Antimicrobial Susceptibility Testing James A. Poupard, Lori R. Walsh, Bruce Kleger, 2013-11-21 The papers assembled in this collection comprise a majority of the oral presentations as well as several poster presentations given at the 22nd Annual Symposium arranged by the Eastern Pennsylvania Branch of the American Society for Microbiology. The symposium would not be possible without the generous support of the many sponsors see sponsor list or without the concerted effort of all the Committee members. This Symposium series has evolved into an annual Eastern Pennsylvania Branch ASM event that attracts participants from a wide geographic area. It should be noted that one of the hallmarks of these symposia involves interaction between the presenters and those in attendance. Several authors have altered their by the participants. Therefore the manuscript that manuscripts based on comments follows should be viewed as a group effort of both the participants and presenters. Werry,Michael G. Aman,2013-11-11 information This book aims to do this for practitioners professionals in health welfare and education and interested laypersons including parents This is no easy task since the levels of technical knowledge vary from that of the special education teacher seeking information about the drugs that many such pupils will be receiving to that of the modern young child and adolescent psychiatrist whose grasp of the difficult fields of pharmacokinetics how drugs are absorbed distributed and eliminated and neurotransmitter physiology via which most psychoactive drugs work is daunting to the editors who grew up in the bucolic clinical empirical era Inevitably there are sections of the book that will prove too technical for any except the medically qualified but considerable effort has been applied to make much of the text especially that discussing the clinical uses and side effects of the drugs comprehensible to anyone used to getting information by reading We also take comfort in the fact that many of the major contributions in pediatric psychopharmacology have been made by nonmedical professionals notably psychologists suggesting that an audience beyond the medically qualified is practicable
