

The Creation

Composer's nationality **Austrian** Era **Classical**
 Date of piece **1796-98** Originally from an **oratorio**

Haydn set the biblical story of the creation to music in a huge piece for soloists, choir and orchestra. The music here is a chorus called *Achieved is the glorious work. God is happy with his day's work!*

Franz Joseph Haydn
 1732-1809

Joyfully $\text{♩} = c.76$

The musical score is written for a piano and features a chorus. It is in 2/4 time and consists of six systems of staves. The first system is marked 'Joyfully' with a tempo of approximately 76 beats per minute. The score includes various musical notations such as notes, rests, and dynamic markings like 'p' (piano) and 'f' (forte). The piece concludes with a double bar line at the end of the sixth system.

Gear Cutting Tools Stephen P. Radzevich, 2017-10-16 Gear Cutting Tools Fundamentals of Design and Computation Second Edition presents the DG K based method of surface generation a practical mathematical method for designing gear cutting tools with optimal parameters The text addresss gear cutting tool evolution and proceeds to scientific classification for all types of gear machining meshes before discussing optimal cutting tool designs Designs currently used and those being planned are covered and the approach allows for development of scientific predictions and optimal designs Solutions appear in analytical form and or graphical form with a wealth of new figures added and new appendices offer additional data for readers

Beethoven's Dedications Artur Pereira, 2020-12-30 The dedication of a piece of music is a feature generally overlooked but it can reveal a great deal about the work the composer the society and the music world in which the composer lived This book explores the musical biographical and sociological aspects of the practice of dedicating new compositions in the late 18th and early 19th centuries and makes a significant contribution towards a better understanding of the impact these tributes had on Beethoven's life and work and their function within the context of the musical cultural and economic environments in which they appeared As the first of its kind this study demonstrates that as a result of their different functions published dedications and handwritten inscriptions are distinct from one another and for that reason they have been classified in different categories This book therefore challenges the idea of what exactly can be termed as a dedication a concept which extends far beyond the dedication of musical works

Generation of Surfaces Stephen P. Radzevich, 2014-02-03 A commonly used practice in industry is the machining of sculptured part surfaces on a multiaxis numerical control NC machine While this practice is vital it is also a costly aspect of the surface generation process After investing more than 40 years of research into the theory of part surface generation the author of Generation of Surfaces Kinematic Geometry of Surface Machining considers an approach that provides optimal machining while factoring in the lowest possible cost This book presents the modern theory of part surface generation with a focus on kinematic

geometry of part surface machining on a multiaxis NC machine and introduces key methods for applying the DG K based approach to part surface generation The DG K approach is based on the results of research found in two main areas differential geometry DG of surfaces and kinematics K of rigid body in three dimensional Euclidian space E3 It is an extremely powerful tool for solving a plurality of problems in mechanical manufacturing engineering The text is presented in three parts the basics the fundamentals and applications of part surface generation The first part of the book provides an analytical description of part surfaces details the principal elements of the theory of multiparametric motion of a rigid body in E3 space and defines applied coordinate systems The second half introduces the theory of part surface generation and includes an analytical description of contact geometry while the final portion illustrates the potential development of highly effective part surface generation methods The author illustrates the most complex features of the book with examples explains all of the results of analysis mathematically and uses just one set of input parameters the design parameters of the part surface to be machined The book considers practical applications for part surface machining and cutting tool design Developed for use with computer aided design CAD and computer aided machining CAM this text is useful for anyone starting work on new software packages for sculptured part surface machining on a multiaxis NC machine
