Creating Country Music Fabricating Authenticity:

Creating Country Music Richard A. Peterson, 2013-04-26 In *Creating Country Music* Richard Peterson traces the development of country music and its institutionalization from Fiddlin' John Carson's pioneering recordings in Atlanta in 1923 to the posthumous success of Hank Williams. Peterson captures the free-wheeling entrepreneurial spirit of the era, detailing the activities of the key promoters who sculpted the emerging country music scene. More than just a history of the music and its performers, this book is the first to explore what it means to be authentic within popular culture. Peterson restores to the music a sense of fun and diversity and possibility that more naive fans and performers miss. Like Buck Owens, Peterson knows there is no greater adventure or challenge than to act naturally. Ken Emerson, *Los Angeles Times Book Review*. A triumphal history and theory of the country music industry between 1920 and 1953. Robert Crowley, *International Journal of Comparative Sociology*. One of the most important books ever written about a popular music form. Timothy White, *Billboard Magazine*.

Music and the Broadcast Experience Christina L. Baade, James Andrew Deaville, 2016 How can broadcasting help us understand music and its cultural role both historically and today? To answer this question *Music and the Broadcast Experience* brings together fourteen leading music and media scholars who explore how music and broadcasting have developed together throughout the twentieth and into the twenty-first centuries.

Nashville Cats Travis D. Stimeling, 2020 The Nashville Cats were a group of session musicians who bounced from studio to studio along Nashville's Music Row, providing the instrumental backing tracks for countless recordings in the mid-20th century. Including music industry titans like Chet Atkins, Anita Kerr, and Charlie McCoy, these versatile Cats not only established the city as a well-known hub for recording popular music but also defined the era of country music known as the Nashville Sound. Drawing upon a rich array of previously unexplored primary sources and original oral histories, *Nashville Cats: Record Production in Music City 1945-1975* is the first account of the role that these musicians, along with recording engineers and record producers, played in shaping the sounds of country music during one of its most definitive periods. This era produced some of the genre's most celebrated recording artists, including Country Music Hall of Fame inductees Patsy Cline, Jim Reeves, and Floyd Cramer. The Nashville Sound attracted musicians like Bob Dylan and Leonard Cohen to the city's studios and marked the establishment of a recording industry that has come to define the city of Nashville in the national and international consciousness. Author Travis D. Stimeling explores how the Nashville system came to be, how musicians functioned within it, and how the desires of an ever-growing and diversifying audience affected record production practices. Through interviews with key players of the period and close analysis of hit songs, *Nashville Cats* provides an exciting look into this prolific era of music history.

Handmade Pixels Jesper Juul, 2019-10-08 An investigation of independent video games, creative, personal, strange, and experimental, and their claims to handcrafted authenticity in a purely digital medium. Rhizomes Nathalie

Ramière, Rachel Varshney, 2021-02-19 This volume *Rhizomes* is a challenging path into a very multidisciplinary set of papers. Papers range across cultural studies and film to applied linguistics to sociolinguistics and as gathered in this one volume the result of postgraduate student research of a very high order they force readers to think critically of disciplines their assumed boundaries and most importantly the usefulness of assuming the enduring value of such boundaries. This is not to say that anything goes but the diversity of areas under scrutiny means that sharper rethinking of one's own comfort zones is necessarily one key outcome when confronted with a volume like this. This is one advantage of the selected papers besides the obvious one of having at your finger tips a simple way of delving into a challenging diversity. Brian Ridge Campion College Sydney This is a wonderful collection of papers which demonstrates the power and vitality of contemporary literary and cultural research. The scope of the papers, the diversity of the subject matter and the willingness of their authors to work across disciplinary boundaries work together to create an exemplary collection of research for the twenty first century multidisciplinary, multigeneric and multimodal like 21st century texts and media. Greg Hainge's opening paper sets the stage for the diverse and engaging papers that follow. With his own examples of rhizomatics drawn from music, Greg immediately has the reader acknowledging the multidisciplinary and multimodality of contemporary texts and so the need for research that can address the richness and complexity of these texts. In Part 1 we have two papers that address the issue of the limitations of conventional research methodology in their own fields: language acquisition, film studies and propose alternative and more productive methodologies. The exciting thing about this section is that these are fields normally considered very different and without much to say to one another and yet the combination works to create a dialogue that extends across these and many other fields of research. Most importantly both challenge the dichotomising of research and analytical methods that has worked to impoverish their fields and the research on which it is based. Part 2 presents papers on a range of marginalised social positionings and experiences and in the process demonstrates both the power of research to uncover what has been ignored or elided in contemporary histories: how many westerners know of the long history of Chinese women in film. Or of an Aboriginal Taiwanese literature as well as the power of new perspectives, new ways of thinking the research subject to open up areas of study such as dating manuals and country music both conventionally dismissed as inherently trivial and/or sexist. In Part 3 the papers all play brilliantly with the notion of connectivity demonstrating for readers the inextricability of texts and meaning systems: verbal, visual and other with the cultural contexts in which they operate and so the diverse ways they may be deployed. These papers banish forever any reliance on a formalist reading or methodology for the analysis of text and meaning. And again the range of subject matter is breath taking and argues the need for cross disciplinary, transdisciplinary and multidisciplinary research practice. Part 4 takes the reader into the realm of transformations challenging the ways in which textual and systemic changes articulate profound cultural changes in the

societies that produce them So we learn about grammatical interventions in the Chinese language as feminine and neuter pronouns are added to the gender free Chinese language and consider the major cultural change that both caused this change and is subsequently produced by it We consider the ways in which cinema has evolved as an art form under the influence of its material and verbal technologies And we consider the ways in which Chinese poetry has entered a range of cultural practices in the west and the east and again consider how its traditional meanings and significance are maintained and communicate to these new contexts and the nature of the transcultural experience this generates For the academic student or interested reader this collection offers a breath taking scope of subject matter and a vital and engaged approach to the material that makes this collection a research page turner Professor Anne Cranny Francis Department of Critical and Cultural Studies Macquarie University Sydney

Categorizing Sound David Brackett,2016-07-19 Categorizing Sound addresses the relationship between categories of music and categories of people in other words how do particular ways of organizing sound become integral parts of whom we perceive ourselves to be and of how we feel connected to some people and disconnected from others After an introduction that discusses the key theoretical concepts to be deployed Categorizing Sound presents a series of case studies that range from foreign music race music and old time music in the 1920s up through country and rhythm and blues in the 1980s Each chapter focuses not so much on the musical contents of these genres as on the process of gentrification through which these categories are produced Provided by publisher

Memorable Customer Experiences Joëlle Vanhamme, 2016-04-22 Experiential marketing or memorable customer experiences is proving a popular tool amongst businesses seeking to make an impact in a competitive world Yet the scramble to achieve a presence among experience providers has led many companies to design and implement experiential marketing without integrating it with their overall marketing strategy These companies often end up dissatisfying their customers rather than delighting them This research anthology investigates different angles of experiential marketing The 16 chapters are organised in six sections The first section considers whether memorable customer experiences result from the use of traditional marketing practices perhaps implemented more effectively than previously or require entirely new practices with new foundations that turn companies into experience providers Section two details ways businesses seek to build brands through putting experiential marketing into practice while section three asks whether there are general principles that can be applied to the design of customer experiences which ensure successful outcomes whatever market you may operate in Section four examines how companies manage their customer experiences once they have made the strategic decision to provide them and section five looks at methods available to evaluate the success of these customer experiences Experiential marketing changes everything claim the management gurus but is it really so significant that not joining this race is dangerous The last section of the book offers a much needed critique of experiential marketing
