Alternatives For Welfare Policy Coping With Internationalisation And Demographic Change:

Alternatives for Welfare Policy Torben M. Andersen, Per Molander, 2003-08-21 Demographic change and increasingly international markets are putting severe pressure on developed welfare states in the OECD countries The contributors to this book assess the magnitude of these challenges and discuss in depth and in concrete terms what policy options are open to meet them Looking at public service production social insurance tax policy and debt policy they examine the main costs and benefits associated with an extensive welfare state and ask whether the same objectives can be reached with a welfare regime that is less costly They also discuss whether the organization of the welfare state is capable of meeting future challenges facing a changing society This rigorous analysis draws on empirical material from OECD countries with a focus on the Scandinavian countries

Lost in Mobility? Indre Genelyte, 2018-10-24 This thesis seeks to make both theoretical and empirical contributions to the understanding of intra EU mobility with a focus on labour migration from Lithuania to Sweden Inspired by a critical realist perspective the thesis aims to help to explain the dynamics and individual decision making behind mass labour emigration from the Baltic states its socioeconomic consequences and policy responses Theoretically the thesis proposes a model that synthesizes a social transformation approach with an extended version of Hirschman's analytical framework of exit voice and loyalty The three empirical articles based mainly on semi structured interviews are situated within this framework Two of the articles seek to explain the migrants decision making process of stay exit entrance in the context of the structural institutional social changes that followed 1 independence from the Soviet Union in 1990 2 EU accession in 2004 and 3 the 2008 2009 economic crisis with austerity The third article brings into the debate the perspective of the sending Baltic countries in a broader context of the East West migration debate The dissertation shows that the consequences of the neoliberal policies of the post communist and post crisis transformations together with the construction of formal migration channels after EU accession constitute various migrant categories Individual strategies of actively looking for channels to exit and enter combining them in different ways at various points of the migratory process and establishing informal social networks are re constituting who can be and who is a migrant Furthermore following the economic crisis and austerity measures the decision to emigrate extends beyond individual survival strategies instead becoming bound to an individual's perception of the ine quality of life and pursuit of a better quality of life for oneself and one's family across time and in different places Finally as the interviewed Baltic experts agree the EU's policy of the free movement is socially and economically problematic although the official Baltic states policy responses focus primarily on talented and needed diaspora members return or engagement These policies have proved to be inadequate to address demographic and socioeconomic challenges in part brought about by emigration The structural institutional conditions states and migrants strategies engender mobility as a social norm in the sending countries and promote and constitute the perpetuation of migration of both precarious labour migrants and active talented EU mobile citizens Avhandlingen avser att

bidra både teoretiskt och empiriskt till vår kunskap om den fria rörligheten inom EU med fokus på arbetskraftsmigration från Litauen till Sverige. Inspirerad av kritisk realism som samhällsvetenskaplig metod syftar den till att förklara såväl dynamiken i som det individuella beslutsfattandet bakom den omfattande arbetsutvandringen från de baltiska staterna samt att diskutera dess socioekonomiska konsekvenser och politiska inverkan. Teoretiskt utgör avhandlingen från en modell som syntetiserar social transformation med en utsträckt version av Hirschmans analytiska ramverk för sorti, protest och lojalitet. De tre empiriska artiklarna som huvudsakligen bygger på semistrukturerade djupintervjuer ligger inom detta ramverk. Två av artiklarna syftar till att förklara migranternas beslutsprocess i fråga om stay, exit, entrance mot bakgrund av de strukturella och institutionella sociala förändringarna som följde av 1) självständighetsförklaringen från Sovjetunionen 1990, 2) anslutningen till EU 2004 och 3) den ekonomiska krisen 2008-2009 med följande tidsstramningar. Den tredje artikeln för in de baltiska ländernas eget perspektiv i den bredare svenska ställiga migrationsdebatten. Avhandlingen visar att följder av den postkommunistiska neoliberal politiken och omvandlingen efter den ekonomiska krisen tillsammans med uppbyggnaden av formella migrationskanaler efter anslutningen till EU bidrar till att skapa olika migrantkategorier. Individuella strategier för att aktivt leta efter kanaler för exit och enter kombineras med olika sätt och utifrån olika stadier i migrationsprocessen samt etablera informella sociala nätverk bidrar till att rekonstituera vem som kan vara och vem som är en migrant. Vidare efter den ekonomiska krisen och de införda tidsstramningarna handlar beslutet om att emigrera inte bara om individuella överlevnadsstrategier utan också om individuella uppfattningar om vad som är livskvalitet och inte på engelska *ine quality of life* liksom strävan efter en bättre livskvalitet för sig själv och sin familj över tid och rum. Slutligen som de intervjuade baltiska experterna är överens om är EU:s politik för fri rörlighet socialt och ekonomiskt problematiskt även om den officiella baltiska politiken i första hand fokuserar på begärd och nödvändiga diasporamedlemmars engagemang eller tervändande. Denna politik har visat sig vara otillräcklig för att ta itu med demografiska och socioekonomiska utmaningar som delvis orsakades av utvandring. De strukturella, institutionella förhållandena och staternas och migranternas strategier skapar rörlighet som en social norm i länder med framträdande utvandring och bidrar till fortsatt migration både vad gäller prekär arbetskraftsmigranter och aktiva och begärd EU-mobila medborgare.

Institutional Competition Andreas Bergh, Rolf Höijer, 2008-01-01. This book has much to commend it because of the richness and diversity of the issues addressed. Indira Rajaraman Tax Justice Focus. The volume offers substantial insights into the nature of institutional competition focusing mostly on governmental institutions and shows the many subtleties in understanding and analyzing the role of institutions. Institutional competition is a small subset of institutional analysis but an important one and while the volume does cover the more familiar tax and expenditure topics it also delves more deeply into the subject. Randall G. Holcombe Public Choice. While economists typically praise the merits of competition among market-based enterprises they are not so sure when it comes to competition among institutions, especially governments. I am aware of no better source for thoughtful reflection on

competition among institutions than the ten essays presented in this book Richard E Wagner George Mason University US Why is competition between institutions usually viewed in a negative light when competition is considered positive in most other economic contexts The contributors to this volume introduce new perspectives on this issue analytically and empirically exploring reasons for this perception Negative assessments of institutional competition emphasize that such competition may lead to a race to the bottom in terms of eroding government revenues redistributing wealth from workers to capitalists and limiting democracy by forcing politicians to prioritize international investment capital rather than working for their voters In this volume however many of the essays draw attention to the positive learning and information effects The contributors conclude that competition may actually lead to institutions becoming more efficient in allocating resources Students and scholars of economics political economy international relations and political science will find the book s non traditional take on institutional competition a must read as will policy analysts and those with an interest in taxation and welfare states

Dealing with the Fragmented International Legal Environment Turki Althunayan, 2009-12-02 Taxes are sometimes so fundamental to domestic systems that they are almost impossible to change as when the tax system is part of a nation s majority religion or is linked to another value deeply rooted in local communities such as housing or farming There is a danger in the WTO a Geneva based entity making decisions for people living in distant locations with regard to tax issues related to their local needs and wants The Saudi Arabian tax system exemplifies the tension between religion tax and trade because tax has a role in the country s religion and is an essential part of its laws Therefore there is a need for maintaining a delicate balance between local needs and international commitments with respect to taxation This book aims to show directions in which legal order can be preserved as much as possible from within each country and yet not imposed upon them and which will help build a peaceful bridge between local and international factors that are important to shaping the global order

Latin American Development Priorities Bjørn Lomborg, 2010-01-28 Many countries in Latin America and the Caribbean have achieved considerable economic growth yet the region still faces many seemingly intractable problems The conventional wisdom in development agencies that prioritization is impossible and that everything must be done is simply not effective Latin American Development Priorities shows how limited resources could be used for the greatest benefit of the Latin American and Caribbean region A panel of economists met over three days in San Jos to review proposals to tackle the ten most important challenges which emerged from a survey by the Inter American

Development Bank The expert panel was asked a question which appears simple but is actually very difficult to answer What should Latin American governments do with an additional nominal 10 billion Hard choices are needed if Latin America's problems are to be tackled effectively This book provides the means to make those choices as objectively as possible

Economic Performance in the Nordic World Torben M. Andersen, 2021-08-31 The Nordic model rests on two pillars the social safety net and the provision of services like education childcare and healthcare for all It can also be characterized as an employment model since its financial viability depends upon a high labor participation rate with very few working poor Economist Torben M Andersen lays out the model's structure and highlights factors important for understanding its economic performance He then looks into specific policy areas based on Denmark's experiences and addresses the challenges arising from new technologies and globalization

Collective Bargaining and Wage Formation Hannu Piekola, Kenneth Snellman, 2005-12-06 Hannu Piekola and Kenneth Snellman ETLA The Research Institute of the Finnish Economy Helsinki Finland The Labour Institute for Economic Research Helsinki Finland 1 The Basic Issues Wages have traditionally been agreed on collectively in Europe The articles in this volume examine the current state of collective bargaining as well as the challenges it is currently facing The issues examined in these papers have a wide applicability to problems on the European labour markets Torben M Andersen and Steinar Holden review challenges from globalisation and inter industry trade and the adaptation to a low inflation environment The other contributions are part of the project investigating collective bargaining in Finland carried out by ETLA the Research Institute of the Finnish Economy and the Labour Institute for Economic Research Some of them use results from a Finnish survey carried out by the two institutes ETLA and the Labour Institute on the views of employers and employees about labour relations and the labour market negotiation system Bargaining systems are complex and their future development depends on their historical evolution recent and past experiences and the current situation in the labour market as well as changes in the international environment By examining the past functioning of the bargaining system one can observe how different elements in it have interacted with various factors in the environment of the system

Ageing and the German Economy Bertelsmann Stiftung, 2010-07-30 Until now most studies of how demographics and economics are linked have limited themselves to the ways that changes in a population's overall size influence economic development As Ageing and the German Economy demonstrates such undertakings have systematically underestimated the economic consequences of societal ageing This work examines the impact that demographic shifts will have on key economic factors in Germany and 18 other countries EU 15 member states the US Japan China and India between now and 2050 The variables examined include GDP savings investment and inflation Just one finding among many is that by 2050 ageing populations will cause GDP growth rates to be smaller than is generally anticipated

Gesellschaften mit einem hohen Maß an sozialer Gerechtigkeit ein vorbildlicher Wohlfahrtsstaat und leistungsfähige Volkswirtschaften ein. Der Rest Europas blickt mit Neid auf die Spitzenplätze der nordischen Länder in den PISA Studien. Von außen betrachtet erscheinen die Länder Skandinaviens als homogene Einheit. Die Gesellschaften sind so der Eindruck mit sich selbst im Reinen. Auf der Habenseite haben die skandinavischen Länder viel gemeinsam. Ist in Skandinavien wirklich alles besser? Wie erklärt sich der bildungspolitische Erfolgskurs? Was macht eigentlich die nordeuropäische Politik aus? Kann man überhaupt von dem Norden sprechen? Diese Leitfragen beantwortet das vorliegende Buch.

Gender and Social Security Reform Neil Gilbert, 2017-07-05 Aging populations are creating tremendous pressures on social security systems throughout the world, lifting the need for reform to the top of policy agendas. Proposed reforms often have different implications for men and women. At the same time, traditional family and gender roles are changing with the decline in fertility rates and the rapid rise in women's participation in the paid labor force. While trying to adapt social security systems to the fiscal demands of aging societies, policymakers face the compelling challenge of how to design pension reforms that achieve fair outcomes for women. *Gender and Social Security Reform* examines how different countries are attempting to meet this challenge. Drawing on comparative studies of European and Latin American countries along with a series of case studies of individual countries, the book provides insights into the gender dimensions of alternative designs for reform. All of the countries studied have recently reformed or are about to reform their pension systems with a clear trend towards tightening the link between contributions and benefits in order to secure the long-term sustainability of pensions. The book also alerts policymakers to other issues: Should pension systems be gender neutral or compensate for inequalities in paid and unpaid labor? Does compensation preserve gender discrimination? Are unisex life tables a reliable or fair redistributive tool for women? Or should annuities be linked directly to life expectancy, differentiated by sex and potentially other factors? Does a minimum pension guarantee risk compromising the principle of individual responsibility and work? How can recognition for caring work be balanced with work incentives? What can be done to help social security systems preserve freedom of choice in terms of work-family balance for women, men, or the modern family unit as a whole? In analyzing the gender implications of recent social security policies and practices.
