Graafland, 2010-04-05 The past two decades of market operation has generated welfare and economic growth in Western countries but increasing income inequalities depletion of the natural environment and the

current financial crisis have led to an intense debate about the advantages and disadvantages of the free market. With this book Professor Graafland makes a valuable contribution to the Christian debate about the market economy. In particular it aims to clarify the links between ethical values, Christian belief and economics as well as informing theologians and economists about recent economic insights into market operation. The book investigates the effect of free market operation on welfare and well being, calling into question why one would favour more market competition as a means of increasing happiness. As well as this Professor Graafland examines how free market competition relates to principles of justice and looks at whether it enforces or crowds out Christian virtues like love, humility and temperance. Books that systematically link biblical teaching about the economy to recent theoretical and empirical research in economics on free market operation are rare. Most Christian books on the market system are theologically oriented, lacking a sound basis in the extensive knowledge of the recent economic literature on market operation. This book confronts Christian ethical standards with current economic literature on the effects of market operation on welfare, happiness, human rights, inequality and virtues in order to develop a well based and balanced view of the pros and cons of market operation. This book will be of interest to both undergraduate and postgraduate students of economics, philosophy and theology.

Impact of Political Stability on Economic Development
Addis Ababa Othow Akongdit, 2019-10-04

The main theme of this study is chosen in response to the general consensus on the importance of conducting a comprehensive study that may shape the economic policies and promote the business sector as well as the government and other organizations. However, the key question posed by this study is whether the theory that political stability fosters economic development is simply the wishful thinking of people who value both stability and growth or whether it is a delusion of those who believe that most developing countries may enjoy rapid growth if they are stable. The importance of this study is clear. South Sudan is confronted with enormous challenges of administrative, ethnic, political and economic development. In light of this, the current study addresses the following issues: What is the impact of the political system in South Sudan on economic development? What is the impact of oil resources on sustainable development? What is the impact of the oil shutdown on political and economic stability and what is the possibility of deficit financing? Is there any possibility for cooperation between Sudan and South Sudan? In this context, the major objective of this study is to analyze the political development of the country to verify that political stability fosters the achievement of economic and social development. It also seeks to analyse the political history of Sudan in general and South Sudan in particular, emphasising the importance of political stability among other considerations as a precondition for socioeconomic development. Furthermore, other objectives of the study include suggestions on how political stability could be ensured in South Sudan and how good governance may promote political and economic stability. In light of the above, this study focuses on the issues of the political transition and policies that will improve the economic, political and social well being of the people of South Sudan. It seeks ways of setting up policies that will raise the standard of living of people with sustained

growth and move from a simple low income economy to a modern high income economy It also attempts to develop a framework for cooperation between Sudan and South Sudan The methodology that is adopted to address these issues is collecting sorting and analysing primary and secondary information relating to the history of political and economic development in South Sudan using empirical approaches such as SWOT analysis information sources references and books However this study is organized as follows chapter 1 discusses political stability and economic development in a theoretical framework through which we explore the empirical analysis it is divided into four sections Section 1 focuses on definition causes and measurement of political stability with an aim to assess the effect of political stability on growth related variables In section 2 we define the concept of political instability and measure it by using indicators like the number of coups d tat the number of major government crises the number of cabinet changes and the number of political revolutions as well as political assassinations Section 3 discusses the concept and definition of economic development and summarizes the major theories of economic development in five fundamental elements The last section explores the implications of financing economic development by discussing domestic resources including deficit financing and foreign financial resources and the role of each of them in achieving economic development Chapter 2 presents the political and social background of South Sudan is divided into three sections Section 1 discusses South Sudan s ability to function and successfully implement its policies and strategic vision for the year 2040 Section 2 focuses on the demographic structure of South Sudan in terms of population education languages and culture Section 3 discusses the social indicators such as infrastructure poverty and corruption which affect improving social welfare as well as the political stability and economic development of the Republic of South Sudan Chapter 3 focuses on the South Sudan economy and the challenges Here we discuss the political and development challenges facing South Sudan as well as the investment opportunities This chapter discusses the major challenges which face South Sudan especially issues such as border demarcation political reform and oil shutdown as well as investment opportunities in oil and agriculture In chapter 4 we discuss South Sudan s oil and economic development It focuses on oil resources and their impact on sustainable development the impact of oil shutdown on political and economic development and the possibility of deficit financing In chapter 5 we discuss the future of stability and prosperity in South Sudan It discusses how good governance and cooperation can be enormously beneficial to South Sudan in the process of building sustainable political and economic stability and what South Sudan can learn from other countries The major findings of this study are as follows Political stability plays an important role in determining economic growth and economic development in many economies The degree of political stability is high if there is a high degree of democracy or autocracy Strong democracies or strong autocracies are best equipped to provide political stability that may lead to economic development It is then the level of political stability within a given country regardless of regime type that results in economic growth Long term sustainable economic growth depends on the ability to raise the rates of accumulation of physical and human capital by securing necessary sources

domestic foreign or deficit finance to use efficiently for financing economic development Most economists view corruption as a major obstacle to development It is seen as one of the causes of low income and is believed to play a critical role in generating poverty traps e g Blackburn et al 2006 Thus corruption according to this view sands the wheels of development and it makes economic and political transitions difficult Not only is good governance critical to development but it is also the most important factor in determining whether a country has the capacity to use resources effectively to promote economic growth and reduce poverty

Institutions and Development in Africa

John Mukum Mbaku,2004 A significant contribution to the debate on poverty alleviation in Africa Professor Mbaku offers practical policies for economic growth He argues that the most important contributor to poverty and deprivation in Africa is the absense of institutional structures that enhance indigenous entrepreneurship and wealth creation He explains that these are so vital that living standards will continue to deteriorate unless these building blocks are put in place

30 Years since the Fall of the Berlin Wall Alexandr Akimov,Gennadi Kazakevitch,2020-01-08 The year 2019 marks 30 years since the fall of the Berlin wall This symbolic event led to German unification and the collapse of communist party rule in countries of the Soviet led Eastern bloc Since then the post communist countries of Central Eastern and South eastern Europe have tied their post communist transition to deep integration into the West including EU accession Most of the states in Central and Eastern Europe have been able to relatively successfully transform their previous communist political and economic systems In contrast the non Baltic post Soviet states have generally been less successful in doing so This book with an internationally respected list of contributors seeks to address and compare those diverse developments in communist and post communist countries and their relationship with the West from various angles The book has three parts The first part addresses the progress of post communist transition in comparative terms including regional focus on Eastern and South Eastern Europe

CIS and Central Asia The second focuses on Russia and its foreign relationship and internal politics The third explores in detail economies and societies in Central Asia The final part of the book draws some historical comparisons of recent issues in post communism with the past experiences

IRAN AND TURKMENISTAN RELATIONS, 1991-2010, 2024-09-25 Cordial relations with neighboring countries are important to any country and are considered a strategic policy in international arena Any country as a member of the international community has common land or sea borders with other countries and of course no country actually chooses its neighbors As a result it is situated in unwanted surroundings in which it cannot eliminate neighboring states Therefore it has to engage in suitable and constructive interaction with its neighbors Of course it should be noted that having good and constructive relations with neighbors is a strategic element of foreign policies of all countries Those neighbors can potentially offer opportunities or pose threats to any given country Moreover diplomatic relations between countries are divided in two totally different types The first type of relationship is a one sided relationship in which priority is given to the interests of a powerful and hegemonic country On the other side the interests of the other country which is under domination of the powerful one are not usually met This kind of relation is usually unstable and as the power of the dominated country increases the relations do not continue in the past form and may even be severed The second type of relations is a bilateral one in which equal attention is paid to the interests of both countries Of course the benefits of two countries may not be really equal in such a relationship but relations are generally to the benefit of both sides and are usually more lasting and sustainable than the first type It should be noted that no country restricts its diplomacy to establishment of relations with neighboring countries alone In addition to neighbors it will also establish relations with other countries which sway influence in international arena Foreign policy of every country revolves around two main pivots The first pivot is having good relations with the neighboring countries with the second one being establishment of cordial ties

with powerful and influential international players or those which can help the country meet its national interests Focus on one of these groups will never obviate the need for a country's foreign policy to pay due attention to the other group Iran has shared more common grounds with the Middle Eastern and Persian Gulf countries and therefore relations with those countries have been important to Iran and a matter of high attention Here we will focus on Iran's foreign policy approaches toward its northern neighbors Iran's relations with its northern neighbors including Turkmenistan Azerbaijan and Armenia have been of the second type This means that Iran's relations with these countries have been two way In this type of relationship common interests should be defined first before relations can be formed around them so that both countries will be benefited by these relations and mutual benefit will help relations to be sustained This is a general picture of diplomatic relations between Iran and these countries Central Asian Republics emerged as self governing sovereign countries in December 1991 as a consequence of Soviet dissolution Central Asia lies at the heart of Eurasian continent and utterly land locked and geographically encircled by Russia in the north the Eastern Europe in the west Turkey Iran Afghanistan in the south and China in the east Any power which has a foothold or deep influence in Central Asia can have close watch to the important neighboring areas Therefore the region bears great geo strategic importance Its geo economic importance is mainly because of the presence of vast oil and natural gas resources Iran perceives the Central Asian region as an arena for reducing its own isolation Hoping to make itself an attractive partner to these states Iran has been cautious in supporting radical Islamic opposition movements in the region Several Central Asian States CAS are proceeding with or contemplating energy projects that transit Iran Prior to the disintegration of Soviet Union the Caspian Sea was under the combined ownership of Soviet Union and Iran but the emergence of three new states Azerbaijan Turkmenistan and Kazakhstan bordering the Caspian Sea has made the situation complex The exclusive rights of Russia and Iran have come to be challenged The largest oil and gas reserves are situated within the territory of these three former Soviet Republics Iran and Turkmenistan enjoy a common cosmology and mythology through the concept of Turan o Iran a traditional mode of spatial sub division Actually Turan is a Persian term to designate north eastern Iran The Iranian and Turkmen people share a great deal of traditions like the Navruz Availability of ethnic minorities on both of the border is one of the factors facilitating close contacts between Turkmenistan and Iran Iran has gained invaluable geopolitical advantages that may lead it to increase in its power as major player in the Turkmenistan region in the near future Iran shares a common border with Turkmenistan The Caspian dimension is also an important factor of the relations between Iran and Turkmenistan They have a lengthy border they share historic religious and civilization commonalty stretching back for centuries Advancing relations with Turkmenistan Iran is being quite pragmatic It is after strengthening of its positions in the region and benefiting from availability of hydrocarbons in the neighboring countries and from its convenient geopolitical site at the crossroads of transit ways Turkmen population of the northern provinces of Iran is a factor that facilitates neighborly relations Geographically

Iran and Turkmenistan play a vital role in linking Caspian Sea to the Persian Gulf. It is the only country which has access to Persian Gulf and Arabian Sea ports since the mid 1990s. Turkmenistan is also aware about Iran which has a very sensitive political relationship with the West more particularly with the United States which has alleged that Iran provides extensive support to terrorist groups. There is also a dispute about its nuclear program which allegedly violates the terms of Non Proliferation Treaty. Despite several difficulties and hurdles Turkmenistan also sees the Iranian policy in relation to this region has proved durable. In the first place Iranian policy has vastly improved its relations with Russia despite the potential contradictions in the Iranian and Russian policy towards Central Asia and the Caspian region. Both countries have evolved a strategic partnership with significant military and nuclear components. Secondly they share increasing aspiration to influence the development of oil and gas resources in the Caspian Sea. Iran has signed agreements with Turkmenistan, Russia, Ukraine and China and trying to develop relations with Iran in this respect. However due to the limited capacity of gas pipelines and the lack of any alternative export routes for natural gas Turkmenistan requires to develop socio economic and political relations with Iran. Iran sees Turkmenistan as transit route to rest of the Central Asian region. The construction of a 200 kilometer pipeline between the Turkmenistan town of Korpędzhe and Kord Kuy in Iran assured the export of 8 billion cubic meters of gas each year into Iran's network. With Iranian financing this pipeline is expected to become part of a larger system for exporting Turkmen gas to Turkey. The steady improvement of Turkmenistan's relations with Iran in the sphere of gas transport was symbolized by the joint decision in the summer of 2006 to increase Turkmenistan's annual export to the Iranian grid to 14 billion cubic meters. As we know that Turkmen population of the northern provinces of Iran is also an important factor that facilitates neighborly socio economic and political relations between Turkmenistan and Iran. The attraction both countries experience towards each other stems from the lack of choice which is a distinct feature of the Iranian and Turkmen relations. Both countries are having active bilateral contacts because they have a lengthy border they share historic religious and civilizational commonalty stretching back to centuries. Iran and Turkmenistan have interest to develop their relations for three reasons firstly to build ties with the neighbouring states for social economic and political reasons in order to leave the area free for its rivals. Secondly to break its isolation from the Gulf and the Near Eastern areas and thirdly to become active in their region by launching its foreign policy and by reinvigorating its regional diplomacy. To achieve these objectives Turkmenistan and Iran have been intensely active in their bilateral relations.

The Encyclopedia of Public Choice Charles Rowley, Friedrich Schneider, 2008-01-25. The Encyclopedia provides a detailed and comprehensive account of the subject known as public choice. However the title would not convey sufficiently the breadth of the Encyclopedia's contents which can be summarized better as the fruitful interchange of economics, political science and moral philosophy on the basis of an image of man as a purposive and responsible actor who pursues his own objectives as efficiently as possible. This fruitful interchange between the fields outlined above existed during the late eighteenth century during the brief period

of the Scottish Enlightenment when such great scholars as David Hume Adam Ferguson and Adam Smith contributed to all these fields and more However as intellectual specialization gradually replaced broad based scholarship from the nineteenth century onwards it became increasingly rare to find a scholar making major contributions to more than one Once Alfred Marshall defined economics in neoclassical terms as a narrow positive discipline the link between economics political science and moral philosophy was all but severed and economists redefined their role into that of the humble dentist providing technical economic information as inputs to improve the performance of impartial benevolent and omniscient governments in their attempts to promote the public interest This indeed was the dominant view within an economics profession that had become besotted by the economics of John Maynard Keynes and Paul Samuelson immediately following the end of the Second World War

East Asian Development Model Shiping Hua,Ruihua Hu,2014-12-17 Given the impressive growth in East Asia after World War II initially led by Japan the region's development models have been scrutinized since the 1980s The shared Confucian cultural heritage strong government guidance and export led economies were often cited as contributors to the impressive growth However major changes have taken place in Asia on and around the turn of the century Japan experienced two decades of economic slow down while World Bank figures reveal that China is poised to become the largest economy in the world in 2014 overtaking the United States Bearing this in mind is it even possible to formulate an East Asian development model in the context of a shifting twenty first century And if so what is it This book addresses this issue by looking at the economic political and cultural perspectives of China Japan and South Korea focusing on dynamism and potential consensus regarding an East Asian development model The chapters offer a historical background to the East Asian development model as well as in depth case studies of each of the countries concerned to show that whilst the East Asian development model does have distinct characteristics as compared with other areas and other countries may draw some insights from the East Asian experience it is not a panacea that fits all circumstances and fits all times This book will be welcomed by students and scholars of Asian economics Asian politics international political economy and development studies
