Individual Schools, Unique Solutions Adrian Raynor, 2013-04-15 Effective school leadership depends on developing an understanding of people organisational learning and organisational processes However each school has a unique set of circumstances Prescriptions for leadership that apply to one school may well not apply to another Individual Schools Unique Solutions turns away from the highly prescriptive management practices that often fail to provide a workable solution to specific problems in schools Adrian Raynor demonstrates that by understanding the process influencing any situation a creative solution can be achieved The book draws on systems theory and aspects of complexity theory While addressing many of the issues commonly faced by headteachers the principles described are equally important for all levels of school management and the book will be of interest to all those in management positions in schools Ultimately this book is about developing effective leadership through understanding and is a guide to thinking afresh rather than looking for another quick fix prescription

Developing Leadership in the Asia Pacific Sivanes Phillipson, Shane N. Phillipson, 2013-11-26 Developing Leadership in the Asia Pacific focuses on the design of leadership programs that are able to

meet the needs of students teachers and the wider community Rather than taking an all encompassing approach that cover all contexts of leadership development this book is based on research that guides the leadership teacher in designing a course that takes into account the specific context and needs of individual students the purpose of the course and how the course can be evaluated for its effectiveness Emphasising learner diversity the book argues that the students specific cultural and educational contexts need to be taken into account when designing leadership programs Although these courses are often taught outside of the regular curriculum components of leadership can be found in the regular curriculum Accordingly this book helps the leadership teacher to integrate the leadership program with the regular curriculum through the use of guiding questions quizzes case studies dilemmas and other pedagogical strategies It links research with practice scaffolding teachers in understanding the content or issues described in each chapter assisting them in building a fully defensible leadership program A number of real life worked examples are also provided throughout each chapter as a practicable framework that can be used in teaching design for everyday units of work This book is a useful reference for researchers working in leadership as well as an essential tool for teachers developing leadership programs for students in primary secondary or tertiary contexts
