National Bureau of Standards. Technical Information and Publications Division,1978 **Organic Molecular Crystals** Edgar A. Silinsh,2012-12-06 This book is based on the results of many years of experimental work by the author and his colleagues dealing with the electronic properties of organic crystals E Silinsh has played a leading role in pointing out the importance of the polarization energy by an excess carrier in determining not only the character of the carrier mobility in organic crystals but in determining the band gap and the nature of the all important trapping site in these crystals The one electron model of electronic conductivity that has been so successful in dealing with inorganic semiconductors is singular ly unsuccessful in rationalizing the unusual physical properties of organic crystals A many body theory is required and the experimental manifestation of this is the central role played by the crystal polarization energies in transferring the results obtained with the isolated molecule to the solid The careful studies of E Silinsh in this field have

shown in detail how this polarization energy develops around the excess carrier and also the hole electron pair sitting on a molecular site in the crystal As with all insulators trapping sites play a dominant role in reducing the magnitude of the current that can theoretically pass through the organic crystal It is usually the case that these trapping sites are energetically distributed within the forbidden band of the crystal For many years an exponential distribution has shown itself to be useful and reasonably correct However E Engineering Dielectrics R. Bartnikas, Eugene Joseph McMahon, 1984-11

Condition Monitoring of Rotating Electrical Machines Peter Tavner, 2008-07-12 A first edition of Condition Monitoring of Electrical Machines written by Tavner and Penman was published in 1987 The economics of industry have now changed as a result of the privatisation and deregulation of the energy industry placing emphasis on the importance of reliable operation of plant throughout the whole life cycle regardless of first cost The availability of advanced electronics and software in powerful instrumentation computers and digital signal processors DSP has simplified our ability to instrument and analyse machinery As a result condition monitoring is now being applied to a wider range of systems from fault tolerant drives of a few hundred watts in the aerospace industry to machinery of a few hundred megawatts in major capital plant In this new book the original authors have been joined by Ran an expert in power electronics and control and Sedding an expert in the monitoring of electrical insulation systems Together the authors have revised and expanded the earlier book merging their own experience with that of machine analysts to bring it up to date **BOOK JACKET** *Conference Record of the ... Kao, 2004-05-11 In general a dielectric is considered as a non conducting or insulating material such as a ceramic or polymer used to manufacture a microelectronic device This book describes the laws governing all dielectric phenomena A unified approach is used in describing each of the dielectric phenomena with the aim of answering what how and why for the occurrence of each phenomenon Coverage unavailable in other books on ferroelectrics piezoelectrics pyroelectrics electro optic processes and electrets Theoretical analyses are general and broadly applicable Mathematics is simplified and emphasis is placed on the physical insight of the mechanisms responsible for the phenomena Truly comprehensive coverage not available in the current literature *Modern Aspects of Electrochemistry* John O'M. Bockris, Brian E. Conway, Ralph E.

White, 2012-12-06 Number 25 of this acclaimed series breaks new ground with articles on charge transfer across liquid liquid interfaces electrochemical techniques to study hydrogen ingress in metals and electrical breakdown of liquids Also included are articles on the measurement of corrosion and ellipsometry bringing these older subjects up to date **Digest of Literature on Dielectrics**, 1979 *Research Projects in Glaciology*, 1976 Canada. Water Resources Branch, 1977 This is the sixth report on the glaciological research program carried out by what is now the Water Resources Branch of Environment Canada This report describes the present structure and organization of the Glaciology Division and presents the general objectives and responsibilities of each of its components The catalogue section provides details of work done on

projects since publication of the 1974 report Projects which have been terminated transferred suspended or absorbed into other studies are listed separately A bibliography of published material not contained in previous reports is included Preface
