Decorators of the 60s-70s Patrick Favardin, Guy Bloch-Champfort, 2015 The 1960s and 1970s marked a sharp turning point in the history of decoration and furniture Until that point the world was confined to national and elitist forms of expression At the beginning of the 1960s the sector took its inspiration from Anglo Saxon Scandinavian Italian and French decoration Genres were combined in a frenzied desire to live in symbiosis with one's time The progress of technology strengthened the conviction that the individual had unlimited freedom and aroused the desire to inhabit in a new manner Forms became rounder furniture was in sync with a warm playful and anticonformist universe Colors and decorative motifs took on the brilliance and fantasies of Pop Art and psychedelia The living environment was transformed into a waking dream in which luxurious furniture in original materials and surprising objects were mixed associated for the first time with early furniture The end of the 1970s marked the advent of a period in which beauty and classic elegance gave way to a host of expressions that were unclassifiable and rejected any hierarchy The postmodern period had arrived Composed of a long introduction that provides a synoptic view and 32 monographs that describe its many faces this book invites the reader to discover an exceptionally creative period and revels through an abundant iconography

Success in Agricultural Transformation Isabelle Tsakok, 2011-08-01 To lift and keep millions out of poverty requires that smallholder agriculture be productive and profitable in the developing world Do we know how to make this happen Researchers and practitioners still debate how best to do so The prevailing methodology which claims causality from measures of statistical significance is inductive and yields contradictory results In this book instead of correlations Isabelle Tsakok looks for patterns common to cases of successful agricultural transformation and then tests them against other cases

She proposes a hypothesis that five sets of conditions are necessary to achieve success She concludes that government investment in and delivery of public goods and services sustained over decades is essential to maintaining these conditions and thus successfully transform poverty ridden agricultures No amount of foreign aid can substitute for such sustained government commitment The single most important threat to such government commitment is subservience to the rich and powerful minority
