Alliance Politics Cornell Studies In Security Affairs:

Alliance Politics Glenn Herald Snyder, 1997 Using cases from 1879 to 1914 to illustrate a theory of alliance formation and management in a multipolar international system he focuses on Austria Germany Austria Germany Russia and France Russia and examines twenty two episodes of intra alliance bargaining

Becoming Rivals Brandon Valeriano, 2013 Rivalries are a fundamental aspect of all international interactions The concept of rivalry suggests that historic animosity may be the most fundamental variable in explaining and understanding why states commit international violence against each other By understanding the historic factors behind the emergence of rivalry the strategies employed by states to deal with potential threats and the issues endemic to enemies this book seeks to understand and predict why states become rivals The recent increase in the quantitative study of rivalry has largely identified who the rivals are but not how they form and escalate Questions about the escalation of rivalry are important if we are to understand the nature of conflictual interactions This book addresses an important research gap in the field by directly tackling the question of rivalry formation In addition to making new contributions to the literature this book will summarize a cohesive model of how all interstate rivalries form by using both quantitative and qualitative methods and sources

The Quest for Security Jesse Tumblin, 2019-10-31 Colonial hierarchy and race fueled rapid militarization in the British Empire that shaped the violent course of the twentieth century This innovative study reveals the colonial backstory of a century that witnessed total war resulting in new political norms that enthrone national security as the dominating feature of contemporary politics

Rethinking Security in East Asia J. J. Suh, Peter J. Katzenstein, Allen Carlson, 2004 Is East Asia heading towards war This text makes a case for a new theoretical approach called analytical eclecticism by the authors to the study of Asian security

The Burden-Sharing Dilemma Brian D. Blankenship, 2023-11-15 The Burden Sharing Dilemma examines the conditions under which the United States is willing and able to pressure its allies to assume more responsibility for their own defense The United States has a mixed track record of encouraging allied burden sharing while it has succeeded or failed in some cases it has declined to do so at all in others This variation Brian D Blankenship argues is because the United States tailors its burden sharing pressure in accordance with two competing priorities conserving its own resources and preserving influence in its alliances Although burden sharing enables great power patrons like the United States to lower alliance costs it also empowers allies to resist patron influence Blankenship identifies three factors that determine the severity of this burden sharing dilemma and how it is managed the latent military power of allies the shared external threat environment and the level of a patron s resource constraints Through case studies of US alliances formed during the Cold War he shows that a patron can mitigate the dilemma by combining assurances of protection with threats of abandonment and by exercising discretion in its burden sharing pressure Blankenship s findings dismantle assumptions that burden sharing is always desirable but difficult to obtain Patrons as the book reveals can in fact be reluctant to seek burden sharing and attempts to pass defense costs to allies can

often be successful At a time when skepticism of alliance benefits remains high and global power shifts threaten longstanding pacts The Burden Sharing Dilemma recalls and reconceives the value of burden sharing and alliances Rivalry and Alliance Politics in Cold War Latin America Christopher Darnton,2014-06-30 The success or failure of foreign policy initiatives in Latin America is heavily influenced by bureaucratic and military background players Rivalry and Alliance Politics in Cold War Latin America Christopher Darnton s comparative study of the nature of conflict between Latin American states during the Cold War provides a counterintuitive and shrewd explanation of why diplomacy does or doesn t work Specifically he develops a theory that shows how the parochial interests of state bureaucracies can overwhelm national leaders foreign policy initiatives and complicate regional alliances His thorough evaluation of several twentieth century Latin American conflicts covers the gamut of diplomatic disputes from border clashes to economic provocations to regional power struggles Darnton examines the domestic political and economic conditions that contribute either to rivalry continued conflict or rapprochement diplomatic reconciliation while assessing the impact of U S foreign policy Detailed case studies provide not only a robust test of the theory but also a fascinating tour of Latin American history and Cold War politics including a multilayered examination of Argentine Brazilian strategic competition and presidential summits over four decades three rivalries in Central America following Cuba s 1959 revolution and how the 1980s debt crisis entangled the diplomatic affairs of several Andean countries These questions about international rivalry and rapprochement are of particular interest to security studies and international relations scholars as they seek to understand what defuses regional conflicts creates stronger incentives for improving diplomatic ties between states and builds effective alliances The analysis also bears fruit for contemporary studies of counterterrorism in its critique of parallels between the Cold War and the Global War on Terror its examination of failed rapprochement efforts between Algeria and Morocco and its assessment of obstacles to U S coalition building efforts **Secret Alliances** Matthew Millard,2025-07-15 This topical book explores key motivating factors in the formation and dissolution of secret alliances between states Matthew Millard examines the role of a variety of different factors in the formation endurance and termination of secret alliances analyzing key case studies across Africa Asia and Europe that showcase the consequences of broken secret alliances Using historical examples and quantitative data Millard discusses why states refrain from institutionalizing their covert alliances evaluating whether these are more or less enduring than public ones The Weaker Voice and the Evolution of Asymmetric Alliances Andrea Leva,2023-10-24 Military alliances are a constant feature in international politics and a better understanding of them can directly impact world affairs This book examines why alliances endure or collapse As a distinctive feature it analyses asymmetric alliances focusing on the junior allies decision to continue or terminate a military agreement It deepens our knowledge of alliance cohesion and erosion investigating the relevance of the weaker side s preferences and behavior in alliance politics The author examines the literature on alliance persistence and termination and puts forward a theoretical model that helps interpret historical and

contemporary cases in a way that is useful for expert researchers and non expert readers alike *Coalition Politics and the Iraq War* Daniel F. Baltrusaitis, 2010 Why do states join ad hoc military coalitions What motivated South Korea to contribute significantly to the Iraq War coalition of the willing while such steadfast allies as Turkey and Germany resisted US pressure to become burden sharing partners Drawing on his extensive examination of South Korean German and Turkish politics in the approach to and during the Iraq War Daniel Baltrusaitis offers an in depth analysis of how domestic political dynamics critically influence a state s level of material and diplomatic support to coalitions of choice *Coping with Caveats in Coalition Warfare* Gunnar Fermann, 2018-09-01 This book develops a framework for analysis and a set of research strategies to better understand the conditions and mechanisms involved in the considerable use of caveats by states contributing militarily to coalition operations In the professional language of military servicemen security analysts and decision makers caveats refers to the reservations on the use of force states put on their military contingents as a precondition to participate in particular multinational enforcement operations Such understood caveats are an instrument of statecraft and foreign policy However caveats also are a potential threat to the integrity and military effectiveness of the coalition force in question and further down the road an erosion on the fabric of security alliances This volume is ideal for audiences interested in military and defence studies security studies and coalition warfare **The Oxford Handbook of International Relations**

International Relations David A. Lake, Robert Powell, 2020-05-05 The strategic choice approach has a long pedigree in international relations In an area often rent by competing methodologies editors David A Lake and Robert Powell take the best of accepted and contested knowledge among many theories With the contributors to this volume they offer a unifying perspective which begins with a simple insight students of international relations want to explain the choices actors make whether these actors be states parties ethnic groups companies leaders or individuals This synthesis offers three new benefits first the strategic interaction of actors is the unit of analysis rather than particular states or policies second these interactions are now usefully organized into analytic schemes on which conceptual experiments may be based and third a set of methodological bets is then made about the most productive ways to analyze the interactions Together these elements allow the pragmatic application of theories that may apply to a myriad of particular cases such as individuals protesting environmental degradation governments seeking to control nuclear weapons or the United Nations attempting to mobilize member states for international peacekeeping Besides the editors the six contributors to this book all distinguished scholars of international relations are Jeffrey A Frieden James D Morrow Ronald Rogowski Peter Gourevitch Miles Kahler and Arthur A Stein Their work is an invaluable introduction for scholars and students of international relations economists and government decision makers
