The Italian Renaissance Altarpiece David Ekserdjian,2021-06-22 The altarpiece is one of the most distinctive and remarkable art forms of the Renaissance period It is difficult to imagine an artist of the time whether painter or sculptor major or minor who did not produce at least one Though many have been displaced or dismembered a substantial proportion of these works still survive Despite the volume of material available no serious attempt has ever been made to examine the whole subject in depth until now The Italian Renaissance Altarpiece is the first comprehensive study of the genre to examine its content and subject matter in real detail from the origins of the altarpiece in the 13th century to the time of Caravaggio in the early 1600s It discusses major developments in the history of these objects throughout Italy covers the three key categories of Renaissance altarpiece *immagini* icons *historie* narratives and *misteri* mysteries and is illustrated with 250 beautiful reproductions of the artworks
