this. The airstream was unheated so they might be slower than ordinary hair driers.

The TELLUS has a very wide range of optional extras, including a horse curry comb and a printer's type attachment. These were not tested.

Wear on Carpets

The amount of pile that a vacuum cleaner picks up depends on the age and type of the carpet. But we found that there were some differences between the cleaners.

A cleaner with strong suction will tend to pick up the bits of carpet pile already loose. As these will come away anyway, given time, this is not very important.

More important is the actual cleaning action, and the design of the carpet nozzle, which may tend to cut the pile, or work it loose.

Our tests were carried out on worn rubber-backed, needleloom (i.e. felted) carpet, chosen because preliminary trials showed that it tended to lose pile relatively easily, and would therefore show up any considerable differences between the cleaners.

The small VACTRIC could not be tested for carpet wear as two samples had broken down by the time this test was carried out. The TELLUS could not be assessed accurately because of the internal design of the machine.

The results in Table IV show that the HOTPOINT was heaviest on needleloom carpet, and all the other cleaners could be classified as moderate or light. Further tests were done with the HOTPOINT on Wilton and Axminster carpet to find out how important this carpet wear was. On the basis of the amount of pile picked up in these tests, CA thinks that the HOTPOINT could be used regularly for

thirty to sixty years before it wore down Axminster or Wilton, and it can be assumed that the other cleaners would take longer. In fact vacuum cleaners have little wearing effect on the carpet compared with the abrasive wear due to walking and treading in grit, and your carpet would almost certainly have a shorter life if you did not use a vacuum cleaner at all.

Easy to Use?

Weights of the cleaners, with flex, are given in Table IV. They varied from 6½ lb. for the hand-held SIEMENS RAPID DE LUXE to 19½ lb. for the REMOCO/SIEMENS. The HOTPOINT at 10 lb. was the lightest of the four uprights, none of which should be too heavy for most healthy women to carry about.

The tanks slide about on rails, runners or wheels. A trolley was provided with the TELLUS, but it was not very satisfactory: the cleaner tended to fall off the trolley when it was pulled by the hose, and the trolley tended to fall off the cleaner when the cleaner was picked up. The MORPHY-RICHARDS had a trolley as an optional extra (19s. 2d.). The cleaner and trolley together were very stable and easy to move about. Without the trolley the cleaner was hard to manoeuvre.

The HOOVER CONSTELLATION was also very easy to move about. When operating on suction the exhaust air was trapped in a cavity underneath, lifting the machine slightly clear of the floor. When used for blowing, however, it had to be rested on its side and was much less mobile.

The ELECTROLUX 65 was another model that was very manoeuvrable.
