A Mind at a Time Mel Levine, 2002-04-04 Different minds learn differently writes Dr Mel Levine one of the best known education experts and pediatricians in America today And that's a problem for many children because most schools still cling to a one size fits all education philosophy As a result these children struggle because their learning patterns don't fit the schools they are in In A Mind at a Time Dr Levine shows parents and others who care for children how to identify these individual learning patterns He explains how parents and teachers can encourage a child's strengths and bypass the child's weaknesses This type of teaching produces satisfaction and achievement instead of frustration and failure Different brains are differently wired Dr Levine explains There are eight fundamental systems or components of learning that draw on a variety of neurodevelopmental capacities Some students are strong in certain areas and some are strong in others but no one is equally capable in all eight Using examples drawn from his own extensive experience Dr Levine shows how parents and children can identify their strengths and weaknesses to determine their individual learning styles For example some students are creative and write imaginatively but do poorly in history because weak memory skills prevent them from retaining facts Some students are weak in sequential ordering and can't follow directions They may test poorly and often don't do well in mathematics In these cases Dr Levine observes the problem is not a lack of intelligence but a learning style that doesn't fit the assignment Drawing on his pioneering research and his work with thousands of students Dr Levine shows how parents and teachers can develop effective strategies to work through or around these weaknesses It's taken for granted in adult society that we cannot all be generalists skilled in every area of learning and mastery Nevertheless we apply tremendous pressure to our children to be good at everything They are expected to shine in math reading writing speaking spelling memorization comprehension problem solving and none of us adults can do all this observes Dr Levine Learning begins in school but it doesn't end there Frustrating a child's desire to learn will have

lifelong repercussions This frustration can be avoided if we understand that not every child can do equally well in every type of learning We must begin to pay more attention to individual learning styles to individual minds urges Dr Levine so that we can maximize children s learning potential In A Mind at a Time he shows us how **Covert Racism** ,2011-06-09 Covert racism subtle in application often appears hidden by norms of association affiliation group membership and or identity As such covert racism is often excused or confused with mechanisms of exclusion and inclusion ritual and ceremony acceptance and rejection Covert racism operates as a boundary keeping mechanism whose primary purpose is to maintain social distance between racial majorities and racial minorities Such boundary mechanisms work best when they are assumed natural legitimate and normal These boundary mechanisms are typically taught subconsciously or even unconsciously within social institutions and groups This volume deals with the theories institutions and experiences associated with covert racism
