Arizona Heat:

The Air They Breathe Debra Hendrickson, 2025-07 A timely revelatory first look into the impact climate change has on children the greatest moral crisis humanity faces today by a pediatrician in the fastest warming city in America Wildfires hurricanes and heat waves make headlines But what is happening in Debra Hendrickson's clinic tells another story of this strange and unsettling time Hendrickson is a pediatrician in Reno Nevada the fastest warming city in the United States where ash falls like snow during summer wildfires In *The Air They Breathe* Dr Hendrickson recounts patients she's seen who were harmed by worsening smoke smog and pollen two boys in Arizona stricken by record setting heat while hiking children who fled for their lives from Hurricane Harvey and the Tubbs Fire and a little girl whose life was forever altered by the Zika virus outbreak in 2016 The climate crisis is a health crisis and it is a health crisis first and foremost for children Children's bodies are interwoven with and shaped by their surroundings As the planet warms and their environment changes children's health is at risk The youngest are especially vulnerable because their brain lungs and other organs are forming and growing every day and because their physiology is so different from that of adults Childhood has always been a risky period of life throughout history babies and children have met peril from polio to famine from cyclones to war Yet they have never quite had to face in quite this way the potential loss of the future itself *The Air They Breathe* is not just about the health impacts of global warming but something more a soul stirring reminder of our moral responsibility to our children and their profound connections to this unique and irreplaceable world

Hearings
United States. Congress. House. Committee on Interior and Insular Affairs,1968 *Mother, Creature, Kin* Chelsea Steinauer-Scudder,2025-04-08 Luminous nonfiction about the natural world from essayist Chelsea Steinauer Scudder who asks what can other than human creatures teach us about mothering belonging caregiving loss and resiliency What does it mean to be a mother in an era of climate catastrophe And what can we learn from the plants and creatures who mother at the edges of their world s unraveling Becoming a mother in this time means bringing life into a world that appears to be coming undone Drawing upon ecology mythology and her own experiences as a new mother Steinauer Scudder confronts

what it means to mother to do the good work of being in service to the living world What if we could all mother the places we live and the beings with whom we share those places And what if they also mother us In prose that teems with longing lyricism and knowledge of ecology Steinauer Scudder writes of the silent flight and aural maps of barn owls of nursing whales of real and imagined forests of tidal marshes of ancient single celled organisms and of newly planted gardens The creatures inhabiting these stories teach us about centering belonging entanglement edgework homemaking and how to imagine the future Rooted in wonder while never shying away from loss Mother Creature Kin reaches toward a language of inclusive care learned from creatures living at the brink Writing in the tradition of Camille Dungy Elizabeth Rush and Margaret Renkl Steinauer Scudder invites us into the daily obligatory sacred work of care Despair and fear will not save the world any more than they will raise our children and while we don t know what the future holds we know it will need mothers As the very ground shifts beneath our feet what if we apprenticed ourselves to the creaturely mothers with whom we share this beloved home

Disinventions José Manuel Cortez, 2025-09-09 US immigration policy along the southwestern border is deadly Since 1994 the US Border Patrol has implemented a federal immigration strategy known as prevention through deterrence which closed off many urban entry points along the US Mexico border and militarized urban border crossings This policy forced undocumented migrants to cross through dangerous terrain

like the Sonoran Desert often with tragic results Immigrant advocates highlight migrant disappearances and deaths to expose the policy's human toll In *Disinventions* Jos Manuel Cortez argues this approach is unlikely to bring an end to such oppressive immigration practices *Disinventions* examines the cultural political and rhetorical effects of US deterrence practices exploring how discourse on immigration overlooks subjects who have always been a part of the borderlands but are rarely included in migration narratives He highlights the failings of decolonial methods and discourse to fully capture and represent marginalized voices including Black Central American and queer subjects And he develops an ethics of unconditional hospitality embracing undocumented migrants By drawing on the concept of atopias and what he calls sites of disinvention to unearth new forms of politics Cortez suggests we can transcend the limits of decolonization discourse and humanize undocumented immigrants This challenging and engaging work should appeal to scholars and students of rhetorical studies Latinx studies and American studies
