Michael Ebifegha, 2011-03-31 Were humans created or did they evolve This debate continues to rage between science and religion In Creation or Evolution author Michael Ebifegah examines these two worldviews within the framework of science He examines the constraints of science as an explanatory framework for the origin of species and compares the contemporary world to a hypothetical world under the influence of evolutionary processes and agency Additionally he considers the irrelevance of the earth's age to the creationist evolutionist controversy He stresses that knowledge of the intersection between the origin of life and the origin of species is required to establish the latter Ebifegah augments the natural selection discussion in light of Fodor and Piattelli Palmarinis work and addresses science's limitations in deploying similarity dissimilarity arguments in the debate about creationism versus evolutionism Finally he focuses on the lack of historical evidence to justify an evolutionary worldview Creation or Evolution discusses how the M theory and Charles Darwin's paradigm of evolution by natural selection are outside the limits of science Ebifegah shows that we must look beyond the inadequacy of such theories and address the validity of science as the sole avenue of inquiry *Politically Incorrect Guide to Darwinism and Intelligent Design* Jonathan Wells, 2006-08-21 Darwin is an emperor who has no clothes but it takes a brave man to say so Jonathan Wells a microbiologist with two Ph D's from Berkeley and Yale is that brave man Most textbooks on evolution are written by Darwinists with an ideological ax to grind Brave dissidents qualified scientists who try to teach or write about intelligent design are silenced and sent to the academic gulag But fear not Jonathan Wells is a liberator He unmask the truth about Darwinism why it is wrong and what the real evidence is He also supplies a revealing list of Books You're Not Supposed to Read as far as the Darwinists are

Dembski, Casey Luskin, Joseph M. Holden, 2021-10-05 Science and Faith Can and Do Support Each Other Science and Christianity are often presented as opposites when in fact the order of the universe and the complexity of life powerfully testify to intelligent design With this comprehensive resource that includes the latest research you ll witness how the findings of scientists provide compelling reasons to acknowledge the mind and presence of a creator Featuring more than 45 entries by top caliber experts you ll better understand how scientific concepts like intelligent design are supported by evidence the scientific findings that support the history and accounts found in the Bible the biases that lead to scientific information being presented as a challenge rather than a complement to Christianity Whether you re looking for answers to your own questions or seeking to explain the case for intelligent design to others The Comprehensive Guide to Science and Faith is an invaluable apologetic tool that will help you explore and analyze the relevant facts research and theories in light of biblical truth *The Humaniverse Guide to First Contact with ET* Keith Seland, 2020-10-19 If extraterrestrial intelligence ETI exists elsewhere in our universe any meaningful and absolute confirmation would require either a transformative announcement global broadcast single fantastic irrefutable event experience or acknowledgment of a large accumulation of increasing evidence which equates to that historical revelation The Humaniverse Guide to First Contact with ET embarks on an exploration of how ETI is viewed by theologians and their antagonists as well as by advocates and refuters alike This work is a detailed investigation of how religious philosophy aligns with other worldviews and its potential reliability toward application and assistance in the development of a future relationship with ETI The lens is focused on humankind s evolution of cognition conjecture logic and knowledge about ETI as transformative toward these end points As we know the only way these end points can be resolved are through the eyes experiences and activities as undertaken by the only intelligent life form of which we are aware namely ourselves Do you think your worldview about the meaning and purpose of life will be changed if and when ET comes calling **C. S. Lewis: Anti-Darwinist** Jerry Bergman, 2016-11-11 It is commonly believed that C S Lewis was a theistic evolutionist a conclusion based on a few statements that he made in *The Problem of Pain* and *Mere Christianity* A careful study of his writings reveals not only that for most of his life he was not a theistic evolutionist but strongly opposed Darwinism especially towards the end of his life *The Darwinian Heritage* David Kohn, 2014-07-14 Representing the present rich state of historical work on Darwin and Darwinism this volume of essays places the great theorist in the context of Victorian science The book includes contributions by some of the most distinguished senior figures of Darwin scholarship and by leading younger scholars who have been transforming Darwinian studies The result is the most comprehensive survey available of Darwin s impact on

O'Briant, 2015-03-13 This book exposes the attempt to teach atheistic evolution to students often ridiculing their faith in God The classrooms in our schools have become the battlegrounds for the minds of our children Since the introduction of evolution by Charles Darwin there has been a growing list of atheist professors who vigorously fight any religion The classrooms of America should not be the battlegrounds of any religion but evolution is a religion It has no place in the classroom since it does not offer any information that improves the teaching of any science class except evolution itself There is no proof of evolution only assertions innuendos credulity belief without proof and suppositions Fully one third of all geology textbooks deal with evolution which is founded only opinion and undocumented assertions Therefore it should be removed from all textbooks Dr David Menton who taught medicine at the Washington School of Medicine in St Louis Missouri for twenty five years stated that he never once needed to reference evolution in any medical class A coalition of organizations such as the National Academy of Sciences whose members are 93% atheist or agnostic and the National Center for Science and Education control most of the government grants intended for schools use fully support the atheism of evolution and they attack any criticism of evolution **Evolution Vs. Young,Mark A. Largent,2007-06-30 As recently seen by the Kitzmiller vs Dover case the evolution versus creation debate never goes away The best way to understand these debates is to read the arguments of the individuals involved This reference work provides over 40 of the most important documents to help readers understand the debate in the eyes of the people of the time Each document is from a major participant in the debates from the predecessors of Darwin to the judges of the influential court cases of the present day The editors have included an introduction and analysis of each document that places it within historical and scientific context Evolution and Creationism A Documentary and Reference Guide aims to enhance our understanding of the debate by presenting over 40 documents that shed light on the origins goals and history of the ongoing debate The volume examines such topics as Darwin's theory of natural selection the rise of Fundamentalism and its opposition to evolution and evolution and its discontents at the beginning of the 21st century In addition the work includes an extensive bibliography and reference guide to relevant print and electronic resources      A Modern Guide to Uneven Economic Development Erik S. Reinert,Ingrid H. Kvangraven,2023-01-13 In contrast to neo classical mainstream approaches to economics this innovative Modern Guide addresses the complex reality of economic development as an inherently uneven process exploring the ways of theorizing and empirically exploring the mechanisms with which the unevenness manifests itself It covers a wide array of issues influencing wealth and poverty technological innovation ecology and sustainability financialization population gender and geography considering the dynamics of cumulative causations created by the interplay between these factors      **Constructing the Beginning** Simon Locke,2014-04-04 In Constructing the Beginning Simon Locke offers a new approach to considering the enigma of creation science using the perspective of discourse analysis Using the publications of the British Creation Science Movement to perform a detailed analysis of the creationist case Locke demonstrates that the discourses and rhetorics used by natural and social scientists are also employed by non scientists Out of this study a view of science as a cultural resource develops questioning the adequacy of perceived sociological wisdom that sees science as the source and embodiment of cultural rationalization As a case study of the use of science as a discursive resource in everyday life Constructing the

Beginning speaks to scholars of discourse analysis constructionism rhetorics and the public understanding of science It will also be of great interest to scholars in the areas of cultural studies sociology of scientific knowledge and of religion postmodernism and sociological theory Additional Copy Creation science is the target of much attack these days from both within and outside of the orthodox scientific community This book however takes a different approach It is not an attack on creationism nor is it a defense The author s interest is not in creationism at all but rather it is in the questions of the role and significance of science in modernity or the public understanding of science Locke s approach to this issue is a discursive and rhetorical one Creationism is treated as a case study of the argumentative engagement between science and non science which in his view is as central to the commonsense lifeworld of modernity as much as it is to the lives of its intellectuals An important dimension of the public meaning of science in modernity is its limits and its relations with other modes of thought and belief which continue to survive as discourses in the wider culture Creationism is merely one example of this general feature The book begins with a discussion of the current issues in the public understanding of science in relation to traditional sociological views of the impact of science on modernity This is examined through rationalization and the contrasting view derived from the sociology of scientific knowledge which points to the likelihood of a much more complex and variable relationship than rationalization proposes It continues with an argument and detailed analysis that focuses on three main points the problem of a competing account of reality the world in the form of evolution the problem of competing accounts of the Bible the Word in the form of different versions of Christianity and the realization that both of these problems must be managed together in such a way that creationists own version s of the world and of the Word are compatible a compatibility achieved through a discursive syncretism The final chapter brings together the strands of the argument to further develop the implications of the dilemma of science for the public understanding of science through the idea of science as a cultural resource and its possible relation to other such cultural resources within modernity such as Christianity It is suggested that much so called anti science could be made sense of in these terms and proposes further research in this direction

**Reader's Guide to the History of Science** Arne Hessenbruch, 2013-12-16 The Reader s Guide to the History of Science looks at the literature of science in some 550 entries on individuals Einstein institutions and disciplines Mathematics general themes Romantic Science and central concepts Paradigm and Fact The history of science is construed widely to include the history of medicine and technology as is reflected in the range of disciplines from which the international team of 200 contributors are drawn
