Almost History:

A Short History of (Nearly) Everything Paranormal Terje G. Simonsen, 2020-06-09 This is the most entertaining and broad survey of the paranormal ever made combining forgotten lore evidence from parapsychological experiments and the testament of scientists archaeologists anthropologists psychologists physicists and philosophers and also quite a few celebrities Exploring the possibility that paranormal phenomena may be and that some most likely are objectively real this travelogue through the twilight zone of human consciousness is both scientifically rigorous and extremely entertaining

History of England During the Reign of George the Third John George Phillimore, 1863 Perspectives on the History of Ancient Near Eastern Studies Agnès Garcia-Ventura, Lorenzo Verderame, 2020-10-20 The present volume collects eighteen essays exploring the history of ancient Near Eastern studies Combining diverse approaches synthetic and analytic diachronic and transnational this collection offers critical reflections on the who why and how of this cluster of fields How have political contexts determined the conduct of research How do academic agendas reflect larger social economic and cultural interests How have schools of thought and intellectual traditions configured and sometimes predetermined the study of the ancient Near East Contributions treating research during the Nazi and fascist periods examine the interpenetration of academic work with politics while contributions dealing with specific national contexts disclose fresh perspectives on individual scholars as well as the conditions and institutions in which they worked Particular attention is given to scholarship in countries such as Turkey Portugal Iran China and Spain which have hitherto been marginal to historiographic accounts of ancient Near Eastern studies In addition to the editors the contributors are Selim Ferru Adali Silvia Alaura Isabel Almeida Petr Charv t Parsa Daneshmand Eva von Dassow Hakan Erol Sebastian Fink Jakob Flygare Pietro Giammellaro Carlos Gonçalves Katrien de Graef Steven W Holloway Ahmed Fatima Kzzo Changyu Liu Patrick Maxime Michel Emanuel Pfoh Jitka Skorov Ludk Vac n and Jordi Vidal **A Short History of Nearly Everything** Bill Bryson, 2010-03-02 The ultimate eye opening journey through time and space A Short History of Nearly Everything is the biggest selling popular science book of the 21st century and has sold over 2 million copies Possibly the best scientific primer ever published Economist Truly impressive It s hard to imagine a better rough guide to science Guardian A travelogue of science with a witty engaging and well informed guide The Times Bill Bryson describes himself as a reluctant traveller but even when he stays safely at home he can t contain his curiosity about the world around him A Short History of Nearly Everything is his quest to understand everything that has happened from the Big Bang to the rise of civilization how we got from there being nothing at all to here being us Bill Bryson s challenge is to take subjects that normally bore the pants off most of us like geology chemistry and particle physics and see if there isn t some way to render them comprehensible to people who have never thought they could be interested in science As a result A Short History of Nearly Everything reveals the world in a way most of us have never seen it before *How History Gets Things Wrong* Alex Rosenberg, 2019-08-13 Why we learn the wrong things from narrative

history and how our love for stories is hard wired To understand something you need to know its history Right Wrong says Alex Rosenberg in *How History Gets Things Wrong* Feeling especially well informed after reading a book of popular history on the best seller list Don't Narrative history is always always wrong It's not just incomplete or inaccurate but deeply wrong as wrong as Ptolemaic astronomy We no longer believe that the earth is the center of the universe Why do we still believe in historical narrative Our attachment to history as a vehicle for understanding has a long Darwinian pedigree and a genetic basis Our love of stories is hard wired Neuroscience reveals that human evolution shaped a tool useful for survival into a defective theory of human nature Stories historians tell Rosenberg continues are not only wrong but harmful Israel and Palestine for example have dueling narratives of dispossession that prevent one side from compromising with the other Henry Kissinger applied lessons drawn from the Congress of Vienna to American foreign policy with disastrous results Human evolution improved primate mind reading the ability to anticipate the behavior of others whether predators prey or cooperators to get us to the top of the African food chain Now however this hard wired capacity makes us think we can understand history what the Kaiser was thinking in 1914 why Hitler declared war on the United States by uncovering the narratives of what happened and why In fact Rosenberg argues we will only understand history if we don't make it into a story
