Altopascio A Study In Tuscan Rural Society 1587 1784:

Altopascio Frank McArdle, 2005-11-24 The aim of the book is to gauge the impact of the general European crisis upon a regional society and to assess the contribution of agrarian economic and social trends towards that crisis *Altopascio, 1587-1784* Francis Brian McArdle, 1974 *Singlewomen in the European Past, 1250-1800* Judith M. Bennett, Amy M. Froide, 2013-02-01 When we think about the European past we tend to imagine villages towns and cities populated by conventional families married couples and their children Although most people did marry and pass many of their adult years in the company of a spouse this vision of a preindustrial Europe shaped by heterosexual marriage deceptively hides the well established fact that in some times and places as many as twenty five percent of women and men remained single throughout their lives Despite the significant number of never married lay women in medieval and early modern Europe the study of their role and position in that society has been largely neglected *Singlewomen in the European Past* opens up this group for further investigation It is not only the first book to highlight the important minority of women who never married but also the first to address the critical matter of differences among women from the perspective of marital status Essays by leading scholars among them Maryanne Kowaleski Margaret Hunt Ruth Mazo Karras Susan Mosher Stuard Roberta Krueger and Merry Wiesner deal with topics including the sexual and emotional relationships of singlewomen the economic issues and employment opportunities facing them the differences between the lives of widows and singlewomen the conflation of singlewomen and prostitutes and the problem of female slavery The chapters both illustrate the roles open to the singlewoman in the thirteenth through eighteenth centuries and raise new perspectives about the experiences of singlewomen in earlier times

The Undevelopment of Capitalism Rebecca Jean Emigh, 2009 In *The Undevelopment of Capitalism* Emigh argues that the expansion of the Florentine economic market in the fifteenth century helped to undo the development of markets of other economies especially the rural economy of Tuscany As this highly developed urban market penetrated rural regions it actually erased rural market institutions that rural inhabitants had used to organize agricultural production and family life Thus an advanced economy at the time of the late Middle Ages and early Renaissance undeveloped over time The economic development of this region in Italy was delayed as it failed to keep pace with the rest of Europe Using a negative case methodology to show how urban and rural markets change Emigh employs methods of historical sociology and sectoral theories to examine how markets can prosper and suffer at the same time She shows how sectoral relations are crucial to transitions to capitalism and how capitalist development can also contract markets *Sicily and the Hellenistic Mediterranean World* D. Alex Walthall, 2024-02-22 Using archaeological and documentary evidence this book reveals the innerworkings of the Sicilian kingdom of the Hellenistic monarch Hieron II *Charity, Self-Interest And Welfare In Britain* Martin Daunton, 2005-10-26 First published in 1996 These essays present a statement on the long term development of welfare policy in Britain Relating to current issues such as the cost of pensions this work examines provisions

for the poor infirm and aged over four centuries of British history The Family in Roman Egypt Sabine R.

Huebner,2013-07-04 This study captures the dynamics of the everyday family life of the common people in Roman Egypt a social strata that constituted the vast majority of any pre modern society but rarely figures in ancient sources or in modern scholarship The documentary papyri and above all the private letters and the census returns provide us with a wealth of information on these people not available for any other region of the ancient Mediterranean The book discusses such things as family composition and household size and the differences between urban and rural families exploring what can be ascribed to cultural patterns economic considerations and or individual preferences by setting the family in Roman Egypt into context with other pre modern societies where families adopted such strategies to deal with similar exigencies of their daily lives Lille and the Dutch Revolt Robert S. DuPlessis,2002-05-09 This comprehensive study explains why Lille was renowned for adhering to the existing order Coping with Crisis: The Resilience and Vulnerability of Pre-Industrial Settlements Daniel R. Curtis,2016-05-13 Why in the pre industrial period were some settlements resilient and stable over the long term while other settlements were vulnerable to crisis Indeed what made certain human habitations more prone to decline or even total collapse than others All pre industrial societies had to face certain challenges exogenous environmental hazards such as earthquakes or plagues economic or political hazards from outside such as warfare or expropriation of property or hazards of their own making such as soil erosion or subsistence crises How then can we explain why some societies were able to overcome or negate these problems while other societies proved susceptible to failure as settlements contracted stagnated were abandoned or even disappeared entirely This book has been stimulated by the questions and hypotheses put forward by a recent disaster studies literature in particular by placing the intrinsic arrangement of societies at the forefront of the explanatory framework Essentially it is suggested that the resilience or vulnerability of habitation has less to do with exogenous crises themselves but on endogenous societal responses which dictate a the extent of destruction caused by crises and the capacity for society to protect itself and b the capacity to create a sufficient recovery By empirically testing the explanatory framework on a number of societies between the Middle Ages and the nineteenth century in England the Low Countries and Italy it is ultimately argued in this book that rather than the protective functions of the state or the market or the implementation of technological innovation or capital investment the most resilient human habitations in the pre industrial period were those than displayed an equitable distribution of property and a well balanced distribution of power between social interest groups Equitable distributions of power and property were the underlying conditions in pre industrial societies that all

Niccolò Ridolfi and the Cardinal's Court Lucinda Byatt,2022-08-29 Niccol Ridolfi 1501 50 was a Florentine cardinal nephew and cousin to the Medici popes Leo X and Clement VII and he owed his status and wealth to their patronage He remained actively engaged in Florentine politics above all during the years of crisis that saw the Florentine state change from republic to duchy A widely respected patron and scholar throughout his life his sudden death

during the conclave of 1549-50 led to allegations of poison that an autopsy appears to confirm This book examines Cardinal Ridolfi and his court in order to understand the extent to which cardinalate courts played a key part in Rome's resurgence and acted as hubs of knowledge located on the fault lines of politics and reform in church and state hospitable spaces that can be analysed in the context of entanglements in Florentine and Roman cultural and political patronage and intersections between the princely court and a more professional and complex knowledge and practice of household management in the consumer and service economy of early modern Rome Based on an array of archival sources and on three treatises whose authors were closely linked to Ridolfi's court this monograph explores these multidisciplinary intersections to allow the more traditional fields of church and political history to be approached from different angles Niccolò Ridolfi and the Cardinal's Court will appeal to all those interested in the organisation of these elite establishments and their place in sixteenth century Roman society the life and patronage of Niccolò Ridolfi in the context of the Florentine exiles who desired a return to republicanism and the history of the Roman Catholic Church

Hunger and the Sword Paul Erdkamp, 2023-01-16 Roman wars like those of later times took place in a landscape a landscape not only consisting of mountains plains and rivers but also of men tilling the soil travelling across sea or land or employing other means in their struggle for survival and even happiness This book undertakes to examine Roman wars in this context of the natural and human environment Roman warfare is generally examined from the viewpoint of the ancient authors on whose narratives our understanding depends As a consequence however Roman wars seem to have become events that took place on the pages of a book rather than in the environment of the Mediterranean world The way Roman wars were fought was determined by the geography and climate of the Mediterranean peninsulas by the ecological restraints on agriculture and transport and by the economic and social structures of the society of which the armies were a significant part This book relates warfare to one of the main conditions of survival it examines on the one hand the food supply of the many thousands that manned the Roman armies and on the other the impact of war on the food supply of those people not waging war

Sources and Methods of Historical Demography J. Dennis Willigan, Katherine A. Lynch, 2013-10-22 Sources and Methods of Historical Demography covers the fundamental sources methods and approaches to explanatory modeling for describing analyzing and understanding demographic features of past societies The book discusses the intellectual ancestry of historical demographic research beginning in the 17th century as well as the logic of basic techniques for reconstructing and analyzing information from fundamental source materials The text also describes the full range of disciplines that have made major contributions to historical demography and examples of empirical research The book concludes by arguing the case for conducting historical demographic research with a broad interdisciplinary ideal in mind Historians and sociologists will find the book invaluable

The Emperor and His Chancellor John M. Headley, 1983-02-24 This study examines a significant development within late medieval and early modern European government set in the context of the tense relations between the young Emperor

Charles V and his ageing chancellor Mercurino de Gattorna. It focuses upon an important transformation in the administrative reorganisation of European monarchies: the shift in the political centre of gravity from the medieval institution of the chancellery as the secretariat for all government business and authentication to a small group of secretaries, the minister of a later age acting directly in collaboration with the prince. In the collision between the traditional judicial and administrative pre-eminence of the late medieval chancellor and the new secretaries as expeditors of the Renaissance prince's will, Charles gave his support to the latter, thus associating himself with the previous work of Ferdinand the Catholic. Against the background of this struggle with the state secretaries, the imperial chancellery is analysed in its relations to the individual chancelleries of Charles V's disparate lands.

The Cambridge Economic History of Modern Europe: Volume 1, 1700-1870
 Stephen Broadberry, Kevin H. O'Rourke, 2010-06-24 Unlike most existing textbooks on the economic history of modern Europe which offer a country by country approach, *The Cambridge Economic History of Modern Europe* rethinks Europe's economic history since 1700 as unified and pan-European, with the material organised by topic rather than by country. This first volume is centred on the transition to modern economic growth which first occurred in Britain before spreading to other parts of western Europe by 1870. Each chapter is written by an international team of authors who cover the three major regions of northern Europe, southern Europe and central and eastern Europe. The volume covers the major themes of modern economic history including trade, urbanization, aggregate economic growth, the major sectors of agriculture, industry and services, and the development of living standards including the distribution of income. The quantitative approach makes use of modern economic analysis in a way that is easy for students to understand.

Italy and the Islamic World Ali Humayun Akhtar, 2024-03-31 *Italy and the Islamic World* tells the story of how Italian cities have been centres of international exchange for centuries, linking Europe with the most storied marketplaces of the Middle East and North Africa. From the Ancient Roman period and the Renaissance to the rise of the Italian Republic, Italy has been a global crossroads for more than two millennia. In Ali Humayun Akhtar's new picture of European history, Italy's debates about trade with its southern neighbours evoke an earlier era of encounters, one that sheds light on where the EU is heading today.

Theory and History
 Jairus Banaji, 2010 The twelve essays in this book demonstrate the importance of bringing history back into historical materialism. They combine the discussion of Marx's categories with historical work on a wide range of themes and periods: the early middle ages, Asiatic regimes, agrarian capitalism, etc.

The Kingdom of Valencia in the Seventeenth Century
 James Casey, 2008-10-14 Explores two major themes in Spanish historiography: the consequences of the expulsion of the Moriscos and the way in which the Habsburg Monarchy kept or lost control over its peripheral provinces.

Rouen During the Wars of Religion Philip Benedict, 2004-01-22 This book examines the history of a single French community over the full course of the civil wars.

Filippo Strozzi and the Medici Melissa Meriam Bullard, 2008-10-30 Filippo Strozzi (1489-1538), the Florentine aristocrat and banker, is usually remembered for the dramatic exploits at the end of his life. Forced into exile

he became an outspoken defender of the last Florentine Republic against the tyranny of the city's new dukes. His place in Florentine history however changes drastically when we focus not on his final years but on his extensive career as a Medici favourite and loyal financier. At the courts of the Medici popes he furthered the grandiose schemes of Leo X and Clement VII and accumulated a personal fortune of legendary size. Dr Bullard's study reassesses Strozzi's place in Renaissance history and considers the more general problems of paper economy and war finance and Florentine political life in the early sixteenth century. It documents the intricate financial ties between Florence and the papal court and Strozzi's key role as a manipulator of the city's public funds to pay for papal wars.
