Chemistry in America 1876-1976 A. Thackray,J.L. Sturchio,P.T. Carroll,R.F Bud,2012-12-06 This study is an outgrowth of our interest in the history of modern chemistry The paucity of reliable quantitative knowledge about past science was brought home forcibly to us when we undertook a research seminar in the comparative history of modern chemistry in Britain Germany and the United States That seminar which took place at the University of Pennsylvania in the spring of 1975 was paralleled by one devoted to the work of the Annales School The two seminars together catalyzed the attempt to construct historical measures of change in aspects of one science or chemical indicators The present volume displays our results Perhaps our labors may be most usefully compared with the work of those students of medieval science who devote their best efforts to the establishment of texts Only when acceptable texts have been constructed from fragmentary and corrupt sources can scholars move on to the more satisfying business of making history So too in the

modern period a necessary preliminary to the full history of any scientific profession is the establishing of reliable quantitative information in the form of statistical series This volume does not offer history Instead it provides certain element indicators that may be useful to individuals interested in the history of American chemistry and chemical industry and suggestive for policy

My Work Is That of Conservation Mark D. Hersey,2011-05-01 George Washington Carver ca 1864 1943 is at once one of the most familiar and misunderstood figures in American history In *My Work Is That of Conservation* Mark D Hersey reveals the life and work of this fascinating man who is widely and reductively known as the African American scientist who developed a wide variety of uses for the peanut Carver had a truly prolific career dedicated to studying the ways in which people ought to interact with the natural world yet much of his work has been largely forgotten Hersey rectifies this by tracing the evolution of Carver s agricultural and environmental thought starting with his childhood in Missouri and Kansas and his education at the Iowa Agricultural College Carver s environmental vision came into focus when he moved to the Tuskegee Institute in Macon County Alabama where his sensibilities and training collided with the denuded agrosystems deep poverty and institutional racism of the Black Belt It was there that Carver realized his most profound agricultural thinking as his efforts to improve the lot of the area s poorest farmers forced him to adjust his conception of scientific agriculture Hersey shows that in the hands of pioneers like Carver Progressive Era agronomy was actually considerably greener than is often thought today *My Work Is That of Conservation* uses Carver s life story to explore aspects of southern environmental history and to place this important scientist within the early conservation movement

The American Ideology of National Science, 1919-1930 Ronald C. Tobey,1971-10-15 Ronald C Tobey provides a provocative analysis of the movement to establish a national science program in the early twentieth century Led by several influential scientists who had participated in centralized scientific enterprises during World War I the new effort to conjoin science and society was an attempt to return to earlier progressive values with the hope of producing science for society s benefit The movement was initially undermined by the new physics and Einstein s theories of relativity which shattered traditional views and alienated the American public Nationalized research programs were tempered by the conservatism of corporate donors Later with the disintegration of progressivism the gap between science and society made it impossible for the two cultures to unite
