The Fate of Desire James S. Hans, 1990-07-05 The Fate of Desire examines the problems of living in a decentered world Assuming that the poststructuralist declaration of the end of man is an essential aspect of our current ways of thinking the book focuses on the positive values inherent in this shift In substituting multiplicity and fields of play for identity and hierarchy and in distinguishing between desire as fullness and desire as lack Hans argues for a vision of existence that is based on the difficulties Nietzsche posited as an inevitable part of fully affirming the rich but tragic nature of life These reconceptions of the human scene redefine self discipline in terms of understanding and loving one's fate Instead of providing yet one more critique of the flawed values through which the Western world has constituted itself The Fate of Desire takes up the task of weighing the things of the world anew revaluing them in terms of our present understanding of our positions in the world Hans suggests that if we are fated to be driven by desire and if we are led to accept the ways in which our desire manifests itself according to our own individual fates there is still every reason to believe that humans can find a productive way of understanding and fully occupying their place in the world Process Photogram, 1895 Night Cries C. Committee on Governmental Affairs, 1982 On Hunger Laura Westra, 2017-09-15 On Hunger focuses on the interface between food and public health and on the flawed regulations intended to protect us Food not only represents nourishment for the body it also possesses other valuable aspects that are protected by international

legal instruments Westra argues for the importance of effecting radical changes to protect and improve the present system of food production and distribution Starting from several reports produced by the FAO and the WHO Westra argues for the need of a complete and radical re evaluation of current practices and systems in order to meet the obligation of the international community to prevent hunger There is a particular emphasis on the problems facing the poor in the third world but also the different but equally grave problems of those in developed countries where the emphasis remains on corporate profit rather than on the protection of individuals as present dangers affect all starting from the children of all ages Most of the existing literature on hunger and food does not address the harm that current practices inflict on people globally Laura Westra's *On Hunger* focuses on the interface between food and public health and on the flawed regulations intended to protect us Food not only represents nourishment for the body it also possesses other valuable aspects that are protected by international legal instruments Westra argues for the importance of effecting radical changes to protect and improve the present system of food production and distribution This timely book explores every aspect of this challenge from the impact of climate change the role of the media and obligations to future generations Westra also considers the legality of financial contributions on the part of agribusiness to political figures and campaigns as well as their intrusion in the drafting of bills and regulatory regimes Finally the book highlights more positive developments including the expansion of the remit of the International Criminal Court to include environmental crimes *On Hunger* offers an original take on this increasingly important issue and will provide fascinating reading for scholars and students in law philosophy and human rights
