Quantum Closures and Disclosures Gordon G. Globus, 2003-04-28 Quantum Closures and Disclosures thinks together two seemingly irreconcilable discourses An application of quantum field theory to brain functioning called quantum brain dynamics and the continental postphenomenological tradition especially the work of Martin Heidegger and Jacques Derrida Underlying both developments is a new ontology of nonCartesian dual modes whose rich provenance is their between World is disclosed in the lumen naturale of dual modes belonging together in their between all presencing is a function of a conjugate form of match in the between This surprising rapprochement between a powerful tradition within continental philosophy and the 20th century quantum revolution in science is fruitfully applied to crucial issues in philosophy brain science mathematics and psychiatry Related Titles Quantum Brain Dynamics and Consciousness An introduction edited by Mari Jibu and Kunio Yasue 1995 and My Double Unveiled The dissipative quantum model of the brain by Giuseppe Vitiello 2001

The How and Why of UFOs Kenneth W. Behrendt, 2011-04 The How and Why of UFOs is the much anticipated sequel to Kenneth W Behrendt s previous groundbreaking work on the subject Secrets of UFO Technology The present work begins with a detailed review of the revolutionary anti mass field theory explanation for UFO propulsion and its secondary effects which is critical to understanding how these craft can easily overcome the usual limitations imposed by gravity and inertia upon our present massive earthly air and spacecraft This cutting edge theory is then applied to several classic UFO cases to provide previously unsuspected insights into them Even the often overlooked topic of small automated alien probes is explored as a highly detailed probe case personally investigated by the author is presented and analyzed in order to reveal the amazing interior structures of the object sighted After providing an analysis of the planets of origin of advanced spacefaring extraterrestrial beings the possible reasons for their visitations to our Earth are considered The author then goes on to describe the most likely biological mechanism behind the mental telepathy process that is the principle mode of communication for most extraterrestrial beings and even suggests a variety of simple methods that might actually allow human researchers to communicate with the alien pilots of the UFOs now operating in Earth s atmosphere All of this is only a small sample of the many intriguing topics awaiting the reader in this abundantly illustrated volume The many revelations found in The How and Why of UFOs are sure to delight and intrigue any student of ufology who wishes to explore this fascinating subject at its very

Nahum, MD, 2014-10-31 We all try to predict what will occur in our lives We routinely orchestrate events in the present in an attempt to influence what we'd like to see happen in the future But despite our best efforts everything doesn't always go according to plan The question is why In *Predicting the Future: Can We Do It? And If Not, Why Not?* author Dr Gerard G Nahum offers a comprehensive answer to this question He provides a framework of explanations as to why we find ourselves in the situations we do concerning our ability or inability to predict and influence the future Nahum illustrates why the predicaments we encounter often have much more to do with the fundamental physical constraints of the universe that we live in rather than anything man made Page 4 of cover
