Salt Water Neighbors Ted L. McDorman, 2009 The United States and Canada are salt water neighbors on the Atlantic Pacific and Arctic Oceans Despite the general closeness of the political economic and social relationship the two States have approached their offshore areas from different perspectives Canada has long supported expansion of exclusive national control over its adjacent offshore whereas the United States has been concerned with the balance between national authority and international navigation rights Canada has tended to view maritime disputes

with the United States as local matters whereas the United States has tended to see the disputes with Canada in global terms Against this background Salt Water Neighbor s examines both the international ocean law disagreements that exist between the United States and Canada respecting maritime boundaries fisheries and navigation rights e g the Northwest Passage and the numerous cooperative bilateral arrangements that have prevented these disputes from being significant causes of friction between the neighbors There has not been a comprehensive book length study of United States Canada international ocean relations since the early 1970s Much has changed in the last 30 years Most importantly the law and the nature of the disputes between the two States have changed as a result of the adoption of 200 nautical mile zones in the late 1970s

Journal of Environmental Law and Litigation ,2007 **Interstate Water Compacts** Joseph F. Zimmerman,2012-10-12

Long taken for granted water resources are rapidly becoming a contentious issue within American politics Continuing population growth and rapid development coupled with environmental events such as droughts have led to increasing water shortages in sections of the nation In Interstate Water Compacts author Joseph F Zimmerman highlights the growing importance of water issues within the United States and a device that has been instrumental in facilitating interstate cooperation to solve water related problems the interstate compact This groundbreaking work is the first to devote itself exclusively to interstate and federal interstate compacts pertaining to controversies including the abatement of water pollution apportionment of river waters economic development flood control inland fisheries marine fisheries and restoration to rivers of anadromous fish such as salmon and shad The process for entering into interstate and federal interstate compacts is explained in detail as is the exercise of original jurisdiction by the US Supreme Court to resolve intractable interstate controversies involving interpretation of provisions of compacts water apportionment and water pollution abatement Zimmerman concludes by calling for the President Congress governors state legislatures and local governments to devote more attention and resources to finding solutions for water related problems **The Rights of Indigenous Peoples in**

Marine Areas Stephen Allen,Nigel Bankes,Øyvind Ravna,2019-09-19 The question of what rights might be afforded to Indigenous peoples has preoccupied the municipal legal systems of settler states since the earliest colonial encounters As a result of sustained institutional initiatives many national legal regimes and the international legal order accept that Indigenous peoples possess an extensive array of legal rights However despite this development claims advanced by Indigenous peoples relating to rights to marine spaces have been largely opposed This book offers the first sustained study of these rights and their reception within modern legal systems Taking a three part approach it looks firstly at the international aspects of Indigenous entitlements in marine spaces It then goes on to explore specific country examples before looking at some interdisciplinary themes of crucial importance to the question of the recognition of the rights of Indigenous peoples in marine settings Drawing on the expertise of leading scholars this is a rigorous and long overdue exploration of a significant gap in the literature Pacific Salmon Management and S. 1825, the Pacific Salmon Recovery Act United States.
