## **Creative Choices:**

Choice Computing: Machine Learning and Systemic Economics for Choosing Parag Kulkarni, 2022-08-28 This book presents thoughts and pathways to build revolutionary machine learning models with the new paradigm of machine learning to adapt behaviorism. It focuses on two aspects: one focuses on architecting a choice process to lead users on the certain choice path while the second focuses on developing machine learning models based on choice paradigm. This book is divided in three parts where part one deals with human choice and choice architecting models with stories of choice architects. Second part closely studies human choosing models and deliberates on developing machine learning models based on the human choice paradigm. Third part takes you further to look at machine learning based choice architecture. The proposed pioneering choice based paradigm for machine learning presented in the book will help readers to develop products help readers to solve problems in a more humanish way and to negotiate with uncertainty in a more graceful but in an objective way. It will help to create unprecedented value for business and society. Further it will unveil a new paradigm for modern intelligent businesses to embark on the new journey the journey of transition from shackled feature rich and choice poor systems to feature flexible and choice rich natural behaviors.

**Logic and Theism** Jordan Howard Sobel, 2003-11-10 This is a wide ranging 2004 book about arguments for and against beliefs in God. The arguments for the belief are analysed in the first six chapters and include ontological arguments from Anselm to G del the cosmological arguments of Aquinas and Leibniz and arguments from evidence for design and miracles. The next two chapters consider arguments against belief. The last chapter examines Pascalian arguments for and against belief in God. There are discussions of Cantorian problems for omniscience of challenges to divine omnipotence and of the compatibility of everlasting complete knowledge of the world with free will. There are appendices that present formal proofs in a system for quantified modal logic a theory of possible worlds notes on Cantorian set theory and remarks concerning non standard hyperreal numbers. This book will be a valuable resource for philosophers of religion and theologians and will interest logicians and mathematicians as well. The Handbook of Fashion Law, 2025-02-12 Over the past few years fashion law has emerged as a vibrant field of inquiry. The legal and policy issues affecting the fashion sector have been investigated

with increasing intensity while a growing number of private practice lawyers and in house counsel regard themselves as practising fashion law But what is fashion law And what are the specific legal challenges facing the fashion sector as well as related solutions The Handbook of Fashion Law seeks to answer these questions by bringing together multiple voices approaches and jurisdictions Its contributions are organized into four thematic areas Part I considers the legal infrastructure of the fashion and luxury industries addressing issues related to intellectual property IP as well as the demands of the circular economy protection of cultural heritage and freedom of expression and information Part II maps the IP dimensions of fashion by reviewing the application of design rights copyright trade marks geographical indications plant variety rights and trade secrets Part III analyses specific contractual issues arising in the fashion sector It examines the application of principles and rules found in regulatory frameworks including those governing advertising competition consumer and tax laws Finally Part IV dissects and evaluates the role of new and emerging technologies in the fashion sector from a legal perspective It considers concepts such as e commerce 3D printing counterfeiting artificial intelligence non fungible tokens NFTs the metaverse gaming and wearable technology The Handbook of Fashion Law offers readers a multidisciplinary and multijurisdictional understanding of legal challenges facing the fashion sector Bringing together a diverse range of experts its contributions offer readers an in depth critical and strategic understanding of the fashion industry s legal intricacies

**The Work of Authorship** Mireille Eechoud, 2025-10-01 What fresh perspectives can viewing copyright law through a humanities looking glass bring to key notions of tomorrow s copyright law Technological and economic concerns have long been the drivers of debate about copyright But diverse disciplines in the humanities including literary studies aesthetics film studies and the philosophy of art have a great deal to offer if we wish to establish a more nuanced and useful conception of copyright and authorship This volume brings together scholars from a range of disciplines to explore the challenges inherent in translating aesthetics and creativity studies to concepts of copyright especially as longstanding approaches are troubled by the rise of the digital

The Originality Standard of Photographic Works in EU Copyright Law Marián Jankovič, 2025-01-24 Originality Standard of Photographic Works in EU Copyright Law By Mari n Jankovic Marian Jankovic The omnipresence of photographic products in almost everyone s lives is considered natural almost unavoidable If one makes the connection of the said omnipresence with the constant development of new technologies the increase of interactions with possible legal consequences involving photographic products as a potential subject matter appropriable by copyright might be expected to be inevitable Such outlined situation brings the necessity to sufficiently legally define and clarify under which circumstances in other words upon the fulfilment of what conditions and criteria can a photographic product be considered the subject matter of copyright This shall be done in order to assure the legal certainty of both the photographers as well as the potential users of their photographic products The medium of photography especially its production process necessitating involvement of technological equipment is not as easily graspable and comprehensible as other traditional works of art This ambiguity has

been also carried over into the legal area which resulted in various differentiating treatments of photographic products within the national copyright frameworks of Member States of the European Union Chosen for the highlighting of the already mentioned various differentiating treatments and their particularities copyright frameworks of Germany France Czech and Slovak republics have been chosen as basis for the conducted research The European Union has tried to remedy the outlined state of affairs by way of the so called harmonisation As part of its first phase a legislative framework in a form of Directives has been created Within the said framework a condition for appropriability of photographic products by copyright has been formulated the so called originality standard of author s own intellectual creation As part of its second phase the said originality standard formulated via the previously created legislative framework has been applied in practice and enhanced by the Court of Justice of the European Union with the addition of a personal touch As a result of both phases combined a solely applicable requirement for appropriation of photographic products by copyright within the copyright framework of the European Union has been formulated The figurative trigger for the initiation of the said second phase a legal dispute revolving around the use of an official portrait photographic product depicting a pupil without the photographer s consent has been chosen by the Court of Justice of the European Union Whether the outlined state of affairs consisting of various national differentiating treatments of photographic products has been remedied indeed will be demonstrated on the assessment of the current position of photographic products after the completion of both harmonisation phases within the four selected national copyright frameworks In particular the applicability of the harmonised originality standard as well as the applicability of the said national particularities will be assessed

#### **Artificial Intelligence and the Media** Pihlajarinne,

Taina, Alén-Savikko, Anette, 2022-02-22 This timely book presents a detailed analysis of the role of law and regulation in the utilisation of Artificial Intelligence AI in the media sector As well as contributing to the wider discussion on law and AI the book also digs deeper by exploring pressing issues at the intersections of AI media and the law Chapters critically re examine various rights and responsibilities from the perspectives of incentives for accountable utilisation of AI in the industry

*A Copyright Gambit* Sunimal Mendis, 2019-07-05 European memory institutions are repositories of a wealth of rare documents that record public domain content These documents are often stored in dark archives to which members of the public are granted limited access resulting in the public domain content recorded therein being relegated to a form of forgotten knowledge Digitisation offers a means by which such public domain content can be made speedily and easily accessible to users around the world For this reason it has been hailed as the harbinger of a new digital renaissance This book examines the topical issue of the need to preserve exclusivity over digitised versions of rare documents recording public domain content Based on data gathered through an empirical survey of digitisation projects undertaken by fourteen memory institutions in five European Union Member States it argues for the introduction of exclusive rights in digitised versions of rare documents recording public domain textual content as a means of incentivising private sector investment in the

digitisation process It concludes by presenting a detailed proposal for a European Union Regulation that would grant memory institutions a limited term related right in digitised versions of rare documents held in their collections subject to stringent exceptions and limitations that are designed to safeguard user interests

**NFTs, Creativity and the Law** Enrico Bonadio, Caterina Sganga, 2024-06-14 Non Fungible Tokens NFTs have emerged as an important medium for the creation sale and collection of art with many major business and fashion houses creating their own NFT projects This book investigates the eruption of NFT crypto art and its impact on copyright law Chapters address topics at the intersection between AI smart contracts data science copyright law and arts administration With snapshots of the ongoing heated debates around copyright law the book investigates whether NFTs violate copyright and moral rights the liability of NFTs platforms impacts on ethical issues such as counterfeiting The first book published on this emergent topic this book offers a comprehensive overview of opportunities and challenges raised by NFTs to copyright law and more generally to the regulation and economics of the creative and cultural industries The book is addressed to law and tech enthusiasts as well as academics students practitioners and policy makers interested in the intersection between copyright rules and new forms of technology

Professor of Psychiatry University of Hull      Intellectual Property Law Lionel Bently, Brad Sherman, Dev Gangjee, Phillip Johnson, 2022 Intellectual Property Law is the definitive textbook on this subject an all embracing and detailed guide to intellectual property law It clearly sets out the law in relation to copyright patents trade marks passing off and confidentiality whilst enlivening the text with illustrations and diagrams      European and International Media Law Jan Oster, 2017 This unique textbook offers a comprehensive overview of European and international media law and how globalised communication has shaped it      **Artificial Intelligence, Design Law and Fashion** Hasan Kadir Yilmaztekin, 2022-12-30 Artificial intelligence AI now infiltrates our culture After a couple of difficult winters AI today is a word on everybody's lips and it attracts everyone's attention regardless of whether they are experts or not From Apple's Siri to Amazon's Alexa Tesla's auto driving cars to facial recognition systems in CCTV cameras Netflix's film offering services to Google's search engine we live in a world of AI goods The advent of AI powered technologies increasingly affects people's lives across the globe As a tool for productivity and cost efficiency AI also shapes our economy and welfare AI generated designs and works are becoming more popular Today AI technologies can generate several intellectual creations Fashion is one of the industries that AI can profoundly impact AI tools and devices are currently being used in the fashion industry to create fashion models fabric and jewellery designs and clothing When we talk about AI generated designs we instead focus on the fruits of innovation more best selling apparels more fashionable designs and more fulfilment of customer expectations without paying heed to who the designer is Designers invest a lot of talent time and finances into designing and creating each article of clothing and accessory before they release their work to the public Pattern drafting is the first and most important step in dressmaking Designers typically start with a general sketch on paper add styles elements and colours revise and refine everything and finally deliver their design to dressmakers AI accelerates this time consuming and labour intensive process Yet the full legal consequences of AI in fashion industry are often forgotten An AI device's ability to generate fashion designs raises the question of who will own intellectual property rights over the fashion designs Will it be the fashion designer who hires or contracts with the AI programmer Will it be the programmer Will it be the AI itself Or will it be a joint work of humans and computers And who will be liable for infringement deriving from use of third party material in AI generated fashion designs This book explores answers to these questions within the framework of EU design and copyright laws It also crafts a solution proposal based on a three step test and model norms which could be used to unleash the authors rights holders and infringers around AI generated fashion designs      **Research Handbook on Intellectual Property and Artificial Intelligence** Ryan Abbott, 2022-12-13 This incisive Handbook offers novel theoretical and doctrinal insights alongside practical guidance on some of the most challenging issues in the field of artificial intelligence and intellectual property Featuring all original contributions from a diverse group of international thought leaders including top academics judges regulators and eminent practitioners it offers timely perspectives and research on the relationship of AI to copyright

trademark design patent and trade secret law      *Intellectual Property Protection of Fact-based Works* Robert Brauneis, 2009-01-01 The 1991 US Supreme Court decision in *Feist Publications Inc v Rural Telephone Service Co* held that factual matter is not subject to copyright protection because it is not original to the author thus dramatically rejecting a two century old tradition of protecting factual compilations under copyright The contributors to this book reassess this decision and its implications particularly for the protection of electronic databases The debate over fact based works has grown still more complicated since *Feist* with the enactment of worldwide initiatives that extend the protection of databases such as the European Union's Database Directive A number of legal scholars have voiced their opinions on how Congress should react to the Court's decision and the Database Directive but none have put forth a viable solution or questioned the debate's underlying assumptions The contributors to this insightful book turn their attention to these overlooked aspects approaching the protection of factual matter from a range of perspectives policy historical comparative empirical and philosophical The range of viewpoints and disciplines represented in this compelling book will be of great interest to students scholars and lawyers working in the area of intellectual property law      **The Cambridge Handbook of Private Law and Artificial Intelligence**

Ernest Lim, Phillip Morgan, 2024-03-28 AI appears to disrupt key private law doctrines and threatens to undermine some of the principal rights protected by private law The social changes prompted by AI may also generate significant new challenges for private law It is thus likely that AI will lead to new developments in private law This Cambridge Handbook is the first dedicated treatment of the interface between AI and private law and the challenges that AI poses for private law This Handbook brings together a global team of private law experts and computer scientists to deal with this problem and to examine the interface between private law and AI which includes issues such as whether existing private law can address the challenges of AI and whether and how private law needs to be reformed to reduce the risks of AI while retaining its benefits      **Transnational Intellectual Property Law**

Robert P. Merges, Seagull Haiyan Song, 2018-04-27 As companies and organisations increasingly operate across national boundaries so the incentive to understand how to acquire deploy and protect IP rights in multiple national jurisdictions has rapidly increased Transnational Intellectual Property Law meets the need for a book that introduces contemporary intellectual property as it is practiced in today's global context Focusing on three major IP regimes the United States Europe and China the unique transnational approach of this textbook will help law students and lawyers across the world understand not only how IP operates in different national contexts but also how to coordinate IP protection across numerous national jurisdictions International IP treaties are also covered but in the context of an overall emphasis on transnational coordination of legal rights and strategies

Developments in Intellectual Property Strategy Nadia Naim, 2024-02-16 Research in the area of intellectual property IP is increasingly relevant to the rapidly growing artificial intelligence AI and robotics industries affecting the legal business manufacturing and healthcare sectors This contributed volume aims to develop our understanding of the legal and ethical

challenges posed by artificial intelligence and robotics technologies and the appropriate intellectual property based legal and regulatory responses It provides a philosophical and legal framework for considering concepts and principles that relate to the development and use of such technologies at the international regional and national levels The legal discourse in IP concerns the ever growing AI sector and how businesses can protect their IP and incorporate AI Moral sentiments often take a back seat to market sentiments even in shaping the direction of ethical business strategy This anomaly persists despite growing interest in ethics and IP Taking an interdisciplinary and diverse perspective this book enriches the evolving definition and scope of IP literature by focusing on actors products and regulation that shape the business sector Considering the gap between theory and practice this book bridges academic and professional knowledge in unpacking legal ethical and governance issues in the intellectual property industry In an effort to include as many viewpoints as possible contributions have been gathered from diverse fields including business ethics governance law philosophy and technology studies This book will appeal to academics in the field of intellectual property business ethics AI emerging technologies and strategic innovation as well as practitioners and policy makers Chapter 2 is available open access under a Creative Commons Attribution 4.0 International License via Springerlink [Research Handbook on Design Law](#) Henning Hartwig, 2021-05-28 Written by expert scholars and practitioners this unique Research Handbook presents the state of the art in research on and the practice of international design law Combining cutting edge research with a practical approach it examines key trends and covers key cases regional and national laws as well as concepts of international design protection In particular the U S framework is compared with the regime of the EU and issues relating to the Hague Agreement are also covered
