Alvaro Siza, 1988 Alvaro Siza Álvaro Siza, Alexandre Alves Costa, 1988 **Contemporary Art and Multicultural Education** Susan Cahan, Zoya Kocur, 1996 Contemporary Art and Multicultural Education is the first book of its kind to address the role of art within today's multicultural education. Co published with The New Museum of Contemporary Art this beautifully illustrated book is a practical resource for art educators and students. Co published with the New Museum of Contemporary Art The Routledge Companion to Architectural Drawings and Models Federica Goffi, 2022-05-30 Architectural drawings and models are instruments of imagination, communication and historical continuity. The role of drawings and models and their ownership, placement and authorship in a ubiquitous digital age deserve careful consideration. Expanding on the well established discussion of the translation from drawings to buildings, this book fills a lacuna in current scholarship questioning the significance of the lives of drawings and models after construction. Including emerging well known and world renowned scholars in the fields of architectural history and theory and curatorial practices, the thirty five contributions define recent research in four key areas: drawing sites, sites of knowledge construction, drawing office construction, site the afterlife of drawings and models, archiving, collecting, displaying and exhibiting, tools of making architectural representations and their apparatus over time and the ethical responsibilities of collecting and archiving, authorship, ownership, copyrights and rights to copy. The research covers a wide range of geographies and delves into the practices of such architects as Sir John Soane, Superstudio, Eugène Emmanuel Viollet le Duc, Frank Lloyd Wright, Wajiro Kon, Germán Samper Gnecco, A. P. S. Mies van der Rohe and Renzo Piano Alvaro Siza Peter Testa, Álvaro Siza, 1996

Architecture for Spain's Recovered Democracy Manuel López Segura, 2023-03-30 Historical studies on the involvement of architecture in twentieth century politics have overlooked its contribution to building Spain's democracy. This pioneering book seeks to fill that void. Between the late 1970s and early 1990s Spain founded representative institutions, launched its welfare state and devolved autonomy to its regions. The study brings forth the architectural incarnation of that threefold program as it deployed in the Valencian Country, a Catalan speaking region on Spain's Mediterranean shores. There social democratic authorities mobilized architects, planners and graphic artists to devise a newly open public sphere and to recover a local identity that Franco's dictatorship had repressed for decades. The research follows the impetus of reform and its contradictions through urban projects, designs for cultural amenities and the renovation of governmental and professional bodies. Architecture for Spain's Recovered Democracy contributes to current debates on nationalism and the arts, the environments of democratic socialism and postmodernism and neoliberalism. As a result, it widens our understanding of how peripheral regions may yield egalitarian architectures of resistance. This book is written for students and researchers in architecture and planning, art history, spatial politics and Hispanic studies as well as for a general readership interested in inclusive politics in the built environment The Hybrid Practitioner Caroline Voet, Eireen Schreurs, Helen

Thomas,2022-09-01 Exploring different interrelated roles for the architect and researcher The practice of architecture manifests in myriad forms and engagements Overcoming false divides this volume frames the fertile relationship between the cultural and scholarly production of academia and the process of designing and building in the material world It proposes the concept of the hybrid practitioner who bridges the gap between academia and practice by considering how different aspects of architectural practice theory and history intersect opening up a fascinating array of possibilities for an active engagement with the present The book explores different interrelated roles for practicing architects and researchers from the reproductive activities of teaching consulting and publishing through the reflective activities of drawing and writing to the practice of building The notion of the hybrid practitioner will appeal strongly to students teachers and architectural practitioners as part of a multifaceted professional environment By connecting academic interests with those of the professional realm The Hybrid Practitioner addresses a wider readership embracing landscape design art theory and aesthetics European history and the history and sociology of professions The Migrant's Time Saloni Mathur,2011-09-27 The conditions of alienation and exclusion are inextricably linked to the experience of the migrant This ground breaking volume explores both the increasing emergence of the theme of migration as a dominant subject matter in art as well as the ways in which the varied mobilities of a globalized world have radically reshaped art s conditions of production reception and display In a wide ranging selection of essays fourteen distinguished scholars in the fields of visual studies art history literary studies global studies and art criticism explore the universality of conditions of global migration and interdependence inviting a rethinking of existing perspectives in postcolonial transnational and diaspora studies and laying the foundation for empirical and theoretical directions beyond the terms of these traditional frameworks *Architecture and Identity* Peter Herrle,Erik Wegerhoff,2008 This book brings together complex fields of knowledge and globally splintered discourses on a subject that is experienced not only by scholars but in the everyday lives of people around the world There is a common complaint about the loss of identity which to a substantial degree is being associated with the built environment in cities and specifically with their architecture Architecture and Identity takes a global multidisciplinary look on how identities in contemporary architecture are constructed The general hypothesis underlying this book is that in a globalized world identity in architecture cannot be easily derived from distinct indigenous patterns The book presents forty contributions from various disciplines aiming to destroy the myth of an inheritable or otherwise prefabricated identity Some authors dismantle constructs of identity that have long been considered as solid and unbreakable while others meticulously unravel the construction process of identities in Tools for Ideas Christian Gänshirt,2012-10-11 Architects today must position themselves within an extremely wide ranging field of qualifications This makes it all the more important to have a fresh introduction to the field that makes up one of their core competences the field of design This introductory presentation describes and analyzes the theories strategies and tools of creative design for the purposes of practical work With

thoughtfulness and expertise it opens the reader's eyes to the processes that underlie design and demonstrates different ways of communicating about complex design work. The first section focuses on the much-discussed relationship between design and research between architecture and the sciences. The second section describes basic design approaches from Vitruvius and Alberti through Erwin Panofsky and Wolfgang Kemp to Otl Aicher and Vilém Flusser. The third and largest section presents the elementary tools of design from gestures and words through drawings, models, and simulations to critique all as instruments of creative design in architecture and its related fields.

Resisting Postmodern Architecture Stylianos Giamarellos, 2022-01-10 Since its first appearance in 1981, critical regionalism has enjoyed a celebrated worldwide reception. The 1990s increased its pertinence as an architectural theory that defends the cultural identity of a place resisting the homogenising onslaught of globalisation. Today its main principles such as acknowledging the climate, history, materials, culture, and topography of a specific place are integrated in architects' education across the globe. But at the same time the richer cross-cultural history of critical regionalism has been reduced to schematic juxtapositions of the global with the local. Retrieving both the globalising branches and the overlooked cross-cultural roots of critical regionalism, *Resisting Postmodern Architecture* resituates critical regionalism within the wider framework of debates around postmodern architecture, the diverse contexts from which it emerged, and the cultural media complex that conditioned its reception. In so doing it explores the intersection of three areas of growing historical and theoretical interest: postmodernism, critical regionalism, and globalisation. Based on more than 50 interviews and previously unpublished archival material from six countries, the book transgresses existing barriers to integrate sources in other languages into anglophone architectural scholarship. In so doing it shows how the periphery was not just a passive recipient but also an active generator of architectural theory and practice. Stylianos Giamarellos challenges long-held central notions of supposedly international discourses of the recent past and outlines critical regionalism as an unfinished project apposite for the 21st century on the fronts of architectural theory, history, and historiography.

matières 9: espace architectural, 2008-01-01 Pour la critique et l'histoire de l'architecture le mot espace a-t-il de plus en plus employé pour décrire les bâtiments ? Partir de la fin du XIXe siècle il demeurerait jusqu'alors absent du vocabulaire architectural. Mais ses significations sont complexes et quelquefois floues, notamment lorsque la perception de l'espace implique le déplacement, c'est-à-dire le dur ou le temps. Ses significations peuvent être aussi diverses. L'objectif de cette neuvième livraison de *matières* est d'approcher la question de l'espace à partir de plusieurs points de vue. Les contributions proc

dent des lectures de dispositifs architecturaux spécifiques reviennent sur des notions rebattues comme celle d'espace temps et mettent des hypothèses susceptibles d'approfondir des connaissances ou de déplacer les lignes d'explication habituelles

Historia crítica de la arquitectura moderna Kenneth Frampton, 2024-04-02 Desde su primera edición en 1980 la Historia crítica de la arquitectura moderna de Kenneth Frampton se ha convertido en un clásico imprescindible dentro de la bibliografía académica sobre historia de la arquitectura moderna En esta quinta edición ampliamente revisada y actualizada el autor ha añadido una nueva y extensa sección que explora al detalle la evolución del Movimiento Moderno en la arquitectura en todo el mundo a finales del siglo xx y principios del xxi En ella se examinan las diversas formas en que los arquitectos no solo responden a los contextos geográficos climáticos materiales y culturales sino que siguen también distintas líneas de enfoque en relación a la topografía la morfología la sostenibilidad y la forma crítica

The Projective Cast Robin Evans, 2000-08-25 Robin Evans recasts the idea of the relationship between geometry and architecture drawing on mathematics engineering art history and aesthetics to uncover processes in the imagining and realizing of architectural form Anyone reviewing the history of architectural theory Robin Evans observes would have to conclude that architects do not produce geometry but rather consume it In this long awaited book completed shortly before its author's death Evans recasts the idea of the relationship between geometry and architecture drawing on mathematics engineering art history and aesthetics to uncover processes in the imagining and realizing of architectural form He shows that geometry does not always play a stolid and dormant role but in fact may be an active agent in the links between thinking and imagination imagination and drawing drawing and building He suggests a theory of architecture that is based on the many transactions between architecture and geometry as evidenced in individual buildings largely in Europe from the fifteenth to the twentieth century From the Henry VII chapel at Westminster Abbey to Le Corbusier's Ronchamp from Raphael's S. Eligio and the work of Piero della Francesca and Philibert Delorme to Guarino Guarini and the painters of cubism Evans explores the geometries involved asking whether they are in fact the stable underpinnings of the creative intuitive or rhetorical aspects of architecture In particular he concentrates on the history of architectural projection the geometry of vision that has become an internalized and pervasive pictorial method of construction and that until now has played only a small part in the development of architectural theory Evans describes the ambivalent role that pictures play in architecture and urges resistance to the idea that pictures provide all that architects need suggesting that there is much more within the scope of the architect's vision of a project than what can be drawn He defines the different fields of projective transmission that concern architecture and investigates the ambiguities of projection and the interaction of imagination with projection and its metaphors

Rethinking Global Modernism Vikramaditya Prakash, Maristella Casciato, Daniel E. Coslett, 2021-11-22 This anthology collects developing scholarship that outlines a new decentred history of global modernism in architecture using postcolonial and other related theoretical frameworks By both revisiting the canons of modernism and seeking to

decolonize and globalize those canons the volume explores what a genuinely global history of architectural modernism might begin to look like Its chapters explore the historiography and weaknesses of modernism s normative interpretations and propose alternatives to them The collection offers essays that interrogate transnationalism in new ways reconsiders the agency of the subaltern and the roles played by infrastructures materials and global institutions in propagating a diversity of modernisms internationally Issues such as colonial modernism architectural pedagogy cultural imperialism and spirituality are engaged With essays from both established scholars and up and coming researchers this is an important reference for a new understanding of this crucial and developing topic Museums for a New Millennium Stanislaus von Moos,Friedrich Achleitner,1999 Contemporary museum buildings are often pure manifestations of the architectural concepts of their designers making them interesting not only as functional buildings but as a seismograph of architectural culture as well
