1984 And Beyond:

1984 and Beyond Nigel Calder, 1984 Offers a collection of predictions concerning the world of 2004 from a variety of distinguished futurists scientists and fiction writers including Herman Kahn Arthur C Clarke and Freeman Dyson *Beyond the City Limits* John Logan, Todd Swanstrom, 1990 The studies in this volume compare urban development in the United States Western Europe and Japan demonstrating that there is significant variety in urban economic restructuring The authors emphasize that the economic forces transforming cities from industrial concentrations to postindustrial service centers do not exist apart from politics all nation states are heavily involved in the restructuring process Back cover

Microdevelopment Nira Granott, Jim Parziale, 2002-05-09 Microdevelopment is the process of change in abilities knowledge and understanding during short time spans This book presents a new process orientated view of development and learning based on recent innovations in psychology research Instead of characterising abilities at different ages researchers investigate processes of development and learning that evolve through time and explain what enables progress in them Four themes are highlighted variability mechanisms that create transitions to higher levels of knowledge interrelations between changes in the short term scale of microdevelopment and the crucial effect of context Learning and development are analysed in and out of school in the individual's activities and through social interaction in relation to simple and complex problems and in everyday behaviour and novel tasks With contributions from the foremost researchers in the field Microdevelopment will be essential reading for all interested in cognitive and developmental science *Beyond the Dyad* Michael Lewis, K. Takahashi, 2005-01-01 There is consensus among social scientists that human beings from infants to elderly people develop social relationships with multiple significant others In fact everyday observations of individuals reveal that even infants interact not only with their mother but also with a variety of significant others However the attachment theory which has dominated theories and empirical studies of social relationships has argued for a narrower framework In this special issue four theoretical papers each of which provides models of social interaction that go beyond the mother child dyad are presented They theoretically contrast the attachment with the mother to relationships with multiple significant others and show that models assessing multiple relationships to others are more predicative of subsequent social and emotional adjustment Commentaries including attachment theorists and anthropologists to deepen the discussion are also presented Researchers and students in developmental psychology clinical psychology and psychiatry as well as teachers nurses and parents interested in these discussions will find in this issue essential theories that go beyond the mother child dyad Beyond Naturalness David N. Cole, Laurie Yung, 2012-06-22 The central concept guiding the management of parks and wilderness over the past century has been naturalness to a large extent the explicit purpose in establishing these special areas was to keep them in their natural state But what does that mean particularly as the effects of stressors such as habitat fragmentation altered disturbance regimes pollution invasive species and climate change become both more pronounced and

more pervasive Beyond Naturalness brings together leading scientists and policymakers to explore the concept of naturalness its varied meanings and the extent to which it provides adequate guidance regarding where when and how managers should intervene in ecosystem processes to protect park and wilderness values The main conclusion is the idea that naturalness will continue to provide an important touchstone for protected area conservation but that more specific goals and objectives are needed to guide stewardship The issues considered in Beyond Naturalness are central not just to conservation of parks but to many areas of ecological thinking including the fields of conservation biology and ecological restoration and represent the cutting edge of discussions of both values and practice in the twenty first century This book offers excellent writing and focus along with remarkable clarity of thought on some of the difficult questions being raised in light of new and changing stressors such as global environmental climate change

Romans and Barbarians Beyond the Frontiers Sergio Gonzalez Sanchez, Alexandra Gugliemi, 2017-03-31 This first thematic volume of the new series TRAC Themes in Roman Archaeology brings renowned international experts to discuss different aspects of interactions between Romans and barbarians in the northwestern regions of Europe Northern Europe has become an interesting arena of academic debate around the topics of Roman imperialism and Roman barbarian interactions as these areas comprised Roman provincial territories the northern frontier system of the Roman Empire limes the vorlimes or buffer zone and the distant barbaricum This area is today host to several modern European nations with very different historical and academic discourses on their Roman past a factor in the recent tendency towards the fragmentation of approaches and the application of postcolonial theories that have favored the advent of a varied range of theoretical alternatives Case studies presented here span across disciplines and territories from American anthropological studies on transcultural discourse and provincial organization in Gaul to historical approaches to the propagandistic use of the limes in the early 20th century German empire from Danish research on warrior identities and Roman Scandinavian relations to innovative ideas on culture contact in Roman Ireland and from new views on Romano Germanic relations in Central European Barbaricum to a British comparative exercise on frontier cultures The volume is framed by a brilliant theoretical introduction by Prof Richard Hingley and a comprehensive concluding discussion by Prof David Mattingly

Wellness Beyond Words T.S. Harvey, 2012-12-15 The delivery of health care can present a minefield of communication problems particularly in cross cultural settings where patients and health practitioners come from dissimilar cultures and speak different languages Responding to the need for in depth ethnographic studies in cultural and communicative competence this anthropological account of Maya language use in health care in highland Guatemala explores some of the cultural and linguistic factors that can complicate communication in the practice of medicine Bringing together the analytical tools of linguistic and medical anthropology T S Harvey offers a rare comparative glimpse into Maya intra cultural therapeutic Maya healer Maya wellness seeker and cross cultural biomedical Ladino practitioner Maya patient interactions In Maya medical encounters the number of participants the plurality of their

Strogatz,2013-03-13 Over the past three years I have grown accustomed to the puzzled look which appears on people s faces when they hear that I am a mathematician who studies sleep They wonder but are usually too polite to ask what does mathematics have to do with sleep Instead they ask the questions that fascinate us all Why do we have to sleep How much sleep do we really need Why do we dream These questions usually spark a lively discussion leading to the exchange of anecdotes last night s dreams and other personal information But they are questions about the function of sleep and interesting as they are I shall have little more to say about them here The questions that have concerned me deal instead with the timing of sleep For those of us on a regular schedule questions of timing may seem vacuous We go to bed at night and get up in the morning going through a cycle of sleeping and waking every 24 hours Yet to a large extent the cycle is imposed by the world around us *Making It Crazy* Sue E. Estroff,1985-06-06 Estroff describes a group of chronic psychiatric clients as they attempt life outside a mental hospital
