Comprehensive coverage of critical issues related to information science and technology **Proceedings of the USENIX 1999 Annual Technical Conference** USENIX Association, 1999 **AUUGN**, 1999-06 *Index of Conference Proceedings* British Library. Document Supply Centre, 2000 **Advances in Information Systems** Tatyana Yakhno, 2000-10-11 This volume contains the proceedings of the First International Conference on Advances in Information Systems ADVIS held in Izmir Turkey 25-27 October 2000. This conference was dedicated to the memory of Professor Esen Ozkaran. He was a great researcher who made an essential contribution to the development of information systems. This conference was organized by the Computer Engineering Department of Dokuz Eylul University of Izmir. This department was established in 1994 by the founding chairman Professor Ozkaran and there he worked for the last few years of his life. The main goal of the conference was to bring together researchers from all around the world working in different areas of information systems to share new ideas and to represent their latest results. We received 80 submissions from 30 countries. The Program Committee selected 44 papers for presentation at the conference. The invited and accepted contributions cover a large variety of topics: general aspects of information systems, data bases, data warehousing, computer networks, Internet technologies, content based image retrieval, information retrieval, constraint programming and artificial intelligence. The success of the conference was dependent upon the hard work of a large number of people. We gratefully acknowledge the members of the Program Committee who helped to coordinate the process of refereeing all submitted papers. We also thank all the other specialists who reviewed the papers.

Software Engineering, Artificial Intelligence, Networking and Parallel/Distributed Computing Roger

Lee, Naohiro Ishii, 2009-04-30 The purpose of the 10th ACIS International Conference on Software Engineering, Artificial Intelligence, Networking and Parallel Distributed Computing (SNPD) 2009 held in Daegu, Korea on May 27-29, 2009, the 3rd International Workshop on e-Activity (IWEA) 2009 and the 1st International Workshop on Enterprise Architecture Challenges and Responses (WEACR) 2009 is to aim at bringing together researchers and scientists, businessmen and entrepreneurs, teachers and students to discuss the numerous fields of computer science and to share ideas and information in a meaningful way. Our conference officers selected the best 24 papers from those papers accepted for presentation at the conference in order to publish them in this volume. The papers were chosen based on review scores submitted by members of the program committee and underwent further rounds of rigorous review. In chapter 1, Igor Crk and Chris Gniady propose a network aware energy management mechanism that provides a low cost solution that can significantly reduce energy consumption in the entire system while maintaining responsiveness of local interactive workloads. Their dynamic mechanisms reduce the decision delay before the disk is spun up, reduce the number of erroneous spin ups in local workstations, decrease the network bandwidth and reduce the energy consumption of individual drives. In chapter 2, Yoshihito Saito and Tokuro Matsuo describe

a task allocation mechanism and its performance concerning with software developing They run simulations and discuss the results in terms of effective strategies of task allocation

Network Algorithmics George Varghese,Jun Xu,2022-11-11 Network Algorithmics An Interdisciplinary Approach to Designing Fast Networked Devices Second Edition takes an interdisciplinary approach to applying principles for efficient implementation of network devices offering solutions to the problem of network implementation bottlenecks In designing a network device there are dozens of decisions that affect the speed with which it will perform sometimes for better but sometimes for worse The book provides a complete and coherent methodology for maximizing speed while meeting network design goals The book is uniquely focused on the seamless integration of data structures algorithms operating systems and hardware software co designs for high performance routers switches and network end systems Thoroughly updated based on courses taught by the authors over the past decade the book lays out the bottlenecks most often encountered at four disparate levels of implementation protocol OS hardware and architecture It then develops fifteen principles key to breaking these bottlenecks systematically applying them

to bottlenecks found in end nodes interconnect devices and specialty functions located along the network Later sections discuss the inherent challenges of modern cloud computing and data center networking Offers techniques that address common bottlenecks of interconnect devices including routers bridges gateways endnodes and Web servers Presents many practical algorithmic concepts that students and readers can work with immediately Revised and updated throughout to discuss the latest developments from authors courses including measurement algorithmics randomization regular expression matching and software defined networking Includes a new rich set of homework exercises and exam questions to facilitate classroom use **Telecom Calendar Newsletter** , *Web Caching and Content Delivery* A. Bestavros,M. Rabinovich,2001-12-14 The International Web Content Caching and Distribution Workshop WCW is a premiere technical meeting for researchers and practitioners interested in all aspects of content caching distribution and delivery on the Internet The 2001 WCW meeting was held on the Boston University Campus Building on the successes of the five previous WCW meetings WCW01 featured a strong technical program and record participation from leading researchers and practitioners in the field This book consists of all the technical papers presented at WCW 01 It includes 20 full papers and four R D synopses that were presented at the workshop The collection reflects the latest research in this important area including such topics as Content Delivery Networks CDNs tools and methodology of performance measurements Web characterization as relates to caching and content distribution scalable web server architectures cache prefetching emerging new edge services and delivery of streaming content
