity offers probing analyses of high profile mergers in a variety of industries Focusing on specific acquisitions it illustrates the remarkable range of contingencies involved in any merger attempt The authors clearly establish each merger s presumed objectives and the potential costs and benefits of the acquisition and place it within the context of the broader industry Striking conclusions that emerge from these case studies are that merger and acquisition activities were associated with technological or regulatory shocks and that a merger s success or failure was dependent upon the acquirer s thorough understanding of the target its corporate culture

and its workforce and wage structures prior to acquisition Sifting through a wealth of carefully gathered evidence these papers capture the richness the complexity and the economic intangibles inherent in contemporary merger activity in a way that large scale studies of mergers cannot Value-based Management of the Rising Sun Yasuhiro Monden,2006 Question asking is an imperative part of the learning process We don t just answer questions but need to devise questions to ask that are relevant and meaningful to the discussion and the course as a whole Moreover the way you ask listen to and respond to student questions provides a model in turn for students to emulate Students need to learn how to ask questions to learn how to learn to learn how to be critical and engage analytically with the material they are studying Good modeling results not only in better class discussion but also in better learners THIS EFFORT SHOWS THE WAYS IN WHICH TEACHERS ASK QUESTIONS TYPES OF QUESTIONS TECHNIQUES AND STRATEGIES PURPOSES OF QUESTIONS LEVEL OF QUESTIONS ALSO REFLECTS THE SOCRATIC QUETIONING STRATEGIES SUGGEST AND GUIDE FOR BAD AND GOOD QUESTIONS IT S CLEARLY SUMMARIZE THE OBSERVATION THAT FOUND DURING MY EXPERIENCE AND SHOWS THE WAYS THAT TEACHER IMPROVE THEIR TAECHING AND HOW TO QUESTION AND FARULATE THEIR QUESTIONS IN ORDER TO BE ACCEPTEDABLE FOR THEIR STUDENTS Billion Dollar Lessons Paul B. Carroll,Chunka Mui,2008-09-11 This book is your chance to learn from others mistakes Entrepreneur In the 1960s IBM CEO Tom Watson called an executive into his office after his venture lost 10 million The man assumed he was being fired Watson told him Fired Hell I spent 10 million educating you I just want to be sure you learned the right lessons There are thousands of books about successful companies but virtually none about the lessons to be learned from those that crash and burn Now Paul Carroll and Chunka Mui draw on research into more than 750 flameouts to reveal the seven biggest reasons for business failure *Directors & Boards* ,1989
