A-Z Guide to Modern Social and Political Theorists Professor Stuart Sim, Noel Parker, 2014-06-03 The A Z Guide to Modern Social and Political Theories is a companion volume to the already published A Z Guide to Modern Literary and Cultural Theorists It ranges widely through the social sciences and related areas to identify thinkers who have had a major impact on the development of modern social and political theory and given clear accessible summaries of their work While the accent is on the later twentieth century several up and coming theorists are included to ensure a contemporary edge to the volume classic names in the field from the earlier twentieth century are not neglected and the collection also delves back into the nineteenth century for such founding figures of the social sciences as Marx and Comte The volume is therefore both up to date and mindful of the sources of modern debates

Scientific Theology: Reality Alister E. McGrath, 2002-11-01 The second volume of an extended and systematic exploration of the relation between Christian theology and the natural sciences focussing on the examination and defense of theological realism

Scientific Theology: Reality Alister E. McGrath, 2007-01-23 The second volume of an extended and systematic exploration of the relation between

Christian theology and the natural sciences focussing on the examination and defense of theological realism **Divergent Paths: The Hegelian foundations of Marx's method** Norman Levine, 2006-01-01 Divergent Paths is the first in a series of three volumes that explores the historiography of the relationship between Hegel and Marx it sets the terms of the relationship between Marx and Engels and explores the genesis of the theories of Marxism and Engelsism from the late 19th century to the present day Given the vast pool of contemporary post Marxist theoretical work a study like this is sorely needed This is the most thorough exploration of Marx's ideas from Hegel through to the present day and is absolutely essential reading *Concrete Critical Theory: Althusser's Marxism* William S. Lewis, 2021-12-06 Taking an analytic and historical approach this work develops and defends Althusserian critical theory This theory it is argued produces knowledge of how a particular class of people in a particular time in a particular place is dominated oppressed or exploited Moreover without relying on a general notion of human emancipation concrete critical theory can suggest political means for the alleviation of these conditions Because it puts Althusser's ideas in dialogue with contemporary social science and philosophy the book as a whole makes contributions to Althusser studies to Anglo American political philosophy and to current debates in the philosophy of the social sciences *International Review of Social History*, 1996 **Lenin and the End of Politics** A. J. Polan, 2017-04-21 Originally published in 1984 this book reconsiders the effect of Lenin on the politics and culture of the 20th Century In a detailed examination of Lenin's famous text *The State and Revolution* the author argues that the peculiar status of this work presents readers with major problems of interpretation and shows how a failure to identify these problems has prevented an adequate understanding of important issues in modern politics history and social theory The book compares Lenin's radical utopia with the ideas of politics offered by other theorists centrally Weber and Sartre but also writers such as Jefferson and Habermas This original approach shows the impact of Lenin's text on political history and theory and leads to a new understanding of the connection between revolution and violence social change and authoritarianism *European Political Thought, 1815-1989* Spencer M. Di Scala, 2019-03-08 This book presents an overview of European political thought from the fall of Napoleon Bonaparte in 1815 to the fall of the Berlin Wall in 1989 by placing the major ideas within their historical context including discussions of major twentieth century totalitarian movements **The Age of Structuralism**, 1996-01-01 Structuralism began in linguistics and was enlarged by Claude Levi Strauss into a new way of thinking that views our world as consisting of relationships between structures we create rather than of objective realities The Age of Structuralism examines the work of seven writers who either expanded upon or reacted against Levi Strauss In a panoramic overview of the origins of deconstructionism and its critics Edith Kurzweil offers a lucid and penetrating portrait of the movement that dominated French intellectual life for much of the postwar era and which continues to influence the French intellectual milieu She explains Levi Strauss's strikingly original contributions then proceeds to illuminate the ideas of crusaders and critics The key figures dealt with include Louis Althusser who reinterpreted

Marxism through a rereading of Marx's texts with the help of structuralist techniques Henri Lefebvre who remained faithful to Marx's humanism and was one of the earliest and most vehement critics of structuralism Paul Ricoeur whose phenomenology sought to reconcile ethical theory and intellectual pursuits Alain Touraine a socialist whose sociology of political action led him to dismiss structuralist concerns Jacques Lacan who criticized ego oriented psychoanalytic theory and practice and whose own work emphasized linguistic structures in psychoanalysis Roland Barthes whose literary criticism in its determination to reject all false notions and systems led to a highly idiosyncratic approach that drew upon all systems and finally Michel Foucault whose social histories of deviance medicine psychology grammar language sexuality criminology have reexamined every facet of social theory Placing these major figures in the context of political historical and psychoanalytic currents of the time *The Age of Structuralism* is a commanding and far reaching study of a decisive epoch in intellectual history Kurzweil's new opening essay explains how these towering figures prefigured current emphasis on semiotics post structuralism deconstruction and post postmodernism Kurt H Wolff called it lucid splendid and unobtrusive when the book first appeared It remains a central work in the appreciation of the French giants upon whose shoulders the new crop of thinkers expect to stand

Divergent Paths Norman Levine, 2006-02-13 *Divergent Paths* is the first volume of a groundbreaking three volume work Its purpose is to explore the relationship between Hegel and Marx to define the relationship between Hegel and Engels and to distinguish between the theories of Marxism and Engelsism Marx used Feuerbach towards the critique and ultimate transformation of Hegel's phenomenology and humanism This transformation which cut out Hegel's idealism by identifying the environment in which people produced their sustenance as the subject of history marks the genesis of historical materialism Marx continued to use Hegel's logical categories In chapter three of *Divergent Paths* Norman Levine conducts an in depth study of Marx's 1841 doctoral dissertation *The Difference Between Democritus and Epicurus Philosophy of Nature* It is the center of gravity and controversy of Levine's study Placed alongside Hegel's *Philosophy of History* Levine isolates the categories Marx appropriated from Hegel to show conclusively that Marx was not a dialectical materialist Levine then claims that Engels totally distorted the Hegelian legacy and this debasement is enshrined in his 1887 essay *Ludwig Feuerbach and The End of Classical German Philosophy* Levine brilliantly locates Marxism as the theory of Marx and Engelsism the theory of Engels According to Levine both embodied a separate view of history and society and their contradictions are expressive in part of their divergent receptions of Hegel This is an analysis like no other published to date with two more volumes planned Philosophers sociologists anthropologists and historiographers of Marx and Engels cannot afford to miss this study

Twentieth-century European Cultural Theorists Paul Hansom, 2001 Presents biographies of the men and women who wrestled with the complex theoretical problems of twentieth century culture Many of the theorists treated in this volume are concerned with the effects of mass culture technology and consumerism

Althusser Gregory Elliott, 2020-05-05 In the international renaissance of Marxist theory during the 1960s

and early 1970s few projects generated as much excitement or controversy as Louis Althusser's return to Marx. One of the most ambitious enterprises in the post-war history of Marxism, Althusser's reconstruction of Marx's doctrine was heralded as a new start in some quarters, dismissed as a refurbished Stalinism in others. Today more than twenty years after the appearance of his major works and amidst the profound contemporary crisis of Marxism, Althusser is the victim rather than the beneficiary of philosophical fashion. Paradoxically, the oblivion into which he has now fallen affords the opportunity for a return to Althusser, a reassessment that advances beyond the unconsidered responses that Marxist commentators have often given to his work. In this first full-scale study in English of Althusser's career, Gregory Elliott draws on a wide range of untranslated material, surveying the political and intellectual context of Althusser's initiative in *For Marx* and *Reading Capital*. He analyses the nature of the Marxism developed in these works and charts their author's subsequent evolution, concluding with a balance sheet of the French Marxist's contribution to historical materialism. At once sympathetic and critical, Althusser's *The Detour of Theory* will establish itself as the standard introduction to its subject.

Marxism, Intellectuals and Politics D. Bates, 2006-11-27 What ought the political role of the intellectual to be? What challenges does the post-structuralist project present for Marxist accounts of the intellectual? This text, which includes important contributions from authors such as Montag and Sayers, considers different attempts by Marxist and post-Marxist writers to theorize these questions.

History of Structuralism: The rising sign, 1945-1966 François Dosse, 1997 Content Description Includes bibliographical references and index.

Marxism-Leninism and the Theory of International Relations V. Kubalkova, A. Cruickshank, 2015-10-14 Refuting the assumption that orthodox Marxist theory contains anything of relevance on international relations, this book, originally published in 1980, clarifies, reconstructs and summarizes the theories of international relations of Marx and Engels, Lenin, Stalin and the Soviet leadership of the 1970s. These are subjected to a comparative analysis and their relative integrity is examined both against one another and against selected Western theories. Marxist-Leninist models of international relations are fully explored, enabling the reader to appreciate the essence and evolution of fundamental Soviet concepts such as proletarian socialist internationalism, peaceful co-existence, national liberation movement and détente.
