

2002 IEEE Nuclear and Space Radiation Effects Conference Awards Chairman's Comments

THE 2002 IEEE Nuclear Space Radiation and Effects Conference (NSREC) Awards Committee evaluated each oral, poster, and workshop paper that was presented at the conference in a two-step reviewing process. First, five or more of the 18 members of the Committee reviewed and scored each presentation in terms of numerical evaluation for both oral and poster papers. As a result, ten papers were selected for final consideration for the Outstanding Conference Paper Award in the second step of the process. The selection of the final papers was based on the scoring and a review by the Committee after the end of the conference. The scoring was based on clarity and quality of the presentation, the technical content, and the significance of the work. The final selection was aided with a laptop computer to compile, plot, and average the scores, thus enabling a focused meeting to select the finalists from the 101 oral and poster papers. Thirty-two Data Workshop papers were also reviewed for the Meritorious Award.

Each committee member received copies of the ten final papers, as they were submitted to the Guest Editor. The papers were carefully reviewed and scored on the basis of technical quality, relevance and significance, clarity and logical development, and originality. The committee members devoted a great deal of effort in reviewing and scoring the papers. They provided both a numerical score for the papers along with their personal comments and, as a backup, an ordinal ranking of the papers. Again, the scores and the ordinal rankings were averaged and plotted. Comments from the members were also reviewed. Four papers received very high scores with the remaining papers following closely. The Outstanding Conference Paper clearly received the best overall score and was confirmed as such by the ordinal rankings and personal reviews. The three other papers that received very close and high scores deserve recognition as Meritorious Conference Papers.

The Outstanding Conference Paper is:

"Impact of Passivation Layers on Enhanced Low-Dose-Rate Sensitivity and Pre-Irradiation Elevated Temperature Stress Effects in Bipolar Linear ICs," by M. R. Shaneyfelt (Sandia National Laboratories), R. L. Pease (RLP Research), J. R. Schwank (Sandia National Laboratories), M. C. Maher (National Semiconductor), G. L. Hash, (Sandia National Laboratories), D. M. Fleetwood (Vanderbilt University), P. E. Dodd, C. A. Reber, S. C. Witzrak, L. C. Riewe, H. P. Hjalmarson, J. C. Banks, B. L. Doyle, and J. A. Knapp (Sandia National Laboratories).

The Meritorious Papers are:

"Charge Collection in SOI Capacitors and Circuits and Its Effect on SEU Hardness," by J. R. Schwank, P. E. Dodd, M. R. Shaneyfelt, G. Virkhelethy, B. L. Draper, T. A. Hill, D. S. Walsh,

G. L. Hash, B. L. Doyle, and F. D. McDaniel (Sandia National Laboratories).

"Unified Model of Hole Trapping, $1/f$ Noise, and Thermally Stimulated Current in MOS Devices," by D. M. Fleetwood, H. D. Xiong, Z. Y. Lu, C. J. Nicklaw, J. A. Felix, R. D. Schrimpf, and S. T. Pantelides (Vanderbilt University).

"Physical Model for Enhanced Interface-Trap Formation at Low Dose Rates," by S. N. Rashkeev, C. R. Cirba, D. M. Fleetwood, R. D. Schrimpf, S.T. Pantelides (Vanderbilt University), S. C. Witzrak (Sandia National Laboratories), and A. Michiez (Centre d'Electronique et de Microelectronique de Montpellier).

I would like to thank the members of the Awards Committee for their hard work and time in reviewing approximately fifty papers apiece during, and the ten finalist papers after, the conference. The final review process of the ten top papers required the most time, and I would like to thank them for a job well done. The awards process continues to be a mechanism for encouraging the highest quality of technical work and presentations to be offered by the NSREC community. However, the process is only successful because of the dedicated efforts of the members of the Awards Committee in objectively reading, evaluating, and scoring the papers. The selection of a team with great technical diversity and talent was a challenge, but it was a rewarding and memorable experience. Much thanks again for their support.
