experimenting with what cognitive scientists call mindreading constantly devising new social contexts for making their audiences imagine complex mental states of characters and narrators In *The Secret Life of Literature* Lisa Zunshine uncovers these mindreading patterns which have until now remained invisible to both readers and critics in works ranging from *The Epic of Gilgamesh* to *Invisible Man* Bringing together cognitive science ethnography and literary studies this engaging book transforms our understanding of literary history Central to Zunshine's argument is the exploration of mental states embedded within each other as for instance when Ellison's *Invisible Man* is aware of how his white Communist Party comrades pretend not to understand what he means when they want to reassert their position of power Paying special attention to how race class and gender inform literary embeddings Zunshine contrasts this dynamic with real life patterns studied by cognitive and social psychologists She also considers community specific mindreading values and looks at the rise and migration of embedding patterns across genres and national literary traditions noting particularly the use of deception eavesdropping and shame as plot devices Finally she investigates mindreading in children's literature Stories for children geared toward different stages of development she shows provide cultural scaffolding for initiating young readers into a long term engagement with the secret life of literature
