Building a Leadership Pipeline for Deans in Business Schools Wolfgang Amann,2021-02-01 The management education industry is in flux Industry trends such as commercialisation

internationalisation consolidation and intensifying competition increase the level of adversity and the challenges that business school leaders face. Recurring crises aggravate the situation and challenge established solutions. A key question is therefore: How do we ensure that adequately qualified and highly motivated individuals rise to the upper echelons? In business schools, dynamics do not naturally encourage leadership development. Younger scholars must master research or teaching skills, none of which represent the core skill set needed to lead a business school. Leadership pipelines with clearly defined stages have been in use in the non-academic corporate sector for a while. This book presents research on the potential for business schools to rely on such pipelines. The proposed substantive grounded theory suggests a better depiction of the phenomenon, analogy-wise as well as semantics-wise, by proposing a leadership canal. Several fundamental assumptions diverge, such as leadership development for deans being less linear, less cumulative, less sequential, less one-directional, to name but a few features.

Investing in the Educational Success of Black Women and Girls Lori D. Patton, Venus Evans-Winters, Charlotte Jacobs, 2023-07-03

In the powerful essays that make up *Investing in the Educational Success of Black Women and Girls*, Black women and girls are listened to, appreciated and valued in recognition of the unrelenting challenges to our existence in a world that continues to be committed to stifling our voices. What these authors know intimately is that such stifling is not because what Black women and girls are saying isn't important. It is precisely because it is. This book names the challenges Black women and girls continue to experience as we pursue our education and offers implications and recommendations for practitioners, teachers, administrators and policymakers. It needs to be read widely and deeply studied as much for its formations and beautiful representations of Black women and girls as its recommendations. It is the truth telling we need today and a groundbreaking resource we need today and beyond.

Cynthia B Dillard, Nana Mansa II of Mpeasem, Ghana, Athens, Georgia and Cape Coast, Central Region, Ghana.

While figures on Black women and girls' degree attainment suggest that as a group they are achieving in society, the reality is that their experiences are far from monolithic. That the educational system from early on and through college imposes barriers and inequities, pushing many out of school, criminalizing their behavior and leading to a high rate of incarceration. The purpose of this book is to illuminate scholarship on Black women and girls throughout the educational pipeline. The contributors, all Black women educators, scholars and advocates, name the challenges Black women and girls face while pursuing their education as well as offer implications and recommendations for practitioners, policymakers, teachers and administrators to consider in ensuring the success of Black women and girls. This book is divided into four sections, each identifying the barriers Black girls and women encounter at the stages of their education and offering strategies to promote their success and agency within and beyond educational contexts. In Part One, the contributors explore the importance of mattering for Black girls in terms of redefining success and joy, centering Black girl literacy pedagogies that encourage them to thrive, examining how to make STEM more accessible to them and recounting how Black girls' emotions and emotional literacy can either disempower them or promote their sense of

agency to navigate educational contexts Part Two uncovers the violence directed toward and the criminalization of Black women and girls and how they are situated in educational and justice systems that collude to fail them The contributors address incarceration and the process of rehabilitation and reentry the outcomes of disciplinary action in schools on women who pursue college and describe how the erasure and disregard of Black women and girls leaves them absent from the educational policies that deeply affect their lives and wellbeing Part Three focuses on how Black women are left to navigate without resources that could make their collegiate pathways smoother covers how hair politics impact their acceptance in college leadership roles particularly at HBCUs illuminates the importance of social emotional and mental health for Black undergraduate women and the lack of adequate resources and explores how women with disabilities navigate higher education The final part of this book describes transformative approaches to supporting the educational needs of Black women and girls including the use of a politicized ethic of care intergenerational love and dialogue and constructing communities including digital environments to ensure they thrive through their education and beyond
