1997 Year Of Geriatrics And Gerontology:

Excellence in geriatrics good education, good practice, good policy Kimberly Spruill Smith,1998 **Principles and Practice of Geriatric Surgery** Ronnie Ann Rosenthal,Michael E. Zenilman,Mark R. Katlic,2013-06-29 More than two decades ago in response to the special healthcare needs of the aging American population interest in the field of geriatric medicine began to grow and blossom in the United States In 1984 and 1985 under the editorial leadership of Christine K Cassel and William R Hazzard respectively two major textbooks devoted to the medical care of aged patients were published These scholarly comprehensive texts provided insight into the principles of aging and guidance in the care of the geriatric patient Three editions later the need to understand the special issues involved in the medical care of the elderly is widely accepted by internists primary care providers and medical specialists For the editors of this book the special issues involved in the surgical care of the elderly have been apparent for nearly as long Although there have been a few scholarly texts on the subject including one in 1990 by Mark R Katlic general acceptance of the concept of geriatric surgery by our surgical and medical colleagues has however lagged This is not the result of a proportionately smaller number of older patients with surgical disease because cancer cardiovascular disease and orthopedic problems are diseases of the aged It is rather the result of uncertainty about the value of surgery in the elderly and concerns about the risks of operations In the past such concerns prevented primary care givers from referring patients for surgical care and prevented surgeons from agreeing to operate **A Clinical Approach to Geriatric Rehabilitation** Jennifer Bottomley,Carole Lewis,2024-06-01 The field of geriatric rehabilitation is constantly changing due to the discovery of new evidence based evaluation and treatment strategies as well as the continual support or refutation of older theories and practices Now in its Fourth Edition A Clinical Approach to Geriatric Rehabilitation has been updated to be at the forefront of these changes and includes free video content from MedBridge and a discount on a MedBridge subscription to geriatric rehabilitation courses offered by the authors Drs Jennifer M Bottomley and Carole B Lewis have compiled the plethora of available scientific research on geriatric populations and combined it with their years of actual clinical practice Together this makes this text a complete evidence based guide to the clinical care of geriatric patients and clients The first part of A Clinical Approach to Geriatric Rehabilitation Fourth Edition tackles applied gerontological concepts providing the general knowledge base necessary for treating geriatric patients Topics in this section include patient evaluation an exploration of nutritional needs and age related changes in physiology and function as well as many other foundational areas In the second section topics become more focused on patient care concepts like neurologic considerations cardiopulmonary and cardiovascular considerations and establishing community based screening programs In the final section chapters center on administration and management including important subjects such as attitudes ethics and legal topics as well as consultation and research New and updated in the Fourth Edition Pearls section for succinct highlights of the content within each chapter The latest evidence based practice

interventions with complete references for further reading Updated graphics pictures and diagrams to illustrate the content
Content summaries and streamlined text for enhanced readability Updated case studies to exemplify clinical decision making
Designed to provide valuable real life clinical knowledge A Clinical Approach to Geriatric Rehabilitation Fourth Edition gives
physical therapists an evidence based guide to the clinical aspects of rehabilitative care in older adult patients and clients

developments *Geriatric Medicine* Christine K. Cassel, Rosanne Leipzig, Harvey Jay Cohen, Eric B. Larson, Diane E.
Meier, 2006-05-29 Since the publication of the third edition of Geriatric Medicine extraordinary advances have occurred in
the science of aging and the potential for biomedical research to give us answers to many if not most of the age related
disorders that threaten the quality of life in older years At the most basic level the successful mapping of the human genome
was declared complete in the fall of 2000 Understanding the map of the human genome is as important as understanding the
map of genomes of important laboratory species ranging from the microscopic worms and fruit flies used in most classic
genetic studies to rodents such as laboratory mice and eventually to primates on which much of the research on the aging
human brain is done The genetic maps of all of these species including our own does not answer clinical questions but it does
open the door to dramatic rapid and efficient answers to questions about the genetic polymorphisms related to diseases in

humans The telomerase story also unfolded since the third edition Telomerase is an enzyme responsible for maintaining the telomeres the redundant DNA portions at the end of chromosomes whose shortening seems to be linked directly to cell senescence apoptosis and the control over cell death which at the level of the individual cell seems to be linked to the decline of organ function and eventually aging and death within the organism

Comprehensive Geriatric Oncology Lodovico Balducci, Gary H. Lyman, William B. Ershler, Martine Extermann, 2004-03-01 Published in 2004 This new edition of Comprehensive Geriatric Oncology still offers an exhaustive review of the biology of cancer and aging of the epidemiologic trends in the country and in the world and of the clinical trials that concern cancer prevention and cancer treatment in the elderly

Emergency General Surgery in Geriatrics Rifat Latifi, Fausto Catena, Federico Coccolini, 2021-03-29 There is a growing need for a book on emergency general surgery in the elderly as adults age 65 and older are the fastest growing segment of the population worldwide and their number is expected to double to 89 million between now and 2050 Based on

these changing demographics it is expected that there will be a concurrent rise in the demand for a variety of surgical services including vascular surgery with a projected growth of 31% and general surgery with a projected growth of 18% as well as in all sub disciplines of surgery thoracic cardiac oncology hepatobiliary transplant plastic colorectal orthopedic gynecologic urology and neurosurgery In addition older surgical patients often require a different level of care than younger patients during the preoperative intraoperative and postoperative phases Many of our geriatric population have multiple chronic illnesses beyond the one for which surgery is required and therefore are prone to developing postoperative complications functional decline loss of independence and other undesirable outcomes In response this book offers surgeons geriatrists and nurses state of the art surgical approaches and essential information on the complex perioperative care of the elderly

Classic Papers in Geriatric Medicine with Current Commentaries Robert J. Pignolo, Monica Crane, Mary Ann Forciea, 2010-04-28 The field of geriatrics foundations is rooted in the classic papers of early descriptions of aging and age related diseases In *Classic Papers in Geriatric Medicine with Current Commentaries* the authors chose the classic papers providing a combination of expert opinion and objective assessment The 15 areas in this volume represent the beginnings of practice and thoughts about the best ways to care for older patients Each paper is introduced by a commentary describing the singular contributions of the chosen paper with a short list of other important early papers in that area and in many cases reflect on progress in that particular field The commentaries are personal statements by the authors about the influence of the papers chosen not meant to be exhaustive reviews of the clinical area in question *Classic Papers in Geriatric Medicine with Current Commentaries* exemplifies the importance of a paper and its ability to retain its impact over time While many of the classic papers in this collection have stood the test of time others have gained classic status by virtue of their profound influence in relatively quick measure or because of timeliness in filling a void in knowledge
