Schuchman,2019-08-29 As the population of older adults in the U S continues to grow medical house calls are increasingly part of a system of comprehensive home based care for patients who have difficulty accessing office based care Clinicians who have been trained mostly in office and hospital settings must adapt their usual approaches to accommodate a wide range of environmental social and physical circumstances that impact home limited patients Ideally a comprehensive team of clinicians proficient in multiple domains of functional social and medical care can work together to address potential gaps in any one clinician s expertise Unfortunately such teams are still rare This book aims to equip individual clinicians with the interdisciplinary knowledge skills and perspective they need to provide the best care possible with limited formal

interdisciplinary support This book offers 20 patient cases drawn from the collective experience of experts in home based medical care from highly respected academic and clinical programs across the United States Each case demonstrates a scenario that is frequently encountered and or very important in home based medical care practice Each scenario frequently proves to be challenging for many professionals because it requires an approach or leverages aspects of care delivery that most are not trained in Additionally each scenario reflects an approach to care that is enhanced by interdisciplinary input Finally each case lends itself to a practical problem solving approach that could be accomplished by most home based medical care providers even in the absence of an interdisciplinary team Written by interdisciplinary experts in geriatric home based care this book serves as both an educational tool for learners in all related disciplines as well as a quick reference for experienced clinicians looking to augment their existing house call toolbox
